1. Introduction

On behalf of the City of Las Cruces (CLC), Daniel B. Stephens & Associates, Inc. (DBS&A) has prepared this Preliminary Engineering Report (PER) in accordance with guidance in Rural Utilities Service (RUS) Bulletin 1780-2, *Preliminary Engineering Report - Water Facilities*. This PER evaluates various technologies to remediate tetrachloroethylene (PCE) contamination found in CLC groundwater in the vicinity of supply wells CLC 18 and CLC 27 using a modified pump-and-treat strategy (Figure 1).

The PCE in the regional aquifer was initially detected in 1993, and subsequently, the impacted area was included on the National Priorities List (NPL) by the U.S. Environmental Protection Agency (EPA) as the Griggs and Walnut Ground Water Plume Superfund Site. In general, the site is delineated by the 5-microgram per liter ($\mu\text{g/L}$) contour of PCE in groundwater as shown on Figure 2. Both the remedial investigation (RI), which determined the nature and extent of contamination, and the feasibility study (FS), which evaluated remedial alternatives, were performed by CH2M HILL (2006b, 2006c). The FS includes a detailed cost evaluation of a number of remedial alternatives that were developed for the site in accordance with EPA guidance. Based on this evaluation, a remedial alternative was identified that met the EPA's criteria for implementation, including compliance with the Applicable Relevant and Appropriate Requirements (ARARs) and overall cost-effectiveness.

The findings and conclusions of previous evaluations of remediation alternatives provide the starting point for this PER. Specifically, the EPA Record of Decision (ROD), dated June 2007, reviewed the following alternatives:

- No action
- Groundwater extraction and blending
- Groundwater extraction and treating
- In-well air stripping

Figure 2

In developing these alternatives, EPA and CH2M HILL worked closely with the CLC and Doña Ana County (DAC), jointly acting as the Joint Superfund Project (JSP), to use to the extent possible existing wells and infrastructure as key elements within the remedy. Based on protection of human health, costs, and time to reach remediation goals, a modified groundwater extraction and treatment remedy was selected. Alternative groundwater treatment technologies that could be used in the PCE remedy were evaluated by DBS&A, as described in this PER.

Groundwater flow and solute transport modeling performed as part of the RI indicated that two existing CLC supply wells (CLC wells 18 and 27) would be sufficient to act as extraction wells for the groundwater pump and treat system (JSAI, 2009). The JSP recognizes that these wells were not designed as extraction wells and may require modification and/or later replacement prior to completion of the remedy. This PER presents DBS&A's evaluation of remedial system alternatives and proposals for a specific course of action to treat the groundwater from the wells to below the maximum contaminant level (MCL) for PCE and pump it to the Upper Griggs Reservoir, where it would be blended prior to distribution into the public water supply.

In addition to the FS (CH2M HILL, 2006c), this PER relies on information included in the *Technical Memorandum: Uranium and PCE Treatment - Phase 1 Evaluation of Treatment Technologies* (CH2M HILL, 2006a) and the *Technical Memorandum: PCE Treatment - Phase II Conceptual Design* (CH2M HILL, 2007). Although this PER focuses on PCE, throughout the CLC's monitoring of its water supply, naturally occurring uranium has been detected in several wells at concentrations exceeding the MCL. These wells are not currently being used as part of the water supply and uranium has never been detected in either of the proposed wells or within the footprint of the contaminant plume. Nonetheless, as a precaution the JSP has decided to leave space within the PCE treatment facility to provide treatment for uranium *in the event* that uranium is detected in the future.

Whereas the primary intent of the PER is to quantify the cost benefit associated with the construction of additional facilities (typically a well or pipeline), the scope of this PER is to detail the costs associated with compliance with a Unilateral Administrative Order prepared by the EPA and agreed to by the JSP to address groundwater contamination within the CLC. Expenditure of these monies is not anticipated to result in increased capacity of the system, but rather to reduce financial liabilities associated with the contaminant plume.

2. Project Planning Area

The project area is located in south-central New Mexico in the City of Las Cruces, within Doña Ana County (Figure 1). The area impacted by the distribution of the treated water coincides with the groundwater contamination plume. The area that will be directly impacted by construction of this project is located on or near East Griggs Avenue in Las Cruces (Figure 3). The project includes pumping contaminated groundwater from existing wells CLC 18 and CLC 27, treating the water to remove the PCE at a small facility built for that purpose, and piping the treated groundwater into the drinking water distribution system. Because of the amount of available space, the treatment plant for the impacted groundwater will be located at supply well CLC 18 (Section 5), which is located immediately to the north of the Doña Ana County Transportation Department (DACTD) maintenance facility. The project area also extends about 600 feet northeast of the DACTD maintenance facility to the location of CLC-27. The project area is shown on Figure 3.

For planning purposes, the populations considered in this project include the population within the plume boundary and within the City and County, because the treated water from this project will be supplied to the CLC drinking water system and the tax base charged for the cost of this project include both the City and Doña Ana County. These populations and growth trends are discussed in Section 2.3.

Facilities to be included within the project include conveyance piping from wells CLC 18 and CLC 27 to the treatment plant north of the maintenance yard, the treatment building itself, and a pipeline that will tie into an existing pipeline to convey the treated water to the Griggs Reservoir. The locations of these facilities are shown on Figure 4.

2.1 Location

The physical area impacted by this PER includes the location of wells CLC 18 and CLC 27, the existing DACTD maintenance facility (west of the intersection of East Griggs Avenue and Walnut Street), and the Upper Griggs Reservoir. These components, along with surrounding areas, are shown in Figure 4. Property boundaries for the CLC properties and adjacent

residential, commercial, and industrial areas are also shown on this figure. CLC water, sewer, and gas lines are shown on Figure 5. Figure 2 shows the approximate area of PCE impact to groundwater in 2007.

CLC 18 is located northwest of the intersection of East Griggs Avenue and North Walnut Street, between East Griggs and Hadley Avenue (on the north side of the DACTD maintenance facility). CLC 27 is located near the southeast corner of the East Griggs Avenue and North Walnut Street intersection. The Upper Griggs Reservoir is located at the intersection of East Griggs Avenue and North Triviz Drive. The total length of the planning area is approximately 3,400 feet from CLC 18 to the Upper Griggs Reservoir.

2.2 Environmental Resources Present

A separate Environmental Information Document has been prepared for the Las Cruces PCE Treatment project by Marron and Associates, Inc. Key environmental resources issues include:

- *Farmland, rangeland, and forestland:* The project area is located in a developed urban area in Las Cruces. Land uses in the project area are a mixture of urban land uses, including commercial, office, residential, industrial, and institutional (maintenance yard, water storage tank site). No farmland, rangeland, or forest land exists within the project area.
- *Floodplains and wetlands:* The project area is shown on two Federal Emergency Management Agency Flood Insurance Rate Maps, both dated April 9, 2007: 35013C1084G and 35013C1103G. On these floodplain maps, the project area is shown as being outside the 0.2 percent annual chance floodplain. No arroyos, streams, or wetlands are present within the project area.
- *Cultural resources:* A cultural resource survey report will be prepared and provided to the City of Las Cruces for submittal to the New Mexico State Historic Preservation Officer.

 SUPERFUND REMEDIATION PROJECT
 Utility Map**

S:\PROJECTS\ES09.0306 GRIGGS-WALNUT\GIS\MXDS\SITE MAPS\PROJECT AREA.MXD 904021

- *Threatened and endangered species:* To identify potentially occurring threatened, endangered, sensitive, or special-status species in the project area, species lists maintained by the U.S. Fish and Wildlife Service and the New Mexico Department of Game and Fish were consulted in conjunction with an assessment of the actual site conditions. It was determined that the existing habitat in the project area is highly disturbed and not suitable for any threatened or endangered species. No riparian habitat is present within or adjacent to the project area, and no designated critical habitat is located in the project area. The biological survey for the proposed project was completed with a finding of “no effect” to threatened or endangered species or other biological resources.
- *Archaeological, cultural, and historic resources:* A Class III pedestrian cultural resource survey was conducted in November 2009, and the Archaeological Management System records were examined to identify known cultural resources in the area. No previously recorded or newly discovered cultural resource sites were discerned within the project area. Most of the surveyed space is severely disturbed urban right-of-way or municipal yard. The area has been built up within the last 30 years, and none of the adjacent buildings within 100 feet of the area of potential effect are historic. The Doña Ana County pauper’s cemetery is located near the project area, outside the right-of-way, at the northwest corner of the intersection of Griggs and the unnamed street that extends north to the municipal yard. The proposed polyvinyl chloride (PVC) pipeline would be located on the opposite side of the pavement from the cemetery, and no impact is anticipated. Nonetheless, the cultural resource survey report recommends, subject to review and concurrence of the New Mexico Finance Authority and the State Historic Preservation Officer, that an archaeological monitor be present during excavation along the unnamed road in case unmarked graves are present within the project area.

2.3 Growth Areas and Population Trends

The 2000 census recorded a population of 74,267 for the CLC and a population of 174,682 for Doña Ana County. The QuickFacts census data from the U.S. Census website (<http://quickfacts.census.gov/qfd/index.html>) estimates the 2006 population for the City as

86,268 and the 2008 population for the County as 201,603. These populations reflect growth rates from April 1, 2000 to July 1, 2006 of 16.2 percent for the CLC and 15.4% for the County.

For planning purposes the CLC has chosen the high-growth population projection from the four population projections presented in the *City of Las Cruces 40-Year Water Development Plan* (JSAI, 2008a). Using this projection, the estimated populations for the City and County through 2030 are presented in Table 1.

Table 1. Population Projections for the City of Las Cruces and Doña Ana County

Year	City of Las Cruces	Dona Aña County
2010	98,154	205,387
2015	116,576	209,242
2020	138,456	213,169
2025	164,442	217,170
2030	195,306	221,253

The current resident population for the project area was calculated assuming that the project area is coincident with the groundwater contaminant plume (Figure 2) and multiplying the number of houses in the area times the per capita household for the CLC of 2.46 (U.S. Census Bureau, 2010). This yielded a population of 686 for the project area. The planned water treatment design capacity of this facility is 0.72 million gallons per day (mgd). The planned water production of this facility is 0.43 mgd, which would provide water to support a population of approximately 2,000, assuming an average CLC daily per capita demand of 216 gallons per day (gpd) (CDM, 2008).

The zoning within the project area includes single and multi-dwelling residential, commercial, and industrial areas. The project building site is currently zoned M-2, Standard Industrial. Both the site and nearby properties are not expected to be rezoned in the near future.

Although this project puts water into the CLC distribution system, it is designed solely to remediate groundwater contamination and is not intended to support new users or increase the capacity of the CLC water distribution system. The project is designed to operate within current

water distribution system operation strategies; that is, when the Upper Griggs Reservoir volume falls below a specified value, the wells supporting the tank turn on and fill the tank. This project will continuously feed the tank, not to contribute additional flow to the system but rather to reduce the frequency with which other pumps in the system operate. Therefore, this project is not designed to respond to changes in population within the city, nor are new customers being served by the project.

3. Existing Facilities

3.1 Location Map

The existing facilities are shown in Figure 4 and consist of groundwater supply wells CLC 18 and CLC 27 (CLC 19 is also shown on the figure but is not a part of this project), 1,400 feet of 12-inch asbestos-cement (AC) water line, 2,000 feet of 24-inch AC water line, and a 3-million-gallon reservoir. The figure also shows approximately 1,500 feet of new 8-inch polyvinyl chloride (PVC) water line that will be used to transfer water from well CLC 27 to the treatment compound. There are no current treatment facilities.

3.2 History

In 1993, PCE was detected in CLC 21 and 27 (Figure 1) during routine sampling performed by the New Mexico Environment Department (NMED). In 2000, PCE was first detected in CLC 24 at slightly less than 1 $\mu\text{g/L}$. The site was added to EPA's National Priorities List (NPL) of Superfund sites on June 14, 2001. At the time of listing, four CLC wells (CLC 18, 19, 21, and 27) were known to be impacted by PCE contamination at concentrations above the MCL of 5 $\mu\text{g/L}$. The CLC and DAC signed a memorandum of understanding and formed the JSP in response to the EPA's Request to Fund (U.S. EPA, 2005). The RI and FS were performed by CH2M HILL under contract to the EPA (CH2M HILL, 2006b, 2006c).

Several investigations have been performed by the EPA's consultant between 2003 and 2006. Potential sources of PCE were investigated originally through the performance of shallow soil gas investigations as well as the installation of 10 groundwater monitoring wells (GMMW-01 through GMMW-10) that were constructed to collect samples from six discrete intervals in each well. These results were all summarized in the report titled *Identification of PCE Release Areas in the Vicinity of the Griggs and Walnut Ground Water Plume, Las Cruces, New Mexico* (CH2M HILL, 2003). Later work, including additional groundwater sampling and the installation of 5 additional multiport wells (GMMW-11 through GMMW-15), was summarized in the final RI report (CH2M HILL, 2006b). Table 2, reproduced from the ROD (U.S. EPA, 2007), summarizes all investigations performed at the Site to date.

Table 2. Summary of Investigation Activities
Page 1 of 2

Date	Event
June 1991	Samples from City of Las Cruces (CLC) Wells 18, 19, 21, and 27 were collected and analyzed for perchloroethylene (PCE) by the New Mexico Environment Department (NMED) Drinking Water Bureau (DWB). PCE was not detected; the analytical quantitation limit was 1.0 micrograms per liter ($\mu\text{g/L}$).
August 8, 1993	PCE was detected in CLC Wells No. 21 and CLC Well No. 27 in samples collected by the NMED DWB, the first sampling event performed under the Safe Drinking Water Act (SDWA) requirements adding PCE to the list of drinking water contaminants. PCE was detected in CLC Well No. 21 at a concentration of 1.4 $\mu\text{g/L}$ and CLC Well No. 27 at a concentration of 0.9 $\mu\text{g/L}$. This was the first detection of PCE in CLC supply wells. Results were below the maximum contaminant level (MCL) of 5 $\mu\text{g/L}$.
January 10, 1995	PCE was detected in CLC Well No. 18 in a sample collected by the NMED DWB. This was the first detection of PCE in this well. The concentration of PCE was 32.0 $\mu\text{g/L}$.
February 22, 1995	CLC Well No. 18 was re-sampled, and the PCE result was 1.50 $\mu\text{g/L}$.
January 9, 1996	In a sample collected by NMED DWB from CLC Well No. 18, PCE was again detected above the MCL, at a concentration of 6.4 $\mu\text{g/L}$ (results for subsequent samples collected in February, April, May, and July 1996 were all below the MCL).
September 26, 1996	CLC Well No. 18 was removed by the CLC from the municipal drinking water distribution system (mechanical difficulties were reported).
May to October 1997	NMED Superfund Oversight Program performed a Preliminary Assessment for the GWP site. In October 30, 1997, NMED issued a report for the Griggs and Walnut Ground Water Plume (GWP) site entitled <i>Preliminary Assessment, Las Cruces PCE, Doña Ana County, New Mexico</i> . The report states that the threat to human health and the environment due to the PCE detected at CLC Well No. 18 is likely to be significant via the groundwater pathway.
June 1997	An underground storage tank (UST) investigation was initiated at the Doña Ana County Transportation Department (DACTD) maintenance facility on East Griggs Avenue. This investigation was conducted in response to a fuel spill associated with underground fuel storage tanks located at the facility.
February 1998 through July 2000	NMED performed a Focused Site Inspection for the Site. The work plan was dated February 6, 1998, and the last sampling event under this investigation was conducted in July 2000.
September 23, 1997	A UST investigation was initiated at the Gas Card site located on North Solano Drive, to the west of the GWP site, to address a petroleum release unrelated to the GWP site.
February and March 1998	Additional UST investigation work was conducted at the DACTD maintenance facility to determine the extent of the fuel spill detected during the first UST investigation initiated in June 1997. NMED participated in this investigation as part of the GWP site Focused Site Inspection (in part by collecting additional samples for analysis of PCE).
April 1998	EPA issued a Superfund Site Strategy Recommendation for the Site that recommends that the NMED complete a Focused Site Inspection.
May 1998	The NMED sampled the Gas Card Site monitor well. PCE was detected for the first time in this monitor well at a concentration of 15.0 $\mu\text{g/L}$.
July 1999	NMED conducted a soil vapor survey at the DACTD maintenance facility as part of the Focused Site Inspection for the GWP site.
February and June 2000	NMED installed 10 monitoring wells in the vicinity of the Site to determine extent of contamination and to identify potential sources associated with the Site

Source: Reproduced from Table 2-1 of the Record of Decision (U.S. EPA, 2007).

Table 2. Summary of Investigation Activities
Page 2 of 2

Date	Event
June 6, 2000	PCE first detected in CLC Well No. 24, at a concentration of 0.90 µg/L (less than the MCL).
November 2000	EPA prepares the Hazard Ranking System (HRS) scoring documentation for the Site under CERCLA.
January 11, 2001	The Site is proposed for inclusion on the Superfund National Priorities List
March 21, 2001	A UST risk assessment investigation was conducted at the Circle K northwest of the GWP site. Because of the GWP site PCE detections in the vicinity, the Circle K monitor wells were sampled for PCE in addition to petroleum constituents; PCE is not detected in any of the samples
May 2001	The NMED DWB begins monthly sampling of PCE-affected CLC drinking water supply wells. Monthly sampling of the PCE-affected wells continued until July 2003.
June 14, 2001	The Site listing on the NPL becomes final.
September 2001	CLC Well No. 27 is removed from the drinking water supply distribution system due to increases in the PCE concentration (up to 4.90 µg/L at that time).
April 29, 2002	EPA initiates the first mobilization field work for the GWP Remedial Investigation (RI) process under Superfund.
June 2002	CLC begins pumping of CLC Well Nos. 18 and 27 to provide some measure of plume control with the goal of preventing further migration of PCE toward CLC Well Nos. 19 and 21
July 2002	CLC submits a blending plan to the NMED DWB for CLC Well No. 21. The plan is designed to maintain PCE concentrations in drinking water from the Upper Griggs Reservoir below drinking water standards.
September 24, 2002	NMED DWB approves the final blending plan.
February 2003	Field work for the first mobilization of the RI is completed.
October 2003	The NMED DWB begins quarterly sampling of PCE-affected CLC drinking water supply wells.
November 2003	EPA issues the report <i>Identification of PCE Release Areas in the Vicinity of the Griggs and Walnut Ground Water Plume</i> documenting the results of the first field mobilization.
January 2004	EPA performs comprehensive groundwater sampling event to document current condition and changes at the Site.
April 2005	A settlement agreement between the EPA, CLC, and Doña Ana County (DAC) is signed. A Technical Activities Work Group is formed between the EPA, CLC, DAC, and NMED to provide a forum for stakeholder input into the RI/FS process for the site.
July 2005	CLC Well No. 19 taken out of service due to mechanical problems.
July 21, 2005	The Technical Activities Work Group meets and finalizes the scope of the RI/FS for the site.
October 17, 2005	Field activities for second field mobilization of the RI begin.
December 27, 2005	2005 RI for the second field mobilization activities is completed.
November 21, 2005	2006 RI/FS completed and released.
December 4, 2006	Jan. 5 2007 Public comment period on proposed plan
December 7, 2006	Public meeting on proposed plan

Source: Reproduced from Table 2-1 of the Record of Decision (U.S. EPA, 2007).

