

EOC Facility Feedback Received from the Public Meetings or direct contact:

(as of December 18, 2023)

COMMENTS:

- I hope DAC ARES will be kept in the loop.
- Liked the diagrams.
- Great low energy use in mind.
- Thanks for letting us provide input and answering our questions.
- I generally support this project.
- Facility looks great.
- Looks like a good plan.

CONCERNS:

- RF interference from transformer.
- Light pollution
- Increased traffic on Las Alturas & Geothermal Drive
- Impact on wildlife – birds, coyote, mountain lion, wolves, bobcat.
- Tortugas Dam 1 (article provided from LC Sun News 11/11/2019)
- Helicopter landing pad in the neighborhood is not a good idea.
- Noise
- Lighting – follow the Dark Sky ordinance
- I am very concerned about protecting the night sky (what's left of it) and expect lighting to conform to with Night Sky rules.
- Mass evacuation of citizens (discussed in relation to role of facility).

SUGGESTIONS:

- We enjoy the view of the golf course. Please try to keep as much green grass/trees as possible.
- Post public meetings well in advance – 1 week prior to meeting date – posted today on newsbreak.
- Tribal entity collaboration.
- Robust communications (radio, cellular, land lines, amateur radio, mobile radio, etc.)
- ADA accommodations (ingress/egress, communications, etc.)
- Meeting room space (section heads, PIOs, media relations area, amateur radio, main EOC, switch-over rooms, etc.)
- Emergency Responders offices
- Training rooms for hosting AHIMT, EMI, Transportation Safety Institute, etc.
- Storage for equipment
- Outdoor functional exercise area
- PODs including medical needs, special needs, transportation, etc.
- I think the top of the building should blend with the environment so not black/gray geometric shapes, but more beige/gray like on rendering so it blends in w/ sand, rock, and mountains.

OTHER:

- Make sure wildlife not impacted greatly
- Just that the site is close to housing

AMENITIES:

- We see a lot of joggers on Geothermal/Tortugas Trail. A water fountain would be appreciated.
- Shaded benches
- Bathrooms
- Bike paths