By the time the RI report was finalized in 2005, groundwater samples had been collected from all of the groundwater monitoring wells at least twice. While these RI-related sampling activities were ongoing, the CLC was collecting and analyzing water samples from its city wells on a monthly basis. Figure 6, which presents time-series plots for PCE in supply wells CLC 18 and CLC 27, indicates a high level of variability of the measured PCE concentrations. Table 3 summarizes the PCE concentrations detected in supply wells CLC 18 and CLC 27; additional water quality results are included in Appendix A.

Table 3. Summary of PCE Concentrations in Supply Wells CLC 18 and CLC 27

Statistic	PCE Concentration ($\mu\text{g/L}$)	
	Well CLC 18	Well CLC 27
Maximum	50.2	7.8
Minimum	14.0	3.8
Average	32.2	5.2

Source: Summarized from Table A-2, Technical Memorandum, June 2006

As part of the ongoing negotiations between the JSP and EPA, it was agreed that the groundwater modeling for the site would be performed by JSAI, owing to their experience performing all water supply modeling for the CLC. The groundwater model prepared by JSAI was included as an appendix to the RI (CH2M HILL, 2006b).

Throughout the development of the RI and the subsequent FS, the JSP continued to raise the point to the EPA that the ultimate remedy for the site would likely not require extracting groundwater from the entire saturated thickness of the aquifer and that cleanup could be effected more expeditiously and economically by treating groundwater that was extracted from a smaller portion of the aquifer. EPA was receptive to this interpretation, but was unable to reconcile the FS with a lower pumping rate.

The Proposed Plan (U.S. EPA, 2006) and the ROD, issued by EPA on June 14, 2007 (U.S. EPA, 2007), set forth the selected remedy for the site, which involves actions to address contaminated groundwater and be protective of human health and the environment. Although the FS based its cost on an assumed pumping of the entire aquifer at a rate of approximately

GRIGGS-WALNUT PLUME
SUPERFUND REMEDIATION PROJECT
Measured PCE Concentrations in Wells CLC 18 and CLC 27

1,050 gallons per minute (gpm) (essentially the design capacity for the two extraction wells, CLC 18 and 27), the ROD (U.S. EPA, 2007) stated that:

Under this Selected Remedy, CLC municipal supply wells Nos. 18 and 27 will maximize their pumping capacity and flow rates, while remaining within their current design capacity. The ground water model was used to help determine the best way to optimize extraction of contaminated water and obtain plume containment. Targeted pumping will be used to extract ground water from CLC wells and will be modified most likely, by screening across the vertical layers of the aquifer that have the highest contaminant concentration.

Based on additional groundwater modeling performed by JSAI, an extraction rate of between 250 and 300 gpm was determined to be optimal (JSAI, 2009).

3.3 Condition of Facilities

The major existing system components and their construction properties to be used with the treatment system are presented in Table 4.

Table 4. Selected Facility Construction Properties

Component	Date Installed	Size	Length	Condition
Well CLC 18	September 1951	16-inch	NA	Moderate to heavy encrustation, partially collapsed
Well CLC 27	March 1971	14-inch	NA	Perforated interval too deep for plume capture, casing in poor condition
Upper Griggs Reservoir	June 1962	3 million gallon	NA	Serviceable
AC distribution line	November 1961	12-inch	1,400	Serviceable
AC transmission line	November 1985	24-inch	2,400	Serviceable

NA = Not applicable

AC = Asbestos-cement

The existing reservoir and water lines shown in Figure 4 are in serviceable condition and are expected to remain serviceable for the near future. Relevant declarations and applications for CLC 18 and 27 are included in Appendix B. CLC 18 has moderate to heavy encrustations on

the casing and perforations, and at 545 feet below ground surface (bgs), the casing has collapsed and filled with sediment. The well casing in CLC 27 is in poor condition and is not screened over the ideal interval to optimize the extraction of contaminated groundwater (JSAI, 2009).

3.4 Financial Status of Any Existing Facilities

RUS guidance details the manner in which the financial value of a project is calculated. For the Griggs-Walnut project, the financial value that a project provides is calculated differently. Execution of this project is required under a Unilateral Administrative Order requiring that cleanup be performed by the JSP to ensure that drinking water being provided to the residents does not contain PCE above MCLs. Details of the CLC's financial status are provided in the City of Las Cruces Comprehensive Annual Financial Report (CAFR), dated June 30, 2009, a copy of which is provided in Appendix C. Note 10 (page 89) within the CAFR specifically addresses the CLC's plan to cover their obligation regarding the remediation, which is listed in the note as \$6,890,106.

The information required by RUS Bulletin 1780-2 regarding the financial status of existing facilities is summarized in Table 5 and provided in Appendix C. Because DAC is a cost sharing partner, the *2009 DAC Financial Statements and Supplementary Information* is also included in Appendix C. However, DAC is excluded from Table 5 as they do not operate the water distribution system.

Table 5. RUS Required Information

RUS Bulletin 1780-2 Required Information	Location of Information in Appendix C
Current rate schedules	CLC Utilities Department Rates Summary
Annual operation and maintenance costs	CLC CAFR (p. 255)
Other capital improvement projects	CLC CAFR Notes 4 (pp. 67-71) and 16 (p. 97)
Tabulation of users by monthly usage category for the most recent fiscal year	CLC CAFR Note 7 (p. 83)
Status of existing debt and required reserve amounts	CLC CAFR Note 7 (pp. 75-85)

4. Need for Project

4.1 Health, Sanitation, and Security

The project is crucial to the overall protection of the CLC drinking water supply from impacts associated with exposure to PCE. EPA summarized the risks associated with exposure to PCE in its Proposed Plan (U.S. EPA, 2006):

PCE is a chlorinated solvent that is often associated with dry cleaners or metal degreasing activities. If PCE is released to soil, it will evaporate into the atmosphere, but at higher concentrations, it will leach into the ground water. Human exposure to PCE can occur through inhalation of contaminated air and through ingestion of contaminated drinking water. When concentrations in air are high, such as in closed, poorly ventilated areas, single exposures can cause dizziness, headache, sleepiness, confusion, nausea, difficulty in speaking and walking, unconsciousness, or death. Skin and eye irritation can result from direct contact with PCE. Repeated or extended skin exposure can cause chemical burns. Ingestion of PCE at high concentrations generally causes symptoms similar to those from inhalation, but could lead to more severe nausea and vomiting reactions. Prolonged exposure to PCE can damage the central nervous system, cardiovascular and reproductive systems.

Because of the presence of PCE in water supply wells CLC 18, 19, 21, and 27, these wells have essentially been disconnected from the CLC water supply. This removal, in conjunction with the removal of other wells as a result of background concentrations of naturally occurring metals, has resulted in a decrease in the overall water supply, necessitating that the City change its groundwater pumping strategy to accommodate any shortfalls. Accordingly, the CLC and DAC, through the JSP, have developed a plan for a remedy that addresses the contaminated groundwater and is protective of human health and the environment.

4.2 System Operation and Maintenance

This treatment system will be maintained by the City of Las Cruces Utilities Department as part of the drinking water supply system. The technical capability and required certification (NMED Drinking Water Bureau WS4) for system operation and maintenance (O&M) exists within the

department, and it is anticipated that this facility will be maintained by a CLC employee. The O&M will consist of general upkeep and maintenance for the two extraction wells, maintenance of the treatment building and grounds, operation of the treatment train, and monitoring water quality for compliance with the MCL of 5 µg/L. Water sampling will require a certified water sample technician 2 (WST2), which the CLC employs.

4.3 Growth

The possibility of future expansion will be included in the design to accommodate future increases in groundwater pumping and to allow space for optional uranium removal. Analysis to date has determined that a pumping rate of 200 to 300 gallons per minute (gpm) will hydraulically contain the PCE plume; however, the current system will be sized to accommodate a total hydraulic flow of 500 gpm to allow for an increased treatment flow rate in the future, if determined to be necessary.

5. Alternatives Considered

As stated in Section 3.2, although the cost estimating used in preparing the FS (CH2M HILL 2006c) assumed a pumping rate of 1,050 gpm, the EPA recognized in the ROD (U.S. EPA, 2007) that the JSP intended to perform focused pumping in order to minimize treatment volumes while optimizing cleanup times. Based on solute transport modeling and hydrogeological analysis (JSAI, 2006, 2008b, 2009), the current sites of supply wells CLC 18 and CLC 27 are appropriate locations for extraction wells. Furthermore an extraction rate on the order of 250 gpm is appropriate (JSAI, 2009). This is consistent with the selected remedy set forth in the Proposed Plan (U.S. EPA, 2006) and the ROD (U.S. EPA, 2007).

The solute transport modeling performed for the Site used MODFLOW and related packages, including River and Drain, General Head Boundary, Well, and Recharge (JSAI, 2006), and was, in effect a telescoping down of a regional model for the site that was also prepared by JSAI. The solute transport model has been updated several times since the FS, as more data became available and as hydraulic gradients decreased as a result of other city wells being taken out of service. The most recent technical memorandum on the model (JSAI, 2009) stated:

Model-simulated pumping from City Wells 18 and 27, at 100 to 150 gallons per minutes (gpm) each, results in PCE plume capture and containment. Model results indicate clean up will be achieved within 20 years by pumping a total of 200 to 300 gpm.

Although the extraction scenario (i.e., which wells would be pumped) was set in the EPA ROD and Proposed Plan (U.S. EPA, 2007, 2006), the final treatment alternative was not determined. The possible treatment alternatives to be considered are:

- Alternative 1: Groundwater treatment at each wellhead
- Alternative 2: Groundwater treatment of both wells at one wellhead
- Alternative 3: Groundwater treatment of both wells at a centralized location

Each of the alternatives includes pumping the treated water into the potable distribution system, where it is blended with uncontaminated groundwater at the existing Upper Griggs Reservoir.

All alternatives will require the construction of new facilities, as there are no existing facilities in the area for treatment of the groundwater for PCE removal.

Existing well CLC 27 is located within a parking lot with insufficient space to construct either a single wellhead treatment facility (Alternative 1) or a larger facility where water from both facilities could be treated (Alternative 2) (Figure 3). Implementation of Alternative 3 would require the acquisition of new property in the vicinity of both the wells and reservoir. DAC owns sufficient property to implement Alternative 2 at the CLC 18 well location. Additionally, application of Alternative 2 at this location will result in the smallest amount of conveyance piping being required and will thus be the most cost-effective (especially when considering that no additional property will need to be purchased). Given these project constraints, the CLC 18 location is the most viable project location.

The following treatment process alternatives were evaluated for PCE removal at CLC 18:

- Air stripping
- Liquid-phase granular activated carbon (GAC) adsorption
- Advanced oxidation process (AOP)

The common components for each alternative technology include:

- New treatment facility at CLC 18
- New 8-inch pipeline from CLC 27 to the CLC 18 treatment facility
- Connection to the distribution system from the CLC 18 treatment facility

The technologies evaluated, along with the necessary facilities, are described in Sections 5.1 through 5.3.

5.1 Air Stripping

Air stripping has been used successfully in many applications to remove a volatile organic compound (VOC), such as PCE, from groundwater. The process operates by partitioning the

VOC from liquid to vapor phases through mass transfer processes governed by diffusion, and the efficiency of the process is greatly increased by increasing the surface area of the source water that is exposed to air. As codified in the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA 121(e) [42 USC 9621(e)]), an air permit will not be required, though the substantive requirements regarding emission rates must be met. Because of the low concentrations of PCE expected in the influent to be treated, these standards are unlikely to be exceeded, and though included in the cost estimate, carbon polishing is unlikely.

The Henry's Law constant for each VOC, a measure of the extent to which a compound will transfer from a liquid phase to a vapor phase, is used to evaluate whether air stripping will be effective. A higher Henry's Law constant indicates that a compound will more readily transfer to a vapor phase rather than remain in water. Generally, organic compounds with Henry's Law constants greater than 0.01 (unitless) are considered amenable to air stripping. Henry's constants generally vary by source and, for PCE at a temperature of 18°C (assumed groundwater temperature), range between 0.49 and 0.52 (unitless) (U.S. EPA, 2009a), indicating that PCE is a candidate for removal by air stripping.

A concern with most air stripping methods is fouling. Fouling can decrease the performance and efficiency of the air stripping process and can occur when metals are oxidized or scale is produced from hardness. When metals (e.g., iron and manganese) are oxidized, particulates can form that plug the process flow. This typically becomes a concern when iron and manganese concentrations exceed 30 milligrams per liter (mg/L).

Water quality data from May 2009 (Appendix A; Terracon, 2009) indicate that iron concentrations were highest in CLC 18 (0.4 mg/L) and below the laboratory detection limit in CLC 27. Manganese was highest in CLC 27 (0.037 mg/L) and below the laboratory detection limit in CLC 18 (Appendix A). Therefore, fouling of the process from metals oxidation is not expected to be a significant problem.

When hardness elements (e.g., calcium, magnesium, and other salts) precipitate out of solution, the scale products can obstruct the passage of air through the process. If this type of fouling

occurs, pretreatment methods can be used to minimize scale buildup. Available pretreatment methods include:

- Precipitate hardness elements out of solution and remove them prior to air stripping.
- Add an acid to suppress the pH prior to air stripping to prevent hardness elements from precipitating out of solution.
- Add sequestering agents prior to air stripping to prevent hardness elements from precipitating out of solution.

An alternative to using pretreatment methods to minimize scale buildup is to periodically clean the air stripper. However, some air stripping processes, such as low-profile air strippers with removable trays, are more easily cleaned than others. If post-treatment of the PCE is required after air stripping, a vapor-phase GAC adsorption system can be implemented to mitigate the potential for releasing PCE gas into the atmosphere.

Packed tower aeration (PTA) and low-profile tray aeration methods of air stripping were evaluated for PCE removal in this application and are discussed in Sections 5.1.1 and 5.1.2.

5.1.1 Packed Tower Aeration

PTA is listed as a best available technology (BAT) for PCE removal by the U.S. EPA (2009b). PTA operates by spraying source water through a spray nozzle located at the top of a tower that contains a specially designed packing material. As the water descends through the packing, air is forced up through the column, stripping off the volatile compounds. The packing within the tower breaks up the water droplets and increases the surface area of the source water that is exposed to air. The increased surface area increases the efficiency of contaminant mass (PCE) transfer by diffusion from the liquid phase to the vapor phase. A sump at the bottom of the tower collects the treated water. Figure 7 illustrates the PTA process.

The packing material of a PTA system can be difficult to clean if fouling occurs from oxidized metals or scaling. The packing is cleaned by pumping an acidic solution through the tower to wash the media. The spent acid solution must be handled and disposed of as a hazardous

3/11/10

Figure 7

waste. If excessive fouling occurs, the packing may need to be removed manually and cleaned or replaced with new material. The towers of a PTA process, which generally range in diameter from 3 to 13 feet and in height from 10 to 40 feet, make this alternative more visible to the public than other air stripping methods, such as low-profile tray aeration. The excessive tower size would limit the viability of this treatment alternative if negative public feedback is received.

Relative to other more advanced air stripping treatment methods, such as low-profile tray aeration, PTA operates under the same principles, would require more resource-intensive installation and O&M, and could be an unattractive option to the public. Therefore, PTA was not considered for additional evaluation or compared with other viable treatment processes with respect to cost.

5.1.2 Low-Profile Tray Aeration

Low-profile tray aeration is a treatment process that is also effective at removing PCE from groundwater, potentially achieving removal rates in excess of 99 percent. Low-profile tray aeration operates by forcing counter-current air through horizontally extended trays to transfer VOCs, such as PCE, from the water to the air. Contaminated water is sprayed into an inlet chamber through a coarse mist spray nozzle at the top of the low-profile air stripping unit. The water flows over a distribution weir and horizontally along each tray at the same time that clean air is blown up through holes in each tray from the bottom of the unit. The air and water mixture forms a froth of bubbles, which increases surface area contact between the liquid and vapor phases, resulting in an increase in mass transfer of VOCs by diffusion. Figure 8 depicts the low-profile tray aeration process.

The stripped vapors flow out the top of the unit for discharge to the atmosphere or collection and additional treatment, depending on the air emission concentrations and local air permit requirements. The water flows down through the holes in the trays, where it is collected in a pump and pumped to a storage tank prior to conveyance to the distribution system. A certain contact or residence time is required to volatilize the VOC and varies according to the contaminant concentrations as well as process flow rates. Residence times are increased by either adding additional trays over which the contaminated water is run or increasing the size of the unit.

Figure 8

P:_ES09-306\Griggs-Walnut PER-3-10\Figures\Fig 8_Low-profile tray.doc

The trays of a tray aeration system are removable for cleaning if fouling occurs. The trays can be cleaned using a washing wand, pressure washer, or automated acid-wash system. Another alternative is to have spare trays that can be exchanged for used trays that require cleaning. The fouled trays can be cleaned by operations staff as time permits without extended system down times.

The tray aeration process has some advantages over other types of air strippers such as PTA, including:

- It has a lower profile than PTA.
- The process is simple and requires less maintenance.
- Packing is not required as in PTA.
- Noisy high-pressure blowers are not required.
- Fouling can be managed by maintaining and cleaning trays.

For these reasons, low-profile tray aeration was considered for additional evaluation and compared with other viable treatment processes with respect to cost.

5.2 Liquid-Phase GAC Adsorption

Liquid-phase GAC adsorption is a treatment process that can effectively remove PCE from groundwater and is listed by the U.S. EPA as a BAT for PCE removal (U.S. EPA, 2009b). Liquid-phase GAC adsorption operates by pumping groundwater through one or more vessels containing GAC media (Figure 9). The activated carbon attracts and adsorbs organic molecules, such as PCE, as well as certain metal and inorganic molecules. The dissolved PCE molecules adsorb onto the surfaces of the activated carbon due to the porosity and large internal surface area of the media. Water is passed through the vessels relatively quickly. When the concentration of PCE in the water exiting the vessels exceeds a certain level, the carbon must be replaced. Spent carbon can be regenerated in place, removed and regenerated at an off-site facility, or removed and disposed.

Liquid-phase GAC adsorption was considered for additional evaluation and compared with other viable treatment processes with respect to cost.

5.3 Advanced Oxidation Process

An AOP that uses ozone and hydrogen peroxide can effectively remove VOCs, including PCE, from groundwater. However, the process is more suited to treat contaminated water sources with recalcitrant contaminants that are difficult to remove. The AOP operates by mixing ozone (generated on-site using ozone generators) and hydrogen peroxide together in a reaction chamber to form hydroxyl radicals. The hydroxyl radical is a strong and short-lived oxidizing agent. The oxidizer is injected into the source water stream at numerous locations and PCE is oxidized. In this application, the most likely byproducts of PCE oxidation include chloride, carbon dioxide gas, and water. Figure 10 provides a schematic of an AOP system.

Unfortunately, ozone can react with other compounds in the source water to produce unwanted byproducts, including bromate, by reaction with natural organic matter and inorganic bromide. Bromate is classified as a “probable human carcinogen” (U.S. EPA, 1998), and its production from the AOP process must therefore be monitored to ensure that effluent concentrations remain below the MCL of 10 µg/L. Bromate formation is typically controlled by the amount and relative location of the ozone and peroxide injection in the reactor of the AOP process. Bromate formation can also be controlled by lowering the pH of the source water or by the addition of ammonia; however, pH depression would require additional on-site chemical usage, and some studies do not show a significant reduction in bromate formation following ammonia addition (MWH, 2005).

Nevertheless, an AOP is a potentially viable method for removing PCE from the groundwater supply. For this reason, AOP was considered for additional evaluation and compared with other viable treatment processes with respect to cost.

Source: MWH, 2005, Figure 8-10

6. PCE Residuals Management

Numerous federal and state regulations govern the disposal of wastes containing PCE. It is important to understand these regulations to properly classify and dispose of PCE wastes in order to minimize danger to public health and safety. The PCE wastes generated from this application are likely to be one or more of the following:

- Contaminated air from an air stripping process, such as low-profile tray aeration
- Contaminated GAC from a vapor-phase GAC adsorption process
- Contaminated GAC from a liquid-phase GAC adsorption process

Concentrations of contaminants in emissions must meet various federal and state regulations, and a solid waste containing PCE must meet federal and state solid waste and hazardous waste disposal standards. The standards and requirements for each of these waste streams are presented in Sections 6.1 and 6.2.

6.1 Air Emissions

Air stripping processes, such as low-profile tray aeration, remove dissolved PCE from source water by mass transfer through diffusion processes from the liquid to the vapor phase. Air contaminated with PCE can be discharged to the atmosphere if it meets the criteria of certain federal and state regulations. If the contaminated air does not meet these regulations, additional treatment, such as vapor-phase GAC adsorption, may be required.

The NMED Air Quality Bureau (AQB) is responsible for authorizing and permitting the emission of regulated air pollutants from a source that is either newly constructed or modified. NMED regulates air quality permits for constructed or modified sources under 20.2.72.200(A) NMAC. This regulation requires a permit or a notice of intent for any source that emits greater than 10 pounds per hour and 10 tons per year of any regulated contaminant.

Because the Griggs and Walnut Plume is a Superfund Site, however, a permit with the NMED AQB is not required, although permitted emission standards must be met. In order to receive a No Permit Required (NPR) designation, typically emissions must be below both of these thresholds and a letter must be written to the AQB providing details of the application and estimated pollutant production. The calculated maximum emission rates for this project of 0.013 pounds per hour and 0.05 tons per year (Appendix D) qualify the project for NPR designation.

6.2 Vapor-Phase GAC Adsorption

If treatment of the air stream is required, vapor-phase GAC adsorption is a treatment process that can effectively remove PCE from air after a stripping process. The process is listed by the U.S. EPA as a BAT for PCE removal from air (U.S. EPA, 2009b). This process may be required, either by the NMED AQB or the CLC, for post-treatment of the PCE once it is removed from the source water. Vapor-phase GAC adsorption operates by passing contaminated air through one or more vessels containing GAC media. The carbon activation process, generally a thermal process, results in small porous particles with large internal surface area. Organic molecules, such as PCE, adsorb onto the surfaces of the activated carbon.

When the concentration of PCE in the vapor exiting the vessels exceeds a pre-determined level, the carbon must be replaced. Spent carbon can be regenerated in place, removed and regenerated at an off-site facility, or removed and disposed.

Vapor-phase GAC adsorption does not require additional evaluation because it is the preferred method for removing PCE from air. While either the NMED or CLC could require this additional treatment, neither entity is anticipated to request it because the calculated emissions (Appendix D) are an order of magnitude lower than the AQB permit standards. If at some point during the project the emissions exceed NMED standards, GAC adsorption will need to be incorporated.

6.3 Solid Waste Disposal

Determination of whether the solid waste produced in this application would be classified as hazardous waste would govern whether GAC media contaminated with PCE can be disposed of in a municipal solid waste or hazardous waste facility. NMED establishes regulations for hazardous waste management under 20.4.1 NMAC. This regulation adopts the U.S. EPA regulations of 40 CFR 260 through 268. PCE is listed as a hazardous waste in 40 CFR 261; however, the solid waste produced in this application will have both solid waste and hazardous waste components. Therefore, it is likely that the toxicity characteristic leaching procedure (TCLP) test, developed by the U.S. EPA, would be required to determine the toxicity characteristic of the solid waste as defined in 40 CFR 261.24. The waste exhibits the characteristic of toxicity if this testing procedure indicates that the solid waste has a PCE concentration greater than 0.7 mg/L. Once the waste classification is determined, the GAC contaminated with PCE can be disposed of at an authorized solid waste or a hazardous waste facility. Federal and state regulations involving disposal and transportation of such waste must be identified and followed.

Whether the CLC will own the GAC (if it is used) or work with a supplier that would provide the unused GAC and manage the spent GAC has not been determined. A GAC supplier tests the media prior to disposal to determine if it is a hazardous waste and also to determine if the GAC can be reactivated for other uses. GAC suppliers do not generally reactivate media used for drinking water treatment, due to the presence of trace amounts of contaminants, but instead recommend replacing spent media with new GAC media. Using a GAC supplier would minimize efforts by the City to determine waste classification and meet waste disposal and transport regulations.

7. Selection of a Recommended Alternative

Various treatment alternatives were evaluated to determine the viability of each technology for removing PCE from the selected groundwater wells. The alternatives included:

- Alternative 1: Low-profile tray aeration air stripping, with or without an acid-based pre-treatment for the source water stream
- Alternative 2: Liquid-phase GAC adsorption
- Alternative 3: Advanced oxidation process (AOP)

The evaluation was based on both monetary and non-monetary criteria and included:

- Cost comparison of PCE treatment alternatives
- Ease of operation
- PCE removal efficiency and risk to potable water supply
- Sustainability of disposal method
- Implementability

For each alternative, each of the monetary and non-monetary criteria was given a rating from 1 to 4, with 4 being the best. In addition, each criterion was weighted from 1 to 5 according to its importance relative to the other criteria, with 5 being the most important criterion to the project. The rationale for the weighting of the criteria is provided in Table 6.

After each criterion was rated and multiplied by the weighting factor, the resulting values were summed for each of the alternatives. The results of the evaluation are presented in Table 7; Sections 7.1 through 7.5 discuss the details of each criterion with respect to each alternative.

Table 6. Rationale for Criteria Weighting

Evaluation Criterion	Assigned Weight	Rationale
Cost	5	Limited available resources make cost an important factor
Ease of Operation	5	Ease of operation will require less operator time, significantly decreasing future O&M costs
PCE removal efficiency	4	The highest removal rate is important due to the end placement of the treated water into the drinking water distribution system.
Sustainability of disposal method	4	The cost and environmental impact of residuals is an important factor over the life of the treatment system.
Implementability	3	The ease of implementation is an important factor in construction costs.

Table 7. Results of Alternatives Evaluation

Criterion	Weighting Factor (1 to 5)	Alternative 1: Low-Profile Tray Aeration				Alternative 2: Liquid GAC		Alternative 3: AOP

7.1 Cost Comparison of PCE Treatment Alternatives (Weight 5)

The cost analysis for these alternatives is for comparison purposes only and is not intended to reflect a true construction cost estimate. Appendix E provides a detailed cost analysis for the various alternatives; Table 8 summarizes the findings.

Table 8. Cost Comparison of Treatment Technology Alternatives

Alternative	Treatment Type	Comparative Costs (million \$)			Annual Cost of Water ^b (\$/1,000 gal)	
		Construction	O&M			
			Annual	Present Worth ^a		Total Present Worth
1	Low-profile tray aeration					
	With Acid	5.91	0.60	8.98	14.89	3.33
	Without Acid	4.75	0.40	5.98	10.73	2.40
2	Liquid-Phase GAC	5.28	0.37	5.48	10.77	2.41
3	AOP	6.38	0.44	6.63	13.01	2.91

^a Present worth analysis conducted using a 2.9% interest rate and a life cycle of 20 years, in accordance with page 6 of Bulletin 1780-2 from the United States Department of Agriculture Rural Utility Service regarding Preliminary Engineering Reports for Water Facilities.

^b Annual cost of water assumes a 20-year life cycle, 85% up-time running at 500 gpm.

The electrical power requirements for each alternative were considered for this analysis and are included in the O&M cost. Electrical power requirements are generally the highest for the AOP technology (Alternative 3), due to ozone generation equipment required. The next highest is aeration, due to blower requirements; the lowest electrical costs are associated with the GAC (Alternative 2).

A total comparative present worth for each alternative was evaluated, including both capital costs required to install each alternative and O&M costs for a period of 20 years. These costs were then translated to a cost per 1,000 gallons for treatment. Higher rankings were assigned to lower cost-per-gallon technologies. Based on the total comparative present worth for each alternative (Table 8), a rating of 4 was given to Alternative 2 (liquid GAC treatment) and a rating of 3 was given to Alternative 3 (AOP). Alternative 1, low-profile tray aeration with and without acid-based pre-treatment, was given ratings of 2 and 4, respectively.

7.2 Ease of Operation (Weight 5)

The factors used to define the ease of operation are:

- The number of operators required to operate the system on a daily basis

- The number of operators needed to perform periodic maintenance
- The frequency of periodic maintenance
- The technical knowledge level required to operate the system
- The number, type, and hazards of ancillary equipment or chemicals

The ratings based on these factors are as follows:

- The AOP requires the highest operator technical knowledge level, and the hazards associated with ancillary equipment and chemicals are greater; thus this alternative was assigned a rating of 2.
- Liquid GAC (Alternative 2) also requires a high operator technical knowledge level and requires frequent periodic maintenance, including additional plumbing, pumps, and tanks for backwash cycles; therefore, it was assigned a rating of 3.
- Trays used for low-profile tray aeration (Alternative 1) can be removed, generally by a single operator standing on the floor, and cleaned using a washing wand or pressure washer. This technology generally requires the least periodic maintenance; however, chemicals required for the acid-based pre-treatment require assignment of a lower rating. Alternative 1, with and without acid-based pre-treatment, was assigned ratings of 3 and 4, respectively.

7.3 PCE Removal Efficiency and Risk to Potable Water Supply (Weight 4)

All three alternatives can theoretically remove greater than 99 percent of the VOCs from the water; however, the highest removal rates will be accomplished with low-profile tray aeration (Alternative 1) and the GAC treatment system (Alternative 2). These two technologies can typically achieve concentrations below detection limits for highly volatile contaminants such as PCE. The AOP may not achieve these lower concentrations in finished water. Low-profile tray aeration has the lowest risk of discharging contaminated water to the potable distribution system. Contaminant breakthrough could occur in the GAC, which would not result in an

automatic treatment system shutdown based on controls, but could theoretically result in the discharge of PCE in the finished water. If bromide is present in the groundwater, AOP could discharge bromate, an oxidation byproduct. Therefore, Alternative 1, low-profile tray aeration both with and without acid-based pre-treatment, was assigned a rating of 4; Alternatives 2 and 3, GAC and AOP respectively, were assigned a rating of 3.

7.4 Sustainability of Disposal Method (Weight 4)

The AOP technology (Alternative 3) does not result in the generation of residuals or waste streams that will require treatment or disposal. Low-profile tray aeration, Alternative 1, may require a GAC system to polish the air stream to remove VOCs in excess of NMED standards, and PCE could be emitted above or below standards regardless. Based on a toxicity analysis, the liquid GAC system, Alternative 2, will require disposal of the spent GAC to either a municipal solid waste or hazardous waste landfill. Because no waste stream is generated, Alternative 3 (AOP) was assigned a rating of 4. Alternative 1 (low-profile tray aeration, both with and without acid-based pre-treatment) was assigned a rating of 3, and Alternative 2 (GAC) was assigned a rating of 2 due to the larger volume of materials requiring treatment in addition to the higher associated costs.

7.5 Implementability (Weight 3)

This criterion considers the difficulty of construction, the amount of peripheral equipment needed for the treatment system (pumps, controls, chemical storage, tanks, etc.), the time needed for construction, and any special equipment required for installation.

All alternatives will require the construction/installation of a treatment building for the system, influent and effluent equalization tanks, and transfer pumps to and from the tanks. Alternative 2, liquid GAC treatment, will require the greatest amount of tanks and equipment to be installed due to the width and number of GAC vessels that will likely be required. Also, the complexity of plumbing required for backwashing or placing each vessel in and out of service will be greater for this alternative. Low-profile tray aeration (Alternative 1) will require that two skids be installed for redundancy and future capacity. The AOP (Alternative 3) will require only one skid,

but will have the most complex controls and number of control points. The AOP will also require the longest startup period to obtain the optimum removal rates through the system. The construction time will be about the same for each of the three alternatives. Based on these points, low-profile tray aeration (Alternative 1) will have the least amount of plumbing and equipment and is given a rating of 3. GAC (Alternative 2) and AOP (Alternative 3) are each given a rating of 2.

8. Proposed Project (Recommended Alternative)

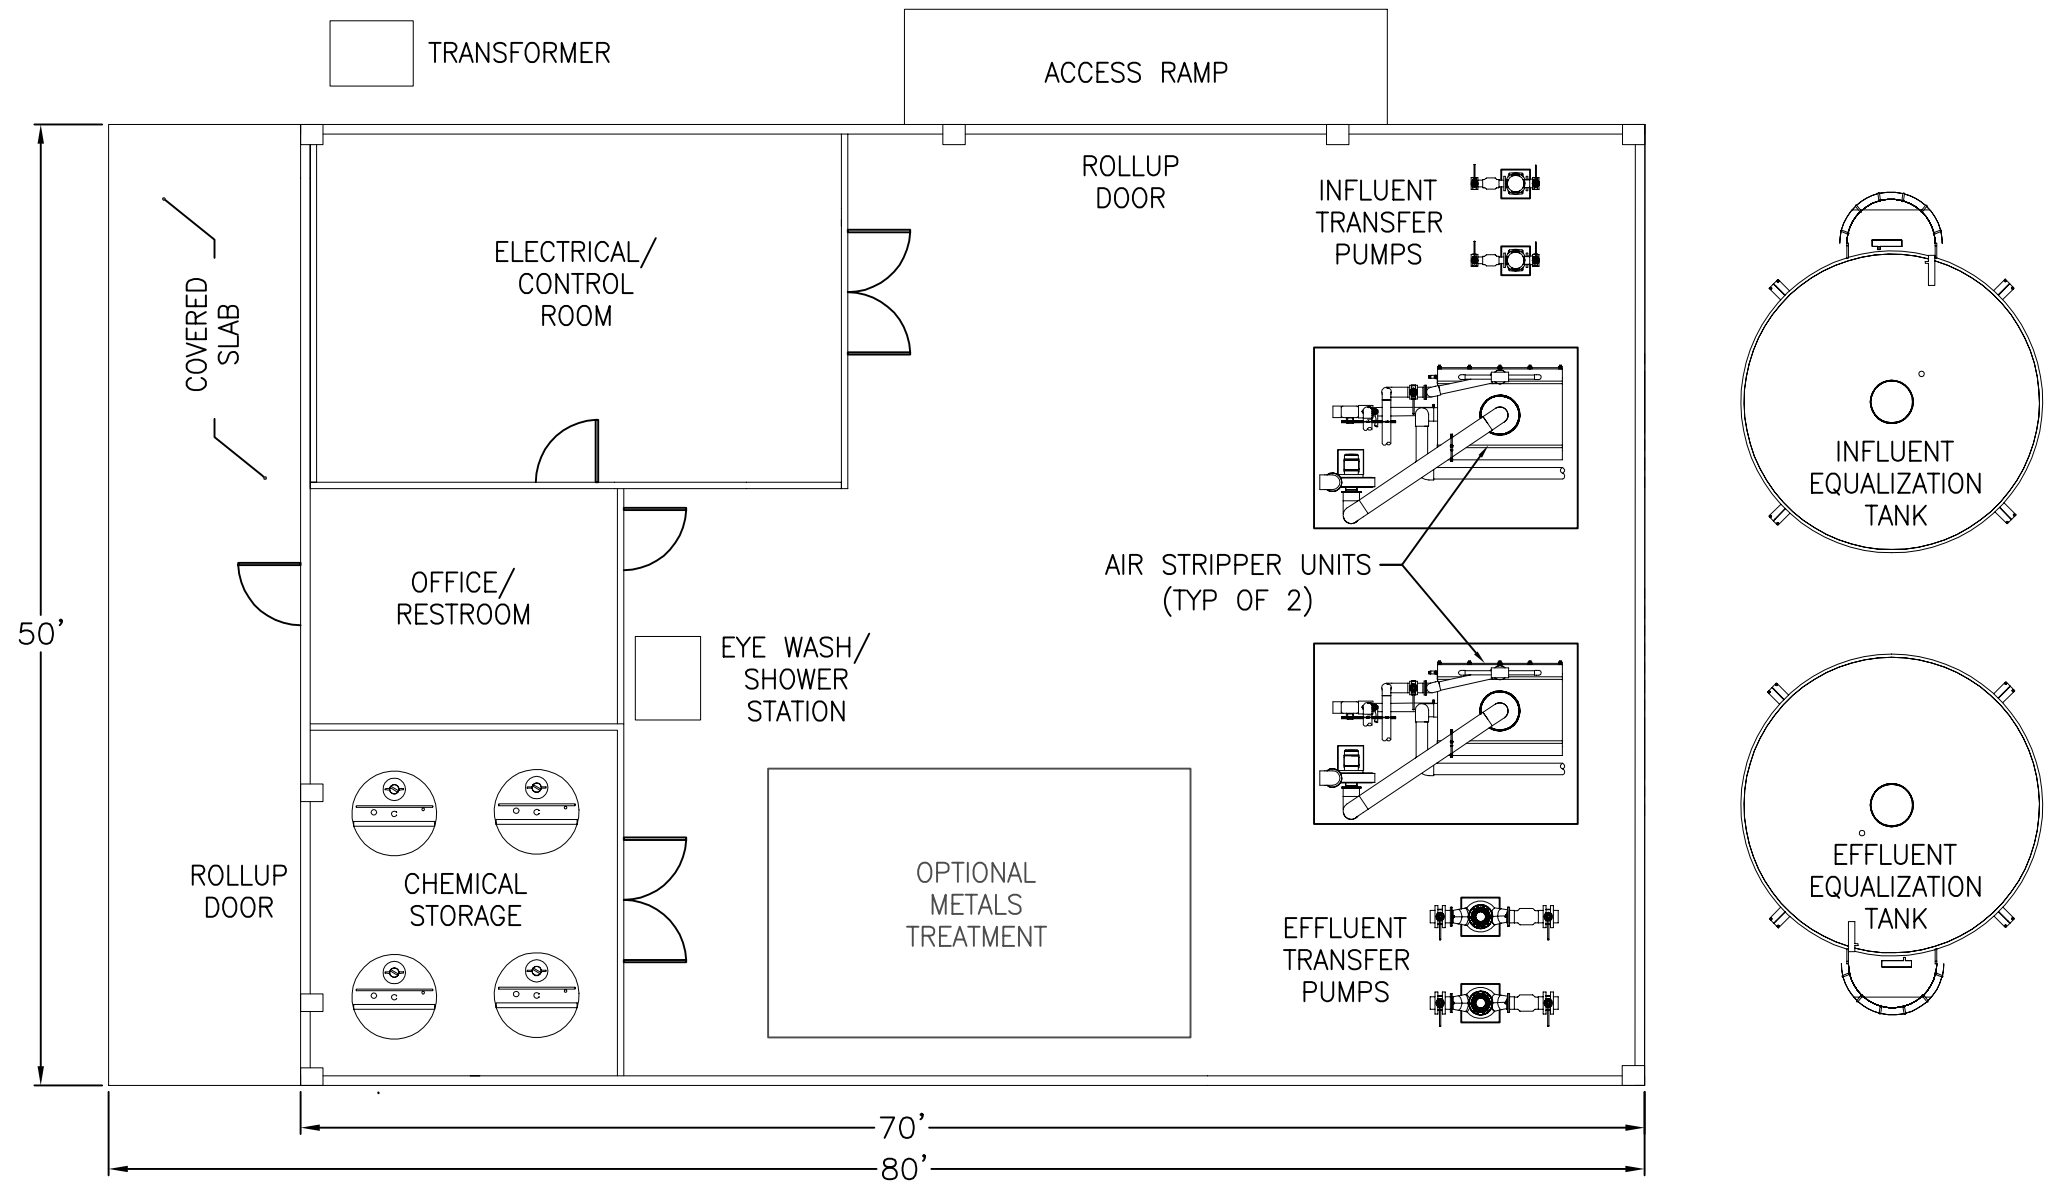

Based on the evaluations above, the recommended alternative for removing PCE from the source water is Alternative 1, which consists of construction of a centralized, low-profile tray aeration system at the site of existing CLC 18. Water from supply wells CLC 18 and CLC 27 will initially be pumped to an influent equalization tank through new 8-inch PVC water lines. Transfer pumps will process water through the low-profile tray aeration units to an effluent equalization tank. The system will accommodate a total hydraulic flow of 500 gpm, greater than the initial combined total flow from the two extraction supply wells of 200 to 300 gpm

A proposed treatment facility layout based on the recommended alternative (shown on Figure 11) includes the general locations for basic required equipment, including low-profile tray aeration units, equalization tanks, transfer pumps, chemical storage, a room for electrical components and controls, an office and restroom, and additional space for optional metals treatment. Additionally, disinfection of the process stream will be performed prior to conveyance to the drinking water system, according to standard practices of the CLC Utilities Department. Based on preliminary engineering design estimates, equipment specifications for a subset of required equipment include:

- Two 250-gpm low-profile tray aeration units
- Two 25-horsepower (hp) blowers
- One 5- to 10-hp duplex influent pump skid
- One 25-hp duplex effluent pump skid
- Two 20,000-gallon bolted steel equalization tanks

Estimates for the total project capital and O&M costs are provided in Appendix E. None of the equipment listed above has special power requirements. At a minimum, optional metals treatment would require additional storage vessels, backwash water pumps and storage tanks, and chemical storage tanks.

S:\Projects\ES09.0306_Griggs-Walnut\VR_Drawings\ES09_0036_01TG_Prelim_bldg_layout.dwg

9. Conclusions and Recommendations

The conclusions and recommendations of this PER are as follows:

- Low-profile tray aeration provides a proven, cost-effective, reliable, low-risk treatment alternative, with relatively easy maintenance and low waste generation, and is the recommended treatment technology to be employed.
- The treatment plant should be located near existing well CLC 18 because of its location near one of the extraction wells and available space for the plant without purchasing additional property.
- CLC 27 should be plumbed to this location with a new 8-inch pipeline.
- The treatment plant effluent should be tied in to the existing distribution system at the site of existing well CLC 18 to convey the treated and disinfected groundwater to the Upper Griggs Reservoir for blending and distribution to the drinking water system.

IMPORTANT - READ INSTRUCTIONS ON BACK BEFORE FILLING OUT THIS FORM.

Declaration of Owner of Underground Water Right

Lower Rio Grande Underground Water
BASIN NAME

Declaration No. LRG 430-S-5 (Second Amended) Date received _____

STATEMENT

1. Name of Declarant City of Las Cruces
Mailing Address Post Office Drawer 20000, Las Cruces 88001
County of Dona Ana, State of New Mexico

2. Source of water supply shallow water aquifer
(artesian or shallow water aquifer)

3. Describe well location under one of the following subheadings:
a. 1/4 SW 1/4 SE 1/4 of Sec. 8 Twp. 23S Rge. 2E N.M.P.M., in
Dona Ana County, as projected.
b. Tract No. _____ of Map No. _____ of the _____
c. X = 342,890 feet, Y = 479,000 feet, N.M. Coordinate System Central Zone
in the Dona Ana Bend Colony Grant.
On land owned by Earl Stull, Jr.

4. Description of well: date drilled July, 1960 driller Morrison Bros. depth 572 feet.
outside diameter of casing 16 inches; original capacity 1600 gal. per min.; present capacity 900
gal. per min.; pumping lift 308 feet; static water level 205 feet (below) land surface;
make and type of pump Layne & Bowler Vertiline Pump, 14-Stage Vertical Turbine
make, type, horsepower, etc., of power plant General Electric, Type K, 200 hp., 1770 rpm.
Fractional or percentage interest claimed in well 100%

5. Quantity of water appropriated and beneficially used 1546 acre-feet per annum
(acre feet per acre) (acre feet per annum)
for municipal water supply purposes.

6. Acreage actually irrigated 0 acres, located and described as follows (describe only lands actually irrigated):

Subdivision	Sec.	Twp.	Range	Acres Irrigated	Owner

(Note: location of well and acreage actually irrigated must be shown on plat on reverse side.)

7. Water was first applied to beneficial use October, 1960 and since that time
month day year
has been used fully and continuously on all of the above described lands or for the above described purposes except as follows: Water from this well was first applied to beneficial use approximately October, 1960. Las Cruces will present its claims for a priority date with its Statement of Claims in the pending adjudication No. CV96-888, 3rd Judicial District, at the appropriate time. See attached.

8. Additional statements or explanations
Well is known as the City of Las Cruces Well No. 18, located approximately 750 feet west of Walnut Street and 430 feet north of Griggs. Well property is being leased from Earl Stull, Jr. Lease time period is 99 years from 1960.

I, Robert J. Monday being first duly sworn upon my oath, depose and say that the above is a full and complete statement prepared in accordance with the instructions on the reverse side of this form and submitted in evidence of ownership of a valid underground water right, that I have carefully read each and all of the items contained therein and that the same are true to the best of my knowledge and belief.

City of Las Cruces, declarant.

by: Robert J. Monday

Subscribed and sworn to before me this 23rd day of July, A.D. 1997

		<hr/> 21,539	<hr/> 837.5

The City's total declared water right from river-connected pre-basin wells is a right to deplete 21,539 acre feet per annum for municipal purposes. The right is calculated on an annual pumping rate of 60%, subject to proof of a higher rate. During the year preceding September 11, 1980, when the lower Rio Grande Basin

was declared, the City diverted 12,433 acre feet, with a net depletive effect on the river of 6,216.5 acre feet. During 1996, the City diverted 19,043.81 acre feet, with a net depletive effect on the river of 9,521.9 acre feet.

The City's total diversion right, based on depletions from its existing wellfield, its applications to divert from the Jornada del Muerto and the West Mesa, and further depletions from river-connected wells may be calculated, approximately, as follows:

Supply Source	Diversion	Ultimate Depletion	Return Flows	Net Depletion
Existing Wells	21,539	21,539	10,769.5	-10,769.5
Jornada	14,000	1,000	7,000	+ 6,000
West Mesa	8,000	8,000	4,000	- 4,000
Connected Wells	<u>25,539</u>	<u>25,539</u>	<u>12,769.5</u>	<u>-12,769.5</u>
	69,078	56,078	34,539	-21,539

Assuming the City's right to deplete the river is developed from the existing and planned sources of supply, the total diversion will be 69,078 acre-feet.

(EXECUTE IN TRIPLICATE ACCOMPANIED BY ~~2.00~~ ^{55.00} FILING FEE)

APPLICATION FOR PERMIT TO REPAIR OR DEEPEN WELL

1. Name of Water Right Owner City of Las Cruces File No. LRG-430-S-5 (CLC Well 18)
 Mailing address P.O. Drawer CLC
 City and State Las Cruces, NM 88004

2. Describe well location under one of the following subheadings:
 a. 1/4 SW 1/4 SE 1/4 of Sec. 8 Twp. 23S Rge. 2E N. M. P. M. in Dona Ana County.
 b. Tract No. _____ of Map No. _____ of the _____ District.
 c. Lot No. _____ of Block No. _____ of the _____ Subdivision, of record in _____ County.

3. Source of supply Shallow (State whether artesian or non-artesian)

4. Right was acquired for Municipal Use purposes.

5. Type of repair contemplated: a. Clean out well to original depth b. Deepen well
 from _____ to _____ feet c. Other See note in item 7

6. Name of driller, if known: _____

7. Additional statements or explanations: The following rehabilitation was performed to the well:
1) Run television camera to find condition of well
2) Sonar jettted the well
3) Brushing and bailing operations
4) Run television camera for second time
5) Found holes on casing and screen which were repaired by patching one 4-foot patch on casing, one 12-foot patch on screen and another 4-foot patch on screen.
6) Clean well and run television camera for third time.
7) Equip well with new pump

IMPORTANT-READ INSTRUCTIONS ON BACK BEFORE FILLING OUT THIS FORM

Application for Permit to Change Location of Well

Not Used

Date Received November 23, 1994 File No. LRG-430-S-5 (CLC No. 18)

1. Name of Water Right Owner City of Las Cruces
Street or Post Office Address P.O. Drawer CLC
City and State Las Cruces, NM Zip Code 88005

2. Source of water supply Shallow, located in Lower Rio Grande
(artesian or shallow water aquifer) (name of underground basin)

3. Well from which rights are to be severed:
(a) Well is in the SW $\frac{1}{4}$ SE $\frac{1}{4}$, Section 8 Township 23 S Range 2E N.M.P.M.,
or Tract No. _____ of Map No. _____ of the _____

(b) Is well to be plugged Yes; If not, state for what use retained _____

4. Application is made to change location of well for the following reasons (If well is to be used for only a part of original right describe that part by legal description under item number 6): Well No. 18 was drilled in 1960 and needs replacement. Present site not usable because of wellhead protection criteria.

5. Well to which transfer is to be made: 475,321N, 1,480,646E N.M.P.C.
(a) Located in the SW $\frac{1}{4}$ NW $\frac{1}{4}$ SW $\frac{1}{4}$, Section 17 Township 22S Range 2E N.M.P.M.,
or Tract No. _____ of Map No. _____ of the _____
on land owned by City of Las Cruces

(b) Quantity of water to be appropriated 1546 acre feet applied to N/A acres
of land; if not for irrigation, specify purpose Municipal/Industrial

(c) If existing well, give File No. LRG-430-S-5

(d) If a new well, give name of driller Guffey Drilling

(e) Outside diameter of casing 16 inches; Approximate depth to be drilled 1000 feet.

6. Additional statements or explanations Test hole will be drilled to approx. 1000 feet. Final production well depth dependent on test hole results. The 1546 acre-foot per annum is to be part of the water right of 21,869 acre-feet of water per annum claimed by the City of Las Cruces.

I, Jerry Leyendecker, affirm that the foregoing statements are true to the best of my knowledge and belief and that I am the Agent owner and holder of said water right.
(sole, partial, agent for, etc.)

City of Las Cruces, Applicant

By: Jerry Leyendecker

ACTION OF STATE ENGINEER

After notice pursuant to statute and by authority vested in me, this application is approved provided it is not exercised to the impairment of any others having existing rights; further provided that all rules and regulations of the State Engineer pertaining to the drilling of _____ wells be complied with; and further subject to the following conditions: _____

Proof of completion of well shall be filed on or before _____ 197__

Witness my hand and seal this _____ day of _____, A.D., 197__

STATE ENGINEER
SANTA FE, N.M.

'83 JUN 23 PM 4 40

The City's total declared water right is a right to divert 21,969.7 acre-feet per annum for municipal purposes. In 1982 the City pumped its wells at the rate of 13,138 acre-feet. During the year preceeding September 11, 1980, when the Lower Rio Grande Basin was declared, the City pumped 12,433 acre-feet. The difference between 12,433 acre-feet and 21,969.7 acre-feet is the difference between actual application to beneficial use as of September 11, 1980 and the previously planned and established production capacity of the City's water system.

		21,539	837.5

The City's total declared water right from river-connected pre-basin wells is a right to deplete 21,539 acre feet per annum for municipal purposes. The right is calculated on an annual pumping rate of 60%, subject to proof of a higher rate. During the year preceding September 11, 1980, when the lower Rio Grande Basin

was declared, the City diverted 12,433 acre feet, with a net depletive effect on the river of 6,216.5 acre feet. During 1996, the City diverted 19,043.81 acre feet, with a net depletive effect on the river of 9,521.9 acre feet.

The City's total diversion right, based on depletions from its existing wellfield, its applications to divert from the Jornada del Muerto and the West Mesa, and further depletions from river-connected wells may be calculated, approximately, as follows:

Supply Source	Diversions	Ultimate Depletion	Return Flows	Net Depletion
Existing Wells	21,539	21,539	10,769.5	-10,769.5
Jornada	14,000	1,000	7,000	+ 6,000
West Mesa	8,000	8,000	4,000	- 4,000
Connected Wells	<u>25,539</u>	<u>25,539</u>	<u>12,769.5</u>	<u>-12,769.5</u>
	69,078	56,078	34,539	-21,539

Assuming the City's right to deplete the river is developed from the existing and planned sources of supply, the total diversion will be 69,078 acre-feet.

(EXECUTE IN TRIPLICATE ACCOMPANIED BY ~~\$1.00~~ ^{\$5.00} FILING FEE)

STATE ENGINEER
SANTA FE, N.M.

'83 JUN 23 PM 4 40

The City's total declared water right is a right to divert 21,969.7 acre-feet per annum for municipal purposes. In 1982 the City pumped its wells at the rate of 13,138 acre-feet. During the year preceeding September 11, 1980, when the Lower Rio Grande Basin was declared, the City pumped 12,433 acre-feet. The difference between 12,433 acre-feet and 21,969.7 acre-feet is the difference between actual application to beneficial use as of September 11, 1980 and the previously planned and established production capacity of the City's water system.

City of Las Cruces

December 1, 2009

Honorable Mayor and City Council,
City of Las Cruces, New Mexico

We are pleased to submit the Comprehensive Annual Financial Report for the City of Las Cruces (City), New Mexico, for the fiscal year ended June 30, 2009, in accordance with Article V, Section 5.09, of the City Charter. Responsibility for the accuracy of the presented data and the completeness and fairness of presentation, including all disclosures, rests with the City. We believe the data, as presented, are accurate in all material respects and are presented in a manner that fairly sets forth the financial position and results of operations of the City. Furthermore, we believe that all disclosures necessary to enable the reader to gain an understanding of the City's financial activities have been included.

In the Financial Section of this report, the independent auditor's report is immediately followed by Management's Discussion & Analysis (MD&A). The MD&A provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

Profile of the City

The City of Las Cruces, incorporated in 1946 and chartered in 1985, has a council/manager form of government consisting of a mayor and six council members. The mayor is elected at large for a four-year term. Council members are elected from six member districts for a four-year term. Elections are held on a bi-annual basis. The city manager, appointed by the City Council, is responsible for the management of all City employees and the administration of all City affairs.

This report includes financial statements of the funds required for those activities, organizations, and functions related to the City and that are controlled by or dependent upon the City's governing body, the City Council. The financial reporting entity consists of the City, two discretely presented component units: the Public Housing Authority and South Central Solid Waste Authority, and one blended component unit: the Downtown Tax Increment Development District. These component units are included in the City's reporting entity because of the significance of their operational relationship or financial relationship with the City. Considering the above criteria, this report includes all funds of the City.

The City provides a full range of services. These services include public safety (police and fire); community services (culture and recreation); facilities; streets, public improvements; planning, zoning, engineering; public utilities (water, gas, wastewater, solid waste) and general administration of services.

Economic Condition and Outlook

The City is the second largest city in the State and is the commercial service and cultural center of Southern New Mexico. The U. S. Census Bureau ranks the City in the top thirty fastest growing population areas in the country for the last decade.

The City of Las Cruces has not been immune from national and international economic conditions. The construction industry has shown a sharp drop in fiscal year 2009. Gross receipts tax (GRT) and lodging tax receipts are down from the preceding year as well. The local labor market has also experienced job loss and a rising level of unemployment.

For fiscal year 2009/2010 the economic assumptions anticipate slow economic activity as the economy begins to heal. The City's largest revenue source is the gross receipts tax. The recent past has seen exceptional growth from this source fueled by rapid construction activity centered on residential housing. This changed in fiscal year 2008 and fell further in fiscal year 2009. Single family permits fell by almost one fifth. Total valuation, while down, was buoyed in part by commercial activity and construction of multiple family housing.

The City continues to benefit from its geographical location and environmental qualities. The outlook calls for overall construction activity to bottom out in 2009, striking a level that is more sustainable and in balance with population growth. A countervailing factor to the slowdown is the on going construction of a number of relatively large public projects by the City, Federal Government and the Las Cruces Public School district. While these projects are currently scheduled to be completed by the end of fiscal year 2011, they will generate added revenues over the construction period.

The local economy, in spite of current conditions, should continue to outpace New Mexico as a whole. Las Cruces is well positioned to benefit when the economy returns to expansionary mode over the next 5 years. Growth in health care, an emerging renewable energy industry, plus the traditional City strength of being a regional service and government center, while possessing a large state university will all contribute to the expansion of the Las Cruces economy. Tourism and retirement are also areas that will add momentum to the expected recovery.

Long Term Plans and Major Initiatives

The City is working cooperatively with Dona Ana County and New Mexico State University to finalize and implement Vision 2040, a regional growth management planning initiative. The regional approach to long range planning will result in better intergovernmental cooperation, greater efficiency in analysis and public involvement, and more effective regional response to issues related to growth, economy, environment, and transportation. Products will include a Regional Vision document and updates to the City and County Comprehensive Plans. Ultimately, the plan will guide the strategic decisions within the region, enhancing synergistic opportunities among the participating governmental units.

The City has invested large sums of money into recreational and cultural facilities, including a new city hall, convention center, wastewater reclamation facility, and aquatic center. Long range plans will continue the effort to provide utility services, public safety, and recreational facilities in newly developing areas.

Honorable Mayor and City Council,
City of Las Cruces, New Mexico
12/01/2009

The City was awarded stimulus funding during fiscal year 2009, which includes \$8,097,163 for the airport; \$1,713,911 for the transit system; \$1,996,654 for police; \$2,000,000 for public works; \$269,562 for community development; and \$888,000 for public services. The total of stimulus awards for the year was \$14,935,290. The airport project began in fiscal year 2009. Other projects will begin next year.

Internal Control Framework

Integrated within the business systems of the City are the policies and procedures over accounting and financial reporting that make up the internal control framework. The internal control framework provides assurance that the accounting systems and underlying data are reliable. There are certain limitations inherent in the internal control framework. Management may choose to accept certain risks because the cost to prevent all risks is not reasonable. Additionally, while management is responsible for establishing and maintaining effective internal controls, the authority to override controls is retained within management. Although some level of risk within the internal control framework is unavoidable, the City's management maintains an attitude of supporting strong and effective internal controls.

Financial Information, Management and Control

The financial position and operating results of the City is provided in the financial statements. Management's discussion and analysis includes financial highlights, describes the financial statements, and provides financial analysis of the City's financial position and results of operations. Following is a brief description of financial information, management of financial resources, and financial obligations.

Budgetary Control

In New Mexico, state statutes mandate that municipalities operate within the confines of a balanced budget. If a fund is not overspent, it is in compliance with state law. Annual budgets are adopted for all funds. All unexpended appropriations lapse at the end of the fiscal year. The City Manager is responsible for presenting an annual budget to the City Council. The Council sets hearings for annual budget review and approves the final budget. The final budget is then submitted to the New Mexico Department of Finance and Administration, Local Government Division. The Local Government Division must then approve and certify the City's operating budget.

Budget adjustments requested throughout the fiscal year that increase fund expenditures must be reviewed and approved by the City Council. The adopted budget becomes a document that details a clear and precise picture of the cost of public services that will be provided. The budget is controlled through an on-line accounting system to assure effective fiscal management and accountability. Local Government Division approval must be obtained on budget increases and budget transfers between funds. The 2008/2009 budget was legally amended.

Taxes

The allocation of the property tax for fiscal year 2009 and the two preceding years is based on the mill levy below:

<u>Purpose</u>	<u>2009</u>	<u>2008</u>	<u>2007</u>
Operational mill levy:			
Residential	6.136	5.960	5.879
Non-residential	7.120	7.120	7.120

The City has no outstanding general obligation bonds. Therefore, the debt service levy for all three years is zero.

The gross receipts tax rate on receipts within the City was 7.375% at June 30, 2009. The breakdown and sources of the gross receipts tax rate at June 30, 2009 includes:

	<u>Tax Rate</u>	<u>Percent of Total Rate</u>
State General Fund	3.7750%	51.2%
State shared-municipal distribution	1.2250%	16.6%
Municipal GRT- general purpose	1.2500%	16.9%
Municipal GRT-infrastructure	0.1250%	1.7%
Municipal GRT-public safety	0.1250%	1.7%
Municipal Environmental GRT	0.0625%	0.9%
Dona Ana County-local option taxes	<u>0.8125%</u>	<u>11.0%</u>
	7.3750%	100.0%

Debt Administration

The City has significant capacity for future capital and infrastructure acquisitions, should the need arise. The City's current unused general obligation (G. O.) bond capacity is in excess of \$50 million. The City currently has no outstanding G.O. bonds.

The City had nine bond issues outstanding at June 30, 2009. Three issues are Joint Utilities Revenue Bonds. Gas tax revenues secure one issue and gross receipts tax revenues finance the other five bond issues outstanding. The amount of bonds outstanding at June 30, 2009 was \$93,585,000. In addition, the City has nineteen loans outstanding from New Mexico Finance Authority totaling \$76,489,916.

In March 2009 Moody's Investors Service upgraded the City's bond rating on Joint Utility Revenue Bonds from Aa3 to A1. According to Moody's, "The rating actions reflect the City's healthy economic growth and customer base expansion, strong financial performance resulting in favorable debt service coverage calculations, and favorable system liquidity." In August 2009 Fitch Ratings followed with an upgrade to the City's bond rating on state-shared GRT bond issues from A+ to AA- citing "very healthy operating reserves, a moderate debt burden, a diverse area economy and high debt service coverage from pledged revenues."

Cash Management

The City's investment policy allows for the investment of cash balances over amounts required to meet current financial obligations to achieve the highest rate of return consistent with the primary objectives of preservation of principal and maintenance of adequate safety, liquidity, legality and yield. As of June 30, 2009, deposits were either insured by federal depository insurance or collateralized by pledged securities of U.S. government agencies. A pledging financial institution's trust department held all collateral in the City's name.

Risk Management

The City maintains a self-insurance program for liability claims, unemployment compensation and workers compensation. The City participates in the State health insurance programs for both current and retired employees. In addition, the City's Risk Management office employs various risk control techniques, such as employee accident prevention training and inspection of City property and facilities, to minimize accident-related losses.

Independent Audit

New Mexico State law requires that an annual audit of a governmental unit's financial statements be performed by independent public accountants. Federal law requires that a single audit be performed for federal grant funds as required by the Single Audit Act Amendments of 1996 Office of Management and Budget Circular A-133. Additionally, the City Charter requires an annual audit of all accounts of the City by an independent certified public accountant.

The independent auditor's reports on the financial statements, required supplementary information, and other supplementary information are included in the financial section of this report. The auditor's reports related specifically to the single audit are included in the single audit section of this report.

The independent firm of certified public accountants, REDW, LLP, has audited the financial statements and related notes.

The financial statements have been prepared in accordance with generally accepted accounting principles (GAAP) for local governments as prescribed by the Governmental Accounting Standards Board (GASB).

GFOA Awards

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the City of Las Cruces for the comprehensive annual financial report for the fiscal year ended June 30, 2008. This was the fifth consecutive year that the City has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

Honorable Mayor and City Council,
City of Las Cruces, New Mexico
12/01/2009

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to GFOA to determine eligibility for another certificate.

In addition, the City also received the GFOA Award for Distinguished Budget Presentation for its annual appropriated budget for the fiscal year 2009. In order to receive this award, a governmental unit must publish a budget document that meets program criteria as a policy document, an operations guide, a financial plan, and a communications medium.

These awards represent the highest form of recognition in governmental accounting, financial reporting, and budget presentation. These are outstanding accomplishments that demonstrate the professionalism residing in the Financial Services Department.

Acknowledgments

The preparation of the Comprehensive Annual Financial Report could not have been accomplished without the efforts and dedication of the Financial Services Department staff. I would like to express my appreciation to staff for their many hours of hard work devoted to the project.

I would also like to thank the Mayor, City Council, and City Manager for their interest and support in planning and conducting the financial affairs of the City in a responsible and progressive manner.

Respectfully submitted,

City of Las Cruces

Independent Auditors' Report

Mr. Hector H. Balderas, New Mexico State Auditor
and the Honorable Mayor and City Council Members
of the City of Las Cruces

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component units, each major fund and the aggregate remaining fund information of the City of Las Cruces, New Mexico (the "City"), as of and for the year ended June 30, 2009, which collectively comprise the City's basic financial statements as listed in the table of contents. We have also audited the financial statements of each of the City's nonmajor governmental, nonmajor enterprise, internal service and fiduciary funds presented in the accompanying combining financial statements and the budgetary comparison schedules as of and for the year ended June 30, 2009, as listed in the table of contents. These financial statements and schedules are the responsibility of the City's management. Our responsibility is to express opinions on these financial statements and schedules based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America, and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and schedules are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and schedules. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Las Cruces, New Mexico, as of June 30, 2009, and the respective changes in financial position and cash flows, where applicable, thereof, and the general fund and major special revenue funds budgetary comparisons where applicable, thereof, for the year then ended in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statements and schedules referred to above present fairly, in all material respects, the respective financial position of each nonmajor

governmental, nonmajor enterprise, internal service and fiduciary fund of the City of Las Cruces, New Mexico as of June 30, 2009, and the respective changes in financial position, cash flows, and budgetary comparisons, where applicable, thereof, and the budgetary comparisons of each major debt service fund and major capital projects fund for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated November 16, 2009, on our consideration of the City of Las Cruces, New Mexico's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The accompanying management's discussion and analysis is supplemental information required by the Governmental Accounting Standards Board and is not a required part of the basic financial statements. We have applied certain limited procedures, which consist principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City's basic financial statements and the combining and individual fund financial statements and respective budgetary comparisons. The accompanying information identified in the table of contents as supplementary information is presented for purposes of additional analysis and to meet the requirements of the State of New Mexico and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole. Other data included in this report, listed in the accompanying table of contents as the introductory section and the statistical section, are also not required parts of the basic financial statements and have not been subjected to the auditing procedures applied by us in the audit of the basic financial statements and, accordingly, we express no opinion on them.

REDW LLC

Management's Discussion and Analysis

The Management Discussion and Analysis presents an overview of the City's financial activities for the fiscal year ended June 30, 2009. It is intended to be read in conjunction with the Letter of Transmittal and the City's financial statements. In accordance with Governmental Accounting Standards Board standards, comparisons to prior-year balances and activity are presented.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the City's basic financial statements. The City's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-wide Financial Statements

The *government-wide financial statements* consist of two statements and are designed to provide readers with a broad overview of the City's finances in a manner similar to a private-sector business.

The *Statement of Net Assets* presents information on all of the City's assets and liabilities, with the difference between the two reported as net assets.

The *Statement of Activities* presents information showing how the government's net assets changed during fiscal year 2009. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned, but unused, vacation leave). Both of these financial statements distinguish functions of the City that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the City include General Government, Facilities, Police, Fire, Community Development, Public Services, and Public Works. The business-type activities of the City include Gas, Water, Waste Water, Solid Waste, Transit, and Alternative Fuels.

The government-wide financial statements include not only the City itself (known as the *primary government*), but also the following legally separate component units: Public Housing Authority (PHA), South Central Solid Waste Authority (SCSWA), and the Las Cruces Downtown Tax Increment Development District (TIDD). PHA and SCSWA are discretely presented component units and the financial information for these component units is reported separately from primary government itself. The TIDD is a blended component unit of the City, whose Board is comprised of the members of the City Council. The financial information for the TIDD is presented as a special revenue fund in the financial information of the primary government.

Fund Financial Statements

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental Funds

Governmental funds are used to account for essentially the same functions reported as *governmental activities* in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spendable resources* available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund Balance Sheet and the governmental fund Statement of Revenues, Expenditures, and Changes in Fund Balances provide reconciliations to facilitate this comparison between *governmental funds* and *governmental activities*.

The City maintains one hundred twenty-one individual governmental funds, ten of which combine into the General Fund. Information is presented separately in the Governmental Funds Balance Sheet and in the Governmental Funds Statement of Revenues, Expenditures, and Changes in Fund Balances for the funds that comprise the General Fund, which is considered to be a major fund. Three other governmental funds, Sonoma Ranch, the 2005 Gross Receipts Tax-City Hall, and the Las Cruces Convention Center fund are also reported as major funds. The remaining one hundred eight governmental funds combined into a single, aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the form of *combining statements* in the supplementary information section of this report.

The City adopts an annual appropriated budget for its general, special revenue, debt service and capital projects funds. A budgetary comparison schedule has been provided for these funds to demonstrate budgetary compliance.

Proprietary Funds

The City maintains two different types of proprietary funds. *Enterprise funds* are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The City uses enterprise funds to account for the fiscal activities relating to Gas, Water, and Wastewater utilities, as well as Solid Waste disposal. The City also uses enterprise funds to account for Transit and Alternative Fuel, which are reported as non-major enterprise funds. *Internal service funds* are an accounting device used to accumulate and allocate costs internally among the City's various functions. The City uses internal service funds to account for its support services, vehicle maintenance, and self-insurance. Because these services benefit both governmental and business-type functions, they have been allocated between *governmental and business-type activities* in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail. The proprietary fund financial statements provide separate information for the Gas, Water, and Wastewater Utilities, as well as Solid Waste funds, which are considered to be major funds of the City. Data from the non-major enterprise funds, as well as all the internal service funds, are combined into single, aggregated presentations in the proprietary fund financial statements. Individual fund data for the non-major enterprise funds and the internal service funds is provided in the form of *combining statements* in the supplementary information section of this report.

**CITY OF LAS CRUCES, NEW MEXICO
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009**

Fiduciary Funds

Fiduciary funds are used to account for resources held for the benefit of parties outside of the primary government. Fiduciary funds are *not* reflected in the government-wide financial statement because the resources of those funds are *not* available to support the City's own programs. The Statement of Fiduciary Assets and Liabilities for the agency funds is presented in the basic financial statements section of this report.

Notes to the Financial Statements

The Notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The Notes follow the financial statements, and are an integral part of the financial statements.

Other Information

The combining statements of the non-major governmental funds, non-major enterprise funds, and internal service funds are presented in the supplementary information section of this report.

Statistics

The statistical section provides statistical data on financial trends, revenue and debt capacity, demographic and economic data, and operating information.

Government-wide Financial Analysis

At the end of fiscal year 2009, the City reports positive balances in all three categories of net assets, including the government-wide, governmental activities, and business-type activities. Comparative information is presented for fiscal years 2009, 2008, and 2007.

Net Assets (in 000's)

	Governmental Activities			Business - type Activities			Total		
	2009	2008	2007	2009	2008	2007	2009	2008	2007

**CITY OF LAS CRUCES, NEW MEXICO
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009**

Sixty-three percent of the City's net assets are investment in capital assets (i.e., land, land improvements, buildings, equipment, utility infrastructure), net of any related outstanding debt used to acquire those assets. This compares with fifty percent in fiscal year 2008. The City uses these capital assets to provide services to citizens; consequently, these assets are *not* available for future spending. Resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Twelve percent of the City's net assets are resources that are subject to external restrictions on how they may be used. This amount is down from the sixteen percent of restricted net assets reported for fiscal year 2008. The remaining balance of *unrestricted net* assets \$126,697,842 may be used to meet the government's ongoing obligations to citizens and creditors.

Changes in net assets during 2009 and comparative amounts for 2008 and 2007 were:

Summary of Changes in Net Assets (in 000's)

	Governmental Activities			Business - type Activities			Total

Governmental Activities

Governmental activities increased the City's net assets during the current fiscal year by \$9.2 million. Gross receipts tax, property tax, and franchise fees fell from \$91 million in fiscal year 2008 to \$88 million in fiscal year 2009. The taxes and franchise fees contributed a significant amount for covering the \$76.6 million net program expense associated with general governmental activities.

Governmental Revenues

Revenue by Source – Governmental Activities

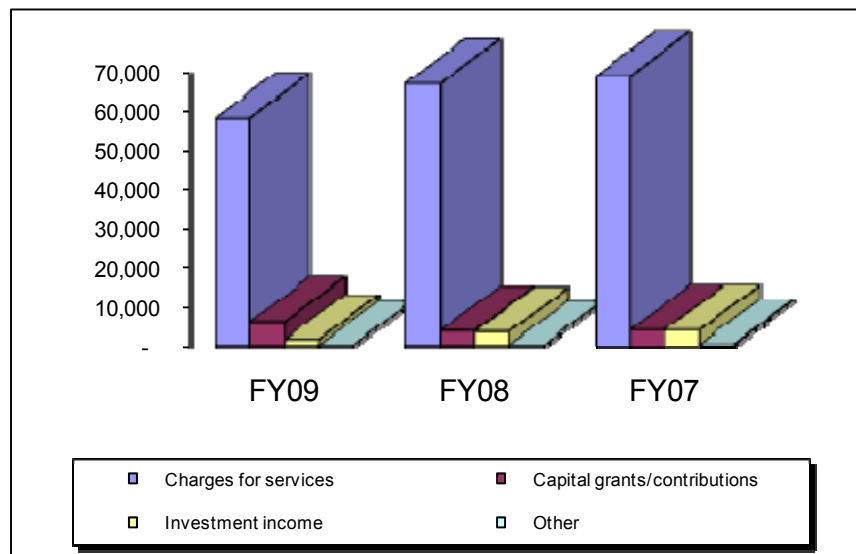

Expenses of the City's governmental activities increased from \$102.8 million in fiscal year 2008 to \$108.9 million in 2009. The increase resulted primarily from controlled spending in the general government.

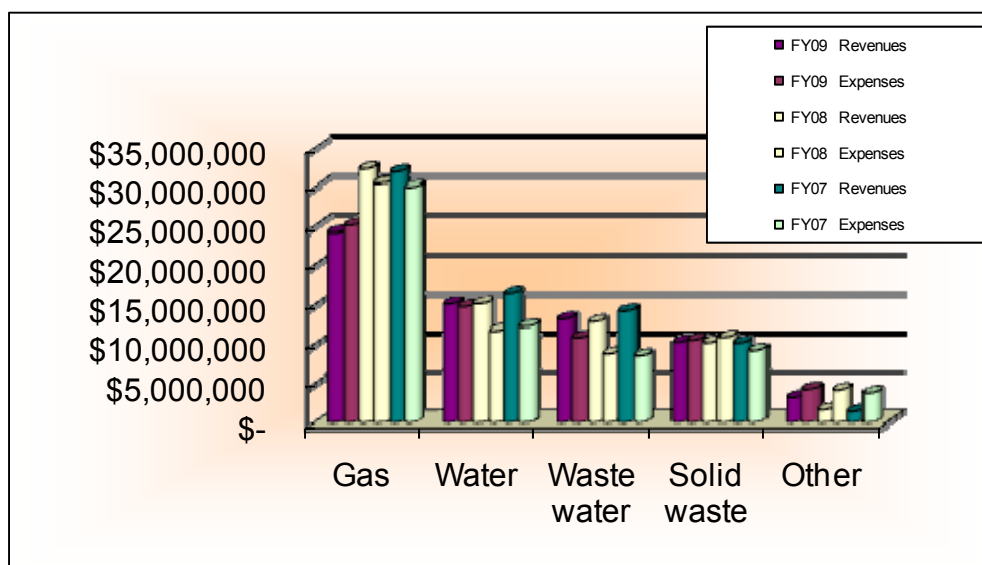

Business-type Activities

Business-type activities increased the City's net assets during the current fiscal year by \$6.2 million. Charges from services dropped from \$67.4 million in fiscal year 2008 to \$57.9 million in fiscal year 2009. Expenses decreased from \$69.4 million in 2008 to \$65.1 million in 2009, with the Gas fund showing the largest decrease overall of approximately \$5.4 million. The Water fund showed an increase in operating expenses of approximately \$1.2 million.

Revenues by Source – Business-type Activities

Expenses and Program Revenues – Business-type Activities

Financial Analysis of the City's Funds

The national economic slowdown is reflected in a decreased level of construction activity in the local area. Gross receipts taxes have declined 4.6% from 2008. A decrease in lodgers' tax receipts reflect the cutback in travel and discretionary spending as a result of pervasive job losses throughout the country.

Capital grants increased by \$826 thousand from 2008, and public works continued to make improvements on streets, facilities, and infrastructure. The repair and rehabilitation of public facilities and maintenance of public parks continues according to the City's master plan.

Governmental Funds

The focus of the City's *governmental funds* is to provide information on near-term inflows, outflows, and balances of *spendable resources*. Such information is useful in assessing the City's financing requirements. In particular, *Unreserved Fund Balance* may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of fiscal year 2009, the City's governmental funds reported combined ending fund balances of \$118,606,853, a decrease of \$32,847,438 from the prior year. The General Fund, Sonoma Ranch, the 2005 Gross Receipts Tax-City Hall, and Las Cruces Convention Center funds are reported as major governmental funds. The unreserved fund balance in the General Fund is \$30 million. The remainder of the General Fund balance is *reserved* to indicate inventories of \$933,966 are not available to be spent. Fund balances of other major governmental funds are unreserved and reported in Sonoma Ranch \$49,980, the 2005 Gross Receipts Tax-City Hall fund \$708,250, and the Las Cruces Convention Center \$24,305,042. All other funds are combined and reported as non-major governmental funds. Reserved fund balances are reported in other special revenue funds \$30,309,728, in other capital project funds \$24,531,635, and debt service \$7,844,924.

General Fund

The General Fund is the chief operating fund of the City. At the end of fiscal year 2009, unreserved fund balance of the general fund was \$29,923,328, while total fund balance was \$30,857,294. Of the \$29.9 million in unreserved fund balance, \$10.5 million are amounts recorded as receivables from the State, primarily for taxes that will be collected in the ordinary course of business in the next fiscal year. Reducing the \$29.9 million in unreserved fund balance by this amount leaves approximately \$19.5 million in readily available resources that are not part of budgeted inflows for the upcoming year. This amount is 25.9% of General Fund expenditures for the year, and is one measure of liquidity of the General Fund.

The fund balance of the City's General Fund decreased \$6,364,883 during the current fiscal year, attributed primarily to a decrease in gross receipts taxes, licenses/permits, fees/fines, and investment income.

The difference between the original budget and the final amended budget for revenues is a decrease of approximately \$1,182,000 for the year. The budget for gross receipts taxes decreased \$1,565,000 from the original budget to the final budget. The budget for property tax revenues increased \$400,000, while the budget for licenses and permits decreased by \$531,393 due to the continued decline in new construction.

**CITY OF LAS CRUCES, NEW MEXICO
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009**

Actual revenues for the fiscal year were approximately \$1.3 million more than the final budget. There were three significant variances between the budgeted revenues and actual revenues by category. These variances were due to:

- Actual revenues from gross receipts tax slightly exceeded the final budget by approximately \$946 thousand.
- Actual revenues from fines and fees exceeded budgeted revenues by approximately \$982 thousand.
- Actual revenues from operating grants and contributions exceeded budgeted revenues by \$22 thousand.

Differences between the original expenditures budget and the final amended expenditures budget totaled approximately \$1.9 million and can be briefly summarized as follows:

- The City reduced the budget for salary reserves for general government by \$1.4 million, distributing the budget for salary reserves among the appropriate functions.
- The City decreased the budget for police and fire by \$426 thousand.
- The City reduced the budget for public services by \$297 thousand.

Actual expenditures were approximately \$1.5 million less than the final expenditures budget. These variances can be briefly summarized as follows:

- Actual expenditures were \$685 thousand less than budget as public works projects were delayed.
- The general government actual expenditures were approximately \$1.2 million less than the final budget. Activities less than budget within general government include: \$371 thousand for personnel expenditures and \$545 thousand for operating costs.
- The actual expenditures for public services were approximately \$571 thousand less than actual expenditures due to reduced operating costs in the library of \$137 thousand, recreation of \$258 thousand, senior programs of \$68 thousand, and \$116 thousand in general administration costs.

2005 Gross Receipts Tax Fund for City Hall

In September 2005, the City issued gross receipts tax bonds in the amount of \$33 million to fund public improvements and the construction of a new City Hall. The City Hall fund is reported as a major fund in the current year. The project is in the construction stage, with construction costs of \$21.2 million paid during the year. Groundbreaking took place on March 20, 2008. Construction is expected to be completed in December 2009. City offices are expected to begin relocating to the new building in February 2010.

Las Cruces Convention Center

In October 2007, the City secured a loan from New Mexico Finance Authority in the amount of \$27,361,565 to design and construct a convention center to meet the growing demands of the community. The convention center fund is reported as a major fund in the current year. The project is in the preliminary stages, with architectural and engineering services of \$1.4 million paid during the year. Groundbreaking took place on June 29, 2009. The Center will be 55,000

square feet with just over 30,000 square feet of meeting space. The facility will feature a 15,000 square foot exhibition hall as well as a 9,000 square foot ballroom. There will be 6 break-out rooms totaling over 3,000 square feet. Additionally, there will be over 5,000 square feet of outdoor space and 2,000 square feet of indoor pre-function space. It is expected to be completed by the end of 2010.

Sonoma Ranch

The Sonoma Ranch fund is major fund in fiscal year 2009. The fund was established to account for the reimbursement to the City, through certain assessments, for construction of public works projects in this area. The City secured a \$9.9 million loan from NMFA to finance public works projects. A municipal lien has been recorded on the property that directly benefits from these projects until such time as the amounts due to the City are paid.

Proprietary Funds

The Gas, Water, Waste Water, and Solid Waste funds are reported as major funds.

Unrestricted net assets of proprietary funds at the end of the year amounted to \$41,668,340.

Gas Utility

The original revenue budget decreased \$10.4 million during the fiscal year due primarily to a lower cost of gas and mild winter season. Gas sales were \$155,134 less than the final budget. Additionally, the City is the operator for the Rio Grande Natural Gas Association (RGNGA). During fiscal year 2009, the Gas fund was reimbursed \$2.4 million for operational and capital services provided to RGNGA. Total revenues for the year were approximately \$23,095 above the final budget

The original expense budget was reduced by \$9.8 million. Of this amount, \$9.7 was attributable to the decrease in the cost of gas.

Actual expenses were approximately \$1.5 million less than the final amended expenses budget.

These variances can be summarized as follows:

- The budget for customer services was \$766,922 more than actual due to vacancies in shared services and the delay of budgeted projects.
- The budget for payment in lieu of taxes was \$211,455 higher than actual expenses. Payment in lieu of taxes is related to revenue and as the gas revenues decrease, the payment in lieu of tax decreases.
- The budget for repairs and maintenance was \$131,311 more than actual expenses due to postponed rehabilitation projects.

Water Utility

The original revenue budget remained unchanged throughout the fiscal year. Actual Water sales were \$866,666 less than the final budget, due primarily to lower sales because of a slowdown in housing starts and the sluggish economy during fiscal year 2009.

Other revenue was \$341,828 above final budget due mainly to the allocation of the revenue from shared services.

The budget for operating expenses in Water reflects an overall increase of \$372 thousand from the original budget to the final budget. This is mainly due to an increase of \$87 thousand in supplies, \$65 thousand in professional services, and \$172 thousand in various other expenses.

Actual expenses were \$2.5 million less than the final expense budget. These variances can be summarized as follows:

- Professional services were below budget by \$877,103, which was due primarily to lower consulting and legal expenses.
- Depreciation was under budget by \$683,982 because the water department acquired fewer capital assets than expected.
- The budget for customer services was \$520,958 more than actual due to personnel vacancies and deferred projects.

Wastewater Utility

The revenues budget remained unchanged throughout the fiscal year. Actual revenues for the fiscal year were \$7,909 less than the final budget.

The expense budget increased from the original budget to the final budget by \$141,019. Of this amount, the depreciation and amortization budget increased \$159,508. Other budget reductions offset the large increase.

Actual expenses were approximately \$1.9 million less than the final expenditures budget. These variances can be summarized as follows:

- Depreciation was under budget by \$887,475 due to the wastewater department acquiring fewer assets than expected.
- The budget for customer services was \$324,171 more than actual due to personnel vacancies and deferred projects.
- Professional services were lower than budget by \$254,758, due largely to a reduced number of engineering services and feasibility studies during the year.
- The budget for supplies was \$226,086 more than actual, attributed to lower prices on chemicals and field supplies used at the treatment plant.

**CITY OF LAS CRUCES, NEW MEXICO
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009**

Solid Waste Utility

The original revenue budget remained unchanged during the fiscal year. Actual Solid Waste sales were \$197,910 less than the final budget.

Budgeted expenses in Solid Waste increased \$1,349,658 from the original budget to the final budget, which included an increase in repairs and maintenance of \$430,000 and professional services of \$877,737.

Actual expenditures were \$2.8 million less than the final budget. The major variances include:

- Professional services were lower than budget by \$2.6 million. This is mainly attributed to a delay in the completion of the landfill closure activity, which was not completed as planned. Construction at the site was budgeted, but not spent.
- The budget for customer services was \$371 thousand more than actual due to personnel vacancies and deferred projects.

Debt Service

Long-term Debt

At the end of fiscal year 2009, the City had total long-term debt outstanding of \$170,464,972 in bonds, notes and leases, a net decrease of \$2,892,142 over the prior year. During the year, the City had borrowings from NMFA totaling \$11,272,474. Decreases to long-term liabilities include lease principal payments of \$238,349 and bond debt service payments of \$10,740,000.

Additional information on the City's debt can be found in Note 7.

Capital Assets

The City's investment in capital assets for its governmental and business-type activities as of June 30, 2009 amounts to \$496,875,225, net of accumulated depreciation. This investment in capital assets includes land, buildings, land and building improvements, leasehold improvements, equipment, infrastructure, and construction in progress. The total increase in the City's investment in capital assets for the current fiscal year, net of accumulated depreciation, was 25.3 percent (a 14.5 percent increase for governmental activities and a 10.8 percent increase for business-type activities).

Major capital asset events during the current fiscal year included the following:

- Completion of several of the City's public works and facilities projects and additional equipment increased the City of Las Cruces capital assets by \$32.9 million, which includes capital assets contributed by developers of \$5.6 million.
- The retirement of capital assets was \$1.7 million. This includes equipment sold at public auction and infrastructure retirements.
- Construction continued on several of the City's utility projects as \$15.2 million was added in utility infrastructure systems and equipment.
- Retirement of utility capital assets totaled \$5.6 million this year.

Additional information on the City's capital assets can be found in Note 4.

Economic Outlook

The City of Las Cruces, while still faring better than the nation, has not been immune from the recession which started in December 2007. A table containing an array of economic indicators clearly shows the mixed performance made by the City during the last twenty four months. The trends show growth only in population. The construction industry has shown a continued drop in fiscal year 2009 and lodging tax receipts reflect the cutback in discretionary spending as a result of pervasive job losses in most states, including New Mexico.

**CITY OF LAS CRUCES, NEW MEXICO
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009**

Las Cruces Economic Indicators				
Item	Fiscal Year		Change	
	2009	2008	Number	Percent
Total Employment (MSA)*	68,808	69,075	(267)	-0.4%
Lodging Tax Receipts	\$1,663,616	\$1,785,109	\$ (121,493)	-6.8%
Gross Receipts Tax	\$70,169,219	\$72,665,014	\$ (2,495,795)	-3.4%
Single Family Building Permits	562	675	(113)	-16.7%
Total Permit Valuation (Millions)	\$182.1	\$184.9	\$ (2.8)	-1.5%
Population Estimate**	91,865	89,722	2,143	2.4%

* Preliminary - Data for Metropolitan Statistical Area

** Census Bureau Estimates as of July 1

For fiscal year 2009/2010, the City anticipates a slow turn around as the national economy begins to recover. The past two fiscal years have seen the gross receipts tax fall as construction activity centered on single family housing continued to decline. Total valuation, while down, was buoyed in part by commercial activity.

The other significant tax used for funding City government is the property tax. This revenue source, while showing the effects of rapid construction adding to the base value, is more modest in its gains. The State of New Mexico controls the rate of property tax increase allowed based on formulas tied to inflation. One formula controls the rate of increase in the mill levy and another controls the rate of increase in the assessed value of residential property. While new construction is added to the base, revenue increases on existing properties are subjected to the formula. By limiting gains in assessed value tax gains that would result from increased values on existing property are also limited. The result is property tax growth that is moderated and relatively stable.

One financial indicator of the City's financial health is change in fund balance for the General Fund. Since this fund is the main source for providing city services, growth in fund balance reflects financial management practices that, while mindful of meeting increasing demands, demonstrate prudent fiscal management grounded in a long run perspective.

While the General Fund balances are anticipated to ebb slightly over the time horizon, the City can continue to provide its citizens services and employees competitive wages because of a healthy fund balance. This ability is a dividend of the City's prudent fiscal management practice and is allowing the City to navigate the recession while maintaining services.

The economy should, however, continue to outpace New Mexico as a whole and Las Cruces is well positioned to benefit when the economy returns to expansionary mode over the next five years.

Requests for Information

This financial report is designed to present users with an overview of the City's finances and to demonstrate the City's accountability. If you have questions concerning any of the information provided in this report or need additional financial information, contact

City of Las Cruces
Reconciliation of the Governmental Funds
Balance Sheet to the Statement of Net Assets
June 30, 2009

Total fund balances for governmental funds	\$ 118,792,568
Amounts reported for governmental activities in the statement of net assets are different because:	
Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds.	297,431,705
The amount due from South Central Solid Waste Authority is not available to pay for current-period expenditures and is, therefore, not reported in the funds.	4,312,000
Bond issuance costs of \$695,936 are expensed for fund financial statements versus capitalized for government-wide financial statements (less accumulated amortization of \$59,027).	636,909
A portion of the assets (including capital assets \$899,383) and liabilities (including long-term debt of \$5,175,179) of internal service funds are included in governmental activities in the statement of net assets.	3,946,619
Telshor facility lease payments received are deferred in the statement of net assets and recognized over the lease term.	(1,514,654)
Some liabilities, including long-term obligations, applicable to the City's governmental activities are not due and payable in the current period and, accordingly, are not reported in the funds.	<u>(108,382,802)</u>
Net assets of governmental activities	<u>\$ 315,222,345</u>

The accompanying notes are an integral part of these financial statements.

The accompanying notes are an integral part of these financial statements.

City of Las Cruces
Reconciliation of the Statement of Revenues,
Expenditures and Changes in Fund Balance of
Governmental Funds to the Statement of Activities
For the Year Ended June 30, 2009

Net change in fund balances—governmental funds \$(32,661,723)

Amounts reported for *governmental activities* in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlays of \$51,637,585 exceeded depreciation expense of \$13,757,342 and sale of capital assets of \$259,853 . 37,620,390

Bond issuance costs are amortized to interest expense over the life of the bond in the statement of activities. This is the current year amortization. (15,067)

Proceeds from the issuance of long-term obligations provide current financial resources to governmental funds and increase long-term liabilities in the statement of net assets. Repayment of debt principal is an expenditure in the governmental funds, but the current year principal repayment reduces long-term liabilities in the statement of net assets. This is the amount by which proceeds of \$9,749,434 exceeded repayments of \$8,298,537 and the change in bond premium/discount of \$47,961. (1,402,936)

Principal payments by South Central Solid Waste to the City's debt service fund are reported as revenue in the debt service fund but reduce assets on the statement of net assets. (640,000)

The change in the liability for compensated absences affects expenses reported in the statement of activities but does not require the use of current financial resources and is therefore not reported as expenditures in governmental funds. (91,658)

Revenues from donated capital assets are reported in the statement of activities, but do not provide current financial resources and are not reported as revenues in the governmental funds. 5,737,642

Payments received related to the Telshor facility lease are recognized over the term of the lease in the statement of net assets, but not in the funds. This is the amount recognized in the current year. 277,967

Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications, to individual funds. A portion of the change in net assets of internal service funds is reported with governmental activities. 385,957

Change in net assets of governmental activities \$ 9,210,572

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

1) Description and Reporting Entity

The City of Las Cruces (the “City”) is a municipal corporation established under the laws of the State of New Mexico and operates under a Home Rule Charter. The City was incorporated in 1946 and operates under a Council/Manager form of government consisting of a Mayor and six Council members. The Mayor is elected at large for a four-year term. Council members are elected from six single member districts to four-year terms. Elections are held bi-annually. The City Manager, appointed by the City Council, is responsible for the management of all City employees and the administration of all City affairs.

The accompanying financial statements present the activities of the City of Las Cruces and its three component units; legally separate organizations for which the City is financially accountable. The component units are:

<u>Component Unit</u>	<u>Included in the Reporting Entity Because:</u>	<u>Separate Financial Statements</u>
City of Las Cruces Public Housing Authority (PHA)	City appoints and may remove the Board, which allows the City to impose its will.	Available at PHA offices at 926 S. San Pedro, Las Cruces, New Mexico 88001
South Central Solid Waste Authority (SCSWA)	In accordance with the joint powers agreement (JPA), SCSWA revenues are the primary source of debt service for City bonds issued to construct a regional landfill and transfer station.	Separate financial statements are available for SCSWA at 200 N. Church St., Las Cruces, New Mexico 88001.
Tax Increment Development District (TIDD)	The Board members for the TIDD are also the board members for the City of Las Cruces, which allows the City to impose its will.	Separate financial statements are available for TIDD at 200 N. Church St., Las Cruces, New Mexico 88001.

PHA and SCSWA are reported as discrete component units in the accompanying financial statements. The TIDD is reported as a blended component unit in the accompanying financial statements.

2) Basis of Presentation, Basis of Accounting

Basis of Presentation

Government-Wide Statements—The statement of net assets and the statement of activities display information about the primary government (the “City”) and its component units. These statements include the financial activities of the overall government, except for

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

2) Basis of Presentation, Basis of Accounting — continued

Basis of Presentation — continued

fiduciary activities. Eliminations have been made to minimize the double-counting of internal activities. These statements distinguish between the governmental and business-type activities of the City. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties.

The statement of activities presents a comparison between direct expenses and program revenues for the different business-type activities of the City and for each function of the City's governmental activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function.

Program revenues include (a) fees, fines, and charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from nonexchange transactions or ancillary activities. Proprietary fund operating expenses include the cost of services, administrative and general expenses and depreciation on capital assets.

All proprietary funds of the City follow FASB Statements and Interpretations issued on or before November 30, 1989, Accounting Principles Board Opinions, and Accounting Research Bulletins, unless those pronouncements conflict with GASB pronouncements. The City has also elected to apply FASB Statements and Interpretations issued after November 30, 1989, unless those pronouncements conflict with GASB pronouncements.

Fund Financial Statements—The fund financial statements provide information about the City's funds, including its fiduciary funds. Separate statements for each fund category—governmental, proprietary, and fiduciary—are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds.

The City reports the following as major governmental funds:

- ◆ The general fund is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

2) Basis of Presentation, Basis of Accounting — continued

Basis of Presentation — continued

- ◆ The Las Cruces Convention Center fund accounts for the receipt of the convention center fees paid to support the debt service payments for the convention center.
- ◆ The 2005 gross receipts tax city hall fund accounts for the resources accumulated and payments made for the construction of the new city hall.
- ◆ The Sonoma Ranch fund accounts for the reimbursements from local developers to the City for debt service on special roadway/utility projects.

The City reports the following major enterprise funds:

- ◆ The Gas fund accounts for the activities of the City's natural gas utility, which provides service to the residents of the City and some residents within the County.
- ◆ The Water fund accounts for the activities of the City's natural water utility, which provides service to the residents of the City and some residents within the County.
- ◆ The Wastewater fund accounts for the activities of the City's wastewater utility, which provides service to the residents of the City and some residents within the County.
- ◆ The Solid Waste fund accounts for the activities of the City's solid waste utility, which provides service to the residents of the City and some residents within the County.

The City also reports the following fund types:

- ◆ *Internal Service Funds*—used to report activities that provide goods or services to other funds, departments or agencies of the City and its component units on a cost-reimbursement basis. These activities include fleet services, information technology, document services, vehicle acquisition and risk management, general liability and malpractice, and workers' compensation coverage provided on a cost-reimbursement basis.
- ◆ *Agency Funds*—used to account for monies held by the City in a custodial capacity. These funds do not report operations or have a measurement focus. The funds held by the City in a fiduciary capacity include: Rio Grande Natural Gas Association (cash only); Mesilla Valley Regional Dispatch Authority; Metro Narcotics Agency; Animal Service Center of the Mesilla Valley; Mesilla Valley Safety Council; Lower Rio Grande Water Users Organization; Branigan Estate (proceeds of sales of assets is used to purchase books for the library); Employee Benefits Committee; Veteran's Memorial Wall; Veteran's Museum; and Gifts and Memorials.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

2) Basis of Presentation, Basis of Accounting — continued

Measurement Focus, Basis of Accounting

Government-Wide, Proprietary, and Fiduciary Fund Financial Statements—The government-wide and proprietary fund financial statements are reported using the economic resources measurement focus. The government-wide and proprietary fund financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place.

Nonexchange transactions, in which the City gives (or receives) value without directly receiving (or giving) equal value in exchange, include gross receipts and property taxes, grants, entitlements, and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. Revenues from gross receipts taxes are recognized when the underlying transaction takes place. Revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Governmental Fund Financial Statements—Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. The City considers all revenues reported in the governmental funds to be available if the revenues are collected within sixty days after year-end. Property taxes, sales taxes, franchise taxes, licenses, and interest are considered to be susceptible to accrual. Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, claims and judgments, and compensated absences, which are recognized as expenditures to the extent they have matured. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Under the terms of grant agreements, the City funds certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Thus, when program expenses are incurred, there are both restricted and unrestricted net assets available to finance the program. It is the City's policy to first apply cost-reimbursement grant resources to such programs, followed by categorical block grants, and then by general revenues.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent liabilities at the date of the financial statements. Actual results could differ from those estimates.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

2) Basis of Presentation, Basis of Accounting — continued

Fair Value of Financial Instruments

The City's financial instruments consist of investments in securities, bonds and notes payable. The City estimates that the fair value of all its financial instruments does not differ materially from their aggregate carrying values in the accompanying statement of net assets. The estimated fair value amounts have been determined by the City using available market information and appropriate valuation methodologies. Considerable judgment is necessarily required in interpreting market data to develop the estimates of fair value, and, accordingly, the estimates are not necessarily indicative of the amounts that the City could realize in a current market exchange. None of the financial instruments are held for trading purposes.

Assets, Liabilities and Equity

Cash Equivalents and Investments

The City pools idle cash from all funds for the purpose of increasing income through investment activities. A "Pooled Cash" concept is used in maintaining the cash and investment accounts in the accounting records. Under this method, all cash is pooled for investment purposes and each fund has equity in the pooled amount. All amounts included in pooled cash and investments with an original maturity of 90 days or less are considered to be cash equivalents for the purposes of the statement of cash flows.

Investments are stated at fair value.

Restricted Cash and Investments

The amount of cash held representing utility deposits is classified as restricted on the *Statement of Net Assets—Propriety Funds*. Also, certain proceeds of joint utility revenue bonds, as well as resources set aside for their repayment and resources set aside to fund capital asset replacements, are classified as restricted as their use is limited.

Receivables

Property taxes attach as an enforceable lien on property as of January 1. Taxes are levied each year on July 1 on the taxable valuation of property location in the City as of the preceding January 1. The taxable valuations for the various classes of property are determined by the County Assessor and the State of New Mexico Department of Taxation and Revenue at one-third of assessed valuation. Taxes are payable in two equal installments on November 10 and April 10 and become delinquent after 30 days. Property taxes receivable are deemed to be substantially collectible.

All trade receivables are shown net of an allowance for uncollectible amounts. The allowance for doubtful accounts is based on management's assessment of the collectibility of specific customer accounts, the aging of the accounts receivable, historical experience, and other currently available evidence. Notes receivable in the statement of net assets consist of rehabilitation and redevelopment loans that are generally not expected or scheduled to be collected in the subsequent year.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

2) Basis of Presentation, Basis of Accounting — continued

Assets, Liabilities and Equity — continued

Inventories and Prepaid Items

Inventories are valued at cost using the first-in/first-out (FIFO) method. The costs of governmental fund-type inventories are recorded as expenditures when consumed rather than when purchased.

Certain payments to vendors reflect costs applicable to future accounting periods and are recorded as prepaid items in both government-wide and fund financial statements.

Capital Assets

Capital assets are defined as assets with an initial individual cost or fair value of more than \$5,000 and an estimated useful life in excess of one year. Purchased and constructed capital assets are reported at cost or estimated historical cost. Donated capital assets are recorded at their estimated fair value at the date of donation. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets' lives are not capitalized.

Major general infrastructure assets acquired prior to July 1, 2001, are the road network and the flood control network. The City has retroactively reported all major general infrastructure in the financial statements as of June 30, 2008.

The initial purchase of software meeting the City's capital asset definition is capitalized; however, periodic costs for software upgrades are not capitalized due to the rapid change in technology.

In accordance with provisions of GASB No. 34, the City regards library materials (e.g., books, tapes, etc.), museum collections, and public exhibits as individual assets versus collections and, therefore, they are not capitalized.

Construction period interest on the City's proprietary fund capital projects is not capitalized due to the nature of the projects, which may not be continuous in nature and there may be lapses in the construction period.

Capital assets are depreciated using the straight-line method over the following estimated useful lives:

<u>Asset Class</u>	<u>Estimated Useful Lives</u>
Infrastructure	30–50
Buildings and improvements	30
Vehicles	4–12
Office equipment	3–10
Computer equipment	3–10

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

2) Basis of Presentation, Basis of Accounting — continued

Assets, Liabilities and Equity — continued

Compensated Absences

The liability for compensated absences reported in the government-wide and proprietary fund statements consists of unpaid, accumulated annual and sick leave balances. The liability has been calculated using the vesting method, in which leave amounts for both employees who currently are eligible to receive termination payments and other employees who are expected to become eligible in the future to receive such payments upon termination are included.

Pollution Remediation

The City has elected to implement the provisions of Government Accounting Standards Board Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation*, obligations. Accordingly, liabilities are accrued in government-wide and proprietary fund financial statements when certain obligating events occur. Accrued pollution remediation costs are expensed unless they meet the criteria for capitalization in GASB Statement No. 49.

Budgets

The City budget is prepared on a basis consistent with accounting principles generally accepted in the United States of America (GAAP), using an estimate of the anticipated revenues and expenditures. Annual appropriated budgets are adopted for all funds. All unexpended appropriations lapse at the end of the fiscal year. The State of New Mexico Department of Finance and Administration (DFA) allows GAAP budgeting to the extent cash and investments required for operations are available. Budgets of the City's component units (PHA and SCSWA) are also prepared on a GAAP basis.

New Mexico State law prohibits a municipality from making an expenditure in excess of approved appropriations. If a fund is not overspent, it is in compliance with state law. The budget may be amended by the City Council; however, DFA approval must be obtained on budget increases and budget transfers between funds. The 2007/2008 budget has been legally amended.

New Accounting Pronouncements

The following accounting pronouncements have been recently issued, but not yet adopted by the City. Management anticipates that, upon adoption by the City, none of these statements will have a significant impact on the City's financial position or results of operations.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

2) Basis of Presentation, Basis of Accounting — continued

New Accounting Pronouncements — continued

GASB 51, *Accounting and Financial Reporting for Intangible Assets*, requires that all intangible assets not specifically excluded by its scope provisions be classified as capital assets. The statement also provides authoritative guidance on the nature of these intangible assets. The requirements of this statement are effective for financial statements for periods beginning after June 15, 2009. The provisions of this Statement generally are required to be applied retroactively.

GASB 53, *Accounting and Financial Reporting for Derivative Instruments*, requires governments measure most derivative instruments at fair value in their financial statements and provides specific criteria that governments will use to determine whether a derivative instrument will result in an effective hedge. The statement also provides guidance of disclosures to provide a summary of the derivative instrument activity and objectives for derivative instruments, their significant terms, and the associated risks. The requirements of this statement are effective for financial statements for periods beginning after June 15, 2009, with earlier application encouraged.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

3) Cash and Investments

Cash and investments of the City and South Central Solid Waste Authority (SCSWA) are pooled, except for restricted funds generally held by outside custodians and certain special revenue, debt service reserve, and capital projects funds. The pooled investment account is not reported as a trust and agency fund. Each fund's equity in the pooled account is included in cash and investments on its balance sheet or statement of net assets. Cash and investments of the city and SCSWA at June 30, 2009, were:

Cash and investments

ordinance requires collateralization of 50% of the uninsured portion of the City's deposits with financial institutions. Securities pledged by financial institutions are accepted at market value, except obligations of the state of New Mexico and its subdivisions, which are accepted at par value. As of June 30, 2009, the City's deposits, totaling \$375,766, was 100% insured by FDIC, and thus was not exposed to custodial credit risk.

Investments

The City's investment policy allows investment in: a) U.S. Treasury obligations; b) U.S. government agency and instrumentality obligations; c) repurchase agreements whose underlying securities and/or collateral consist of allowed investments described in (a) or (b) above; d) commercial paper rated not less than A-1, P-1, F-1, or equivalent by a nationally recognized rating agency; e) pooled funds maintained by the State Treasurer; and f) mutual funds whose portfolios consist solely of allowed investments. In addition, the City may invest money identified as long-term in the pools of the New Mexico State Investment Council subject to annual review and approval by the City Council.

Also, the City may invest money identified as long-term in the pools of the New Mexico State Investment Council (SIC) subject to annual review and approval by the City Council. The SIC is a component unit of the primary government of the State of New Mexico. Fair value of the City's position in the SIC pools is the same as the value of the pool shares.

As of June 30, 2009, the City had the following investments:

Investment Type	Fair Value	Weighted Avg Maturity (Yrs)
Pooled Investments		
Money market funds	\$ 13,870,209	0.08

Interest Rate Risk. The City's general investment policy is to apply the prudent investor rule to manage its exposure to declines in fair value. One of the ways that the City manages its exposure to interest rate risk is by purchasing a combination of relatively shorter term investments and by timing cash flows from maturities so that a portion of the portfolio is maturing or coming close to maturity evenly over time as necessary to provide the cash flow and liquidity needed for operations.

Credit Risk. The City's investment policy lists the criteria for selecting investments and the order of priority as follows: 1) safety; 2) liquidity; and 3) yield. As of June 30, 2009, the City's investments in the senior unsecured debt and short-term discount notes of U.S. agencies were rated AAA and A-1+, respectively, by Standard & Poor's and Aaa and P-1

City of Las Cruces
Notes to Basic Financial Statements

3) Cash and Investments — continued

Investments — continued

by Moody's Investors Service. Mortgage-backed securities issued by U.S. agencies were rated AAA by Standard & Poor's and Aaa by Moody's. Positions in commercial paper were rated P-1 by Moody's and A-1 or A-1+ by Standard & Poor's. The City's money market fund investments were rated AAAM by Standard & Poor's and/or Aaa by Moody's. The external investment pools of the NM State Investment Council are not rated.

The City invests in the New Mexico State Treasurer's Local Government Investment Pool (LGIP). LGIP operates as a money market fund, maintaining a \$1.00 per share net asset value. On September 16, 2008 LGIP held investments in the Reserve Primary Fund, which was downgraded from "AAA" to "D." The amounts and timing of future distributions from the Reserve Primary Fund are uncertain. LGIP provided for its potential loss in that Fund by transferring proportionate amounts of the City's investments in LGIP as of September 16, 2008 to a Reserve Contingency Fund, a non-performing fund that represents claims against future distributions of principal from the Reserve Primary Fund. As of June 30, 2009, \$734,328 of the City's investments in LGIP was in the Reserve Contingency Fund and was written down to a fair value of \$0.00. On October 7, 2009, the City recovered \$138,668 of the amount written off for fiscal year 2009.

The City requires the balance in flexible repurchase agreements to be collateralized at 104% for direct obligations of the U.S. Government or the Government National Mortgage Association and at 105% for other U.S. agency obligations.

Custodial Credit Risk. For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The City's investment policy requires that securities held in street name with a broker or dealer be insured, and that all other securities be held by the City or a third-party safekeeping financial institution acting as trustee for the City. As of June 30, 2009, all of the City's securities are held by a third-party financial institution in the City's name.

Concentration of Credit Risk. The City's formal investment policy places no limit on the amount the City may invest in any one issuer. As of June 30, 2009, 25% of the City's investment pool was in Federal Home Loan Bank (FHLB), 27% in Federal Home Loan Mortgage Corporation (FHLMC), and 17% in Federal National Mortgage Association (FNMA). Of the Telshor Facility Fund portfolio, 23% was in FHLMC, 10% in FHLB, and 22% in FNMA.

6) **Risk Management**

The City is exposed to various risks of loss related to torts and civil rights claims (including law enforcement and employment related exposures); theft, damage and destruction of its real and personal assets; workers' compensation losses; errors and omissions of City officers and officials; and natural disasters. The City uses the insurance fund (an internal service fund) to account for and finance its uninsured risks of loss. At various periods in past years, certain risk exposures were insured and the City continues to benefit from case coverage on claims that were incurred during those claim years.

The insurance fund tracks claims on a fund by fund basis and assesses charges to each fund based on historical claims experience and the need to establish a reserve for unanticipated catastrophic losses. The claims liabilities reported in the insurance fund are based on the requirements of Governmental Accounting Standards Board Statement No. 10, which requires that a liability for claims be reported if information prior to the issuance of the financial statements indicates that it is probable that a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated.

The risk of loss associated with actions of employees resulting in damage to persons or property of others is subject to limitations of the New Mexico State Tort Claims Act. The self-insurance fund uses excess insurance agreements to reduce its exposure to large losses from employee on-the-job injuries. Excess insurance permits recovery of a portion of losses from the excess insurer, although it does not discharge the primary liability of the fund as direct insurer of the risks.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

6) Risk Management — continued

Self-insurance premiums and program costs (claims, fees, and transfers to other funds, less reimbursed expenses) were:

	2009	2008
Health program costs	\$ 58,814	\$ 35,976
Workers' compensation premiums	(3,106,599)	(2,262,939)

	<u>81,762,012</u>	<u>20,754,000</u>	<u>(25,676,360)</u>	<u>76,839,652</u>	<u>5,863,025</u>
Total long-term liabilities	<u>\$ 193,494,306</u>	<u>\$ 34,528,887</u>	<u>\$(37,625,560)</u>	<u>\$ 190,397,633</u>	<u>\$ 15,667,765</u>

Compensated absences typically have been liquidated in the fund to which the employees are assigned. Claims and judgment liabilities have typically been liquidated in the general and the self-insurance fund (an internal service fund).

Description of Bonds

Gross Receipts Tax and Gasoline Tax Revenue Bonds—In 1999, the City issued the Gross Receipts Tax Revenue Bonds, Series A, for street projects and to refund 1991 Sales Tax Revenue Bonds (for interest savings). The City also issued Gross Receipts Tax Revenue Bonds, Series B, for flood control projects. These bonds are secured by a pledge of certain future gross receipts tax through maturity. For the current year, such pledged revenues totaled \$12.3 million while principal and interest paid were \$1,350,000 and \$272,295 for Series A and \$510,000 and \$171,695 for Series B, respectively.

City of Las Cruces

7) Long-Term Liabilities — continued

Description of Bonds — continued

In 2000, Gasoline Tax Revenue Bonds, Series A, were issued to fund various street projects. The bonds are payable from gasoline tax revenues distributed monthly by the State of New Mexico to the City and are secured by such revenues through maturity. Such revenues totaled \$1,500,597 in 2009. Principal and interest paid on the bonds for the current year were \$345,000 and \$176,398.

Gross Receipts Tax Refunding and Improvement Revenue Bonds, Series 2003, were issued to fund facilities and park improvement projects, acquire street lighting systems, and refinance the outstanding Gross Receipts Tax Refunding Revenue Bond, series 1992. These bonds are secured through maturity by state shared gross receipts tax revenues. Such revenues were \$30.8 million in 2009. For the current year, principal and interest paid on the bonds were \$1,115,000 and 253,860, respectively.

In 2004, the City issued the South Central Solid Waste Authority Environmental Gross Receipts Tax/Project Revenue Bonds with the purpose of refunding the outstanding 1995 Series. The bond is payable from and secured through maturity by a portion of the Authority net revenues which totaled \$1.5 million in 2009. The bond issue is secondarily secured by the environmental gross receipts tax of the City. For the current year, such pledged revenues totaled \$1,519,556 while principal and interest paid were \$640,000 and \$198,766.

Gross Receipts Tax Revenue Bonds, Series 2005, were issued to fund public parks and recreational facilities, improve streets, acquire public buildings, construct and furnish public buildings, and fund the environmental remediation of public property. These bonds are secured by certain gross receipts tax revenues through maturity. Such revenues were \$6,075,852 in 2009. For the current year, principal and interest paid on the bonds were \$1,215,000 and \$1,307,005, respectively.

				<u>\$ 76,005,000</u>	<u>\$ 48,950,000</u>	

Debt Service Requirements

Future debt service requirements for governmental activities revenue bonds are:

<u>Year Ending June 30,</u>	<u>Principal</u>	<u>Interest</u>
2010	\$ 4,805,000	\$ 2,150,279
2011	4,485,000	1,944,401
2012	4,710,000	1,753,657
2013	4,255,000	1,551,603
2014	4,200,000	1,364,486
2015 - 2019	10,950,000	4,352,532
2020 - 2035	<u>15,545,000</u>	<u>6,513,489</u>
	<u>\$ 48,950,000</u>	<u>\$ 19,630,447</u>

Defeased Bonds

During prior fiscal years, the City entered into various advance refunding transactions related to certain of its bonded debt. A portion of the proceeds of the refunding issues was placed in trust and used to purchase securities of the U.S. government and related agencies at various interest rates and maturities sufficient to meet all debt service requirements of the refunded debt. The assets are administered by trustees and are

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

7) Long-Term Liabilities — continued

Defeased Bonds — continued

restricted for retirement of refunded debt. The liability for the refunded bonds and the related securities and escrow accounts are not included in the accompanying financial statements since the City defeased its obligation for the payment of the refunded bonded debt upon completion of the refunding transactions.

Bond issues that are outstanding but have been defeased and are payable from escrow accounts are:

Joint utility revenue, series 1992	\$ 1,670,000
Sales tax, series 1991	1,215,000
Sales tax, series 1995	39,085,000
Joint utility revenue, series 1997A	<u>18,700,000</u>
	<u>\$ 60,670,000</u>

Nonrecourse (Conduit) Debt

The City has issued Industrial Revenue Bonds to provide financial assistance to private-sector entities for the acquisition and construction of industrial and commercial facilities deemed to be in the public interest. The bonds are secured by the property financed and are payable solely from payments received on underlying mortgage loans. The City is not obligated for repayment of the bonds. Accordingly, the bonds are not reported as liabilities in the accompanying financial statements. As of June 30, 2009, there were five series of Industrial Revenue Bonds outstanding, with an aggregate principal amount payable of \$39,960,457.

Arbitrage

Under U.S. Treasury Department regulations, all governmental tax-exempt debt issued after August 31, 1986, is subject to arbitrage rebate requirements. The requirements stipulate, in general, that the earnings from the investment of tax-exempt bond proceeds, which exceed related interest expenditures on the bonds, must be remitted to the federal government on every fifth anniversary of each bond issue. The City periodically engages an independent consultant to determine whether the City has an arbitrage liability. No arbitrage liability is reported in the financial statements as of June 30, 2009.

Joint Utility Revenue Bonds

In 2005, the City issued \$11.05 million in joint utility revenue bonds (Series 2005) to provide funds for water expansion projects.

In 2006, the City issued \$17,575,000, in joint utility revenue bonds (Series 2006). Certain proceeds of this issuance were deposited in the Acquisition Fund and used to finance the acquisition, installation, and construction of water and waste water capital improvements. Additionally, certain proceeds were used to fund the Reserve Requirement and pay costs of issuance relating to these Bonds.

In 2009, the City issued \$17.6 million in joint utility refunding revenue bonds (Series 2009), with an average interest rate of 2.82%, to defease \$18.2 million of outstanding 1997 Series bonds and refund \$2.0 million of outstanding 2000 Series bonds. The 2009 Series bonds are secured by, and payable exclusively from, the net revenues of the utility system. Bond proceeds of \$17.7 million plus an additional \$5.1 million of 1997 and 2000 sinking fund monies were used to purchase U.S. government securities to defease \$18.7 million of the 1997 Series bonds and to advance refund \$2.0 million of the 2000 Series bonds. These monies contemporaneously funded a reserve account for the Series 2009 Bonds and paid all costs and expenses pertaining to their issuance.

The securities for the 1997 Series bonds were deposited in an irrevocable trust with an escrow agent to provide for one refunding debt service payment on the 1997 Series bonds. As a result, all of the 1997 Series bonds are considered to be defeased and the liability for those bonds has been removed from the enterprise fund liabilities.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

7) Long-Term Liabilities — continued

Joint Utility Revenue Bonds — continued

The 2000 series bonds were called and fully refunded using the proceeds of the Series 2009 bonds. The liability for the 2000 series bonds has been removed from the enterprise fund liabilities.

The advance refunding resulted in a difference between the reacquisition price and the net carrying amount of the old debt of approximately \$940,000. The advance refunding will reduce the present value of the total debt service payments over the following 7 years by approximately \$3.6 million resulting in an economic gain (difference between the present values of the old and new debt service payments) of approximately \$1.7 million.

Additional information is available in the City of Las Cruces, New Mexico Joint Utility Refunding Revenue Bonds Series 2009 Official Statement.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

7) Long-Term Liabilities — continued

Joint Utility Revenue Bonds — continued

The 1997 revenue bond ordinance provides that the net revenue of the City's utility systems shall be used to service the debt and shall be at least 133% of the maximum outstanding debt requirements for the utility system; the 2000B revenue bond ordinance requires 125% of the maximum outstanding debt requirements, including those of the 1997 bonds. These debt coverage requirements hold true for the 2005 Series and the 2006 Series Bonds as well. These bonds are not a general obligation to the City, but are payable and collectable solely out of the net revenues of the systems. Net revenue as defined in the bond ordinances means the revenue after deducting operation and maintenance expenses. Operation and maintenance expenses include all reasonable and necessary current expenses of the City, paid or accrued, for operating, maintaining, and repairing the system; and shall include, without limiting the generality of the foregoing, legal and overhead expenses of the various City departments directly related and reasonably allocable to the administration of the system, insurance premiums, the reasonable charge of depository banks and paying agents, contractual services, professional services required by this ordinance, salaries and administrative expenses, labor, the cost of materials and supplies used for current operation; but shall not include any allowance for depreciation, payments in lieu of taxes, liabilities incurred by the City as a result of its negligence in the operation of the system, improvements, extension, enlargements or betterment, or any charges for the accumulation of reserves for capital replacements. The net revenue for the fiscal year ended June 30, 2009, exceeded the maximum annual debt service requirement. Bond reserve accounts have been established to accumulate funds with which to make principal and interest payments on outstanding revenue bonds.

The bond ordinances provide that any monies in any fund or account may be invested in any legal investment permitted by law, with stipulation that investments of amounts in the escrow account will be made only in federal securities. The obligations so purchased as an investment of monies in a fund or account will be deemed at all times to be part of such fund or account, and the interest accruing thereon and any profit realized there from will be credited to the fund or account, and any loss resulting from each investment will be charged to the fund or account. The City Treasurer will present for redemption or sale on the prevailing market any obligations so purchased as an investment of monies in the fund or account whenever it will be necessary to do so in order to provide monies to meet any payment or transfer from such fund or account.

City of Las Cruces
Notes to Basic Financial Statements

7) Long-Term Liabilities — continued

Joint Utility Revenue Bonds — continued

Bond covenants require reporting of the number of utility customers served, which were the following at June 30, 2009:

	Water	Wastewater	Gas	Solid Waste
Residential	27,580	27,175	28,003	27,558
Commercial/other	2,941	2,154	2,515	2,906
Total	<u>30,521</u>	<u>29,329</u>	<u>30,518</u>	<u>30,464</u>

Business-Type Activities Notes Payable

The notes payable of the business-type activities are paid from the net revenues of the system. City ordinance 1593, adopted by the City Council on December 18, 1996 provides authority for the City to issue additional debt with a parity lien on the pledged revenues of the utility system.

A comparison of the pledged revenues recognized during the year with the required debt service for the year is presented in the Pledged-Revenue Bond/Note Coverage Schedule located in the statistical section.

Details of business-type activities notes payable are:

Type	Purpose	Original Date	Balance Due	Issue	Outstanding	Rates

Total business-type activities	<u>\$ 2,258,447</u>	<u>\$ (2,258,447)</u>	<u>\$ -</u>

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

8) Interfund Assets, Liabilities and Transfers — continued

Interfund Transfers

Interfund transfers for the year ended June 30, 2009, consisted of the following:

Transfers to general fund from	
Nonmajor governmental funds	\$ 1,263,831
Internal service funds	3,978
Nonmajor enterprise funds	<u>15,500</u>
Total transfers to the general fund	<u>\$ 1,283,309</u>
Transfers to nonmajor governmental funds from	
General fund	\$ 10,109,446
Nonmajor governmental funds	<u>9,695,435</u>
Total transfers to the nonmajor governmental funds	<u>\$ 19,804,881</u>
Transfers to the water fund from	
Waste water fund	\$ 420,582
Total transfers to the water fund	<u>\$ 420,582</u>
Transfers to the waste water fund from	
Nonmajor governmental funds	\$ 443,568
Water fund	<u>672,793</u>
Total transfers to the waste water fund	<u>\$ 1,116,361</u>
Transfers to solid waste fund from	
Nonmajor governmental funds	\$ 1,000,000
Total transfers to the solid waste fund	<u>\$ 1,000,000</u>
Transfers to nonmajor enterprise funds from	
General fund	\$ 2,324,000
Gas fund	54,400
Nonmajor governmental funds	<u>251,752</u>
Total transfers to the nonmajor enterprise funds	<u>\$ 2,630,152</u>
Transfers to internal service funds from	
General fund	\$ 709,552
Total transfers to internal service funds	<u>\$ 709,552</u>
Transfers from the general fund to	
Nonmajor governmental funds	\$ (10,109,446)
Nonmajor enterprise funds	(2,324,000)
Internal service funds	<u>(709,552)</u>
Total transfers from the general fund	<u>\$ (13,142,998)</u>
Transfers from nonmajor governmental funds to	
General fund	\$ (1,263,831)
Nonmajor governmental funds	(9,695,435)
Waste water water reclamation project fund	(295,200)
Waste water capital improvement fund	(148,368)
Solid waste fund	(1,000,000)
Nonmajor enterprise funds	<u>(251,752)</u>
Total transfers from the nonmajor governmental funds	<u>\$ (12,654,586)</u>

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

8) Interfund Assets, Liabilities and Transfers — continued

Interfund Transfers — continued

Transfers from the gas fund to Nonmajor enterprise funds	\$ (54,400)
Total transfers from the gas fund	<u>\$ (54,400)</u>
Transfers from the water fund to Waste water fund	\$ (672,793)
Total transfers from the water fund	<u>\$ (672,793)</u>
Transfers from the waste water fund to Water fund	\$ (420,582)
Total transfers from the waste water fund	<u>\$ (420,582)</u>
Transfers from nonmajor enterprise funds to General fund	\$ (15,500)
Total transfers from nonmajor enterprise funds	<u>\$ (15,500)</u>
Transfers from the internal service funds to General fund	\$ (3,978)
Total transfers from the internal service funds	<u>\$ (3,978)</u>

Transfers are used to (1) move revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) move receipts restricted to debt service from the funds collecting the receipts to the debt service fund as debt service payments become due, and (3) use unrestricted revenues collected in the General fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

Component Units

Interfunds between the Authority and its component units are as follows:

	December 31, 2008			Total
	Montana Senior Village, LLC	Montana Senior Village II	Stone Mountain Place LP	
Payables to Housing Authority	\$ 680,226	\$ 1,483,941	\$ 256,574	\$ 2,420,741
Receivable from component units, net				1,290,974
Total internal balances				<u>\$ 3,711,715</u>

Interfunds between the Housing Authority and its component units are different because they have different fiscal year-ends.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

9) Contingent Liabilities

The City receives financial assistance from federal and state grants and entitlements. Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The City believes that liabilities resulting from disallowed amounts will not have a material effect on the City's financial statements.

The City is a defendant in various lawsuits. Management estimates that balances available in the self-insurance fund are sufficient to settle such lawsuits. Management is not aware of any other pending or threatened litigation that would adversely affect the City's financial position.

10) Pollution Remediation Obligation

Certain property owned by the City has been declared a Superfund Site by the Environmental Protection Agency (EPA). The EPA has determined that the City is a responsible party along with Doña Ana County, which also owns part of the contaminated property. On April 20, 2005, the City and Doña Ana County established a memorandum of understanding for a Joint Superfund Project (JSP) to work collaboratively with the EPA to complete the Remedial Investigation and Feasibility Study (RIFS) within the Superfund process. In December 2004, the JSP submitted a good-faith offer to the EPA for a Funding Agreement to achieve this objective. In April 2005, a negotiated funding agreement in the amount of \$800,000, payable to the EPA to complete the RIFS, was signed. In October 2005, the EPA and its contractor began the remaining fieldwork, which was completed in fiscal year 2007. As a result of this study, the City accrued a liability of \$6,890,106 to pay its share of the pollution remediation cost, as follows:

	Total Obligation	City's Portion
Capital assets	\$ 5,151,978	\$ 2,575,989
Operating costs	1,459,664	729,832
Completion costs	7,168,571	3,584,285
	\$ 13,780,213	\$ 6,890,106

During fiscal year 2009, JSP worked with attorneys, Marten Group, to “negotiate” an acceptable order or decree from EPA to conduct the clean-up, resolve financial matters,

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

10) **Pollution Remediation Obligation — continued**

and to investigate other responsible parties, for which substantive evidence has been provided to the EPA. The services of a supervising contractor/engineer to design and construct the remediation system have been procured. During fiscal year 2009 sampling of selected monitoring wells was conducted to provide additional data for continued development of the groundwater model by technical consultants. This model will be used to assist in design and operations of the remediation system.

The pollution remediation obligation is reported in long-term liabilities in the statement of net assets (see Note 7). All of the accrued costs have been expensed and are included in the general government function on the statement of activities.

The City and County each received a \$3.5 million loan from the New Mexico Finance Authority (NMFA) to cover some of the costs of the pollution remediation project. The City and County also received \$243,000 in grant funds from the New Mexico Environment Department. \$171,999 was applied to engineering costs in fiscal year 2009.

In subsequent years, the plan calls for the sale of potable water, a by-product of the remediation process, to cover operating and administrative costs. Additionally, EGRT funds may be used for this project.

11) **Deferred Compensation Plan**

The City offers its employees a deferred compensation plan created in accordance with Internal Revenue Service Code Section 457. The plan, available to all City employees, permits them to defer taxation on a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency. All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are solely the property and rights of the plan participants.

The City has 592 active participants in the plan as of June 30, 2009.

12) **Employee Benefit Plans**

Retirement Plan

Substantially all of the City of Las Cruces employees who work 20 or more hours a week participate in a defined benefit contributory retirement plan through the Public Employees Retirement Act of the State of New Mexico, a cost-sharing multiple employer

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

12) Employee Benefit Plans — continued

Retirement Plan — continued

public employee retirement system administered by the Public Employees Retirement Association (PERA). Benefit provisions are established and may only be amended by state statute. Information pertaining to the actuarially computed present value of vested accumulated plan benefits and nonvested accumulated plan benefits, the plan's net assets available for benefits and the assumed rate of return used in computing the present value, and ten-year historical trend information presenting PERA's progress in accumulating sufficient assets to pay benefits when due is not available by individual government agencies participating in the plan. Actuarial pension data for the State of New Mexico, as employer, is provided at the state-wide level in a separately issued audit report of PERA. The report may be obtained by writing to PERA, PO Box 2123, 1120 Paseo de Peralta, Santa Fe, NM 88504-2323.

Retirement Eligibility

Eligibility for receiving the monthly benefit equal to the number of years of credited service x 3.0% (3.5% for police and fire plan employees) of their final average monthly salary, the 36 consecutive months of credited service producing the largest average, is as follows:

Employees may retire at: any age with 25 or more years of credited service; or age 60 or older with 20 or more years of credited service; with the exception of police and fire plan employees who may retire at any age with 20 or more years of credited service. All employees are eligible for retirement at: age 61 or older with 17 or more years of credited service; or age 62 or older with 14 or more years of credited service; or age 63 or older with 11 or more years of credited service; or age 64 or older with eight or more years of credited service; or age 65 or older with five or more years of credited service. Benefits vest after five years of credited service.

Disability Benefits

Members or vested former members with five or more years of credited service will receive their normal retirement pension based on credited service and final average salary at the time of disability or retirement. The five-year service requirement is waived if the disability is incurred in the line of duty. Disability retirements are subject to reevaluation until the disability-retired member reaches normal retirement. Payment of the disability pension is suspended for the balance of any year in which a disability-retired member does not submit an annual statement of earnings from gainful employment by June 30th of each year or if the amount of earnings in the previous year is more than the amount that causes the suspension of, or a decrease in, the Social Security Old Age Benefit for a 65 year old.

City of Las Cruces
Notes to Basic Financial Statements

12) Employee Benefit Plans — continued

Retirement Plan — continued

Funding Policy

The City has chosen to enroll in a plan that requires the following contribution percentages:

	City	Employees
Police	18.50%	16.30%
Fire	21.25%	14.80%
All other contributing employees	11.65%	10.65%

For employees in the general municipal employees' plan, the City has chosen to pay a portion of the employees' 10.65% required contribution as an additional benefit. For union-represented employees, the City contributes an additional 1% of the participants' gross salary; for all other employees in this plan, the City contributes 2%.

Contribution requirements for the years ended are as follows:

	City	Employee	Total	Percentage Contributed
June 30, 2005	\$ 4,799,796	\$ 5,580,795	\$ 10,380,591	100%
June 30, 2006	5,113,911	5,916,678	11,030,589	100%
June 30, 2007	5,490,247	6,331,551	11,821,798	100%
June 30, 2008	5,870,954	6,776,110	12,647,064	100%
June 30, 2009	6,279,412	7,252,412	13,531,824	100%

If a member's employment is terminated before the member is eligible for other benefits under PERA, the member may receive a refund of the member's contribution and interest accrued based on rates established biannually by the retirement board.

The payroll for the City's employees covered by PERA for the year ended June 30, 2009, was \$52,273,262; the total payroll of all employees of the City was \$54,320,294.

Retiree Health Care Plan

The Retiree Health Care Act (Act) (Chapter 10, Article 7C NMSA 1978) provides comprehensive core group health insurance for persons who have retired from certain public services in New Mexico. The Retiree Health Care Authority (the "Authority") is the administrator of the plan and determines required contributions under authority of the Act. The purpose is to provide eligible retirees, their spouses, dependents, and surviving spouses and dependents with health insurance consisting of a plan, or optional plans, of benefits that can be purchased by funds flowing into the Retiree Health Care Fund and by co-payments or out-of-pocket payments of eligible retirees.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

12) Employee Benefit Plans — continued

Retiree Health Care Plan — continued

Eligible employers include institutions of higher education, school districts, or other entities participating in the Public School Insurance Authority, state agencies, state courts, magistrate courts, municipalities or counties, which are affiliated under or covered by the Educational Retirement Act, Public Employees Retirement Act, Volunteer Firefighters Retirement Act, Judicial Retirement Act, or the Magistrate Retirement Act.

Eligible retirees are: (1) retirees who make contributions to the fund for at least five years prior to retirement and whose eligible employer during that period of time made contributions as a participant in the Retiree Health Care Act on the person's behalf, unless that person retires before the employer's NMRHCA effective date, in which event the time period for contributions becomes the time between the employer's effective date and the date of retirement; or (2) retirees defined by the Act who retired prior to July 1, 1990; and former legislators who served at least two years.

Each participating employer makes contributions to the fund in the amount of 1.3 percent of each participating employee's annual salary. Each participating employee contributes to the fund an employee contribution equal to .65 percent of the employee's annual salary. Each participating retiree pays a monthly premium for the medical plus basic life plan and an additional participation fee of five dollars if the eligible participant retired prior to the employer's NMRHCA effective date or is a former legislator and made no contributions to the plan. After retirement, premiums are paid to the Authority by the retiree.

The City has paid all of the employers' required contributions, which were as follows:

2009	\$ 692,566
2008	652,275
2007	606,377

Contributions from participating employers and participating employees become the property of the Retiree Health Care Fund and are not refundable under any circumstances, including termination of employment or termination of the participating employer's operation or participation in the Retiree Health Care Act. The employer, employee, and retiree contributions are required to be remitted to the Retiree Health Care Authority on a monthly basis.

The Authority issues a separate, publicly available audited financial report that includes post employment benefit expenditures of premiums and claims paid, participant contributions (employer, employee, and retiree), and net expenditures for the fiscal year. The report also includes the approximate number of retirees participating in the plan. That report may be obtained by writing to the Retiree Health Care Authority, 4308 Carlisle Blvd, NE, Suite 104, Albuquerque, New Mexico 87109.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

13) Individual Fund Deficits and Budget Variances

Individual funds with deficit fund balances at year-end are as follows:

Fund	Deficit Fund Balance
DWI Prevention	\$ 1,613
Judicial Education	3,971
State Capital Improvements	23,449

Management expects fund balance/net asset deficits will be eliminated through increased user fees, participating funds, and general fund appropriations.

The following funds over-expended budgeted amounts as follows:

Fund	Total Budgeted Expenditures	Actual Expenditures	Amount Over- Expended
Judicial Education	\$ 23,000	\$ 23,872	\$ (872)
Environmental Gross Receipts Tax	1,019,271	1,088,064	(68,793)
Gas Tax Street Maintenance	650,343	673,311	(22,968)
Public Safety Gross Receipts Tax	3,149,293	3,170,062	(20,769)
Keep Las Cruces Beautiful	95,604	95,678	(74)
RSVP	172,897	177,089	(4,192)
Senior Employment Program	3,585	5,312	(1,727)
TIDD Dedicated Revenues	-	116	(116)
STOP	243,080	382,161	(139,081)

14) Landfill Closure and Postclosure Care Cost

State and federal laws and regulations require placement of a final cover on landfill sites when waste is no longer accepted and performance of certain maintenance and monitoring functions at the sites for thirty years after closure. Although closure and postclosure care costs will be paid only near or after the date that a landfill stops accepting waste, a portion of the closure and post closure costs are reported as an operating expense in each period based on landfill capacity used as of each balance sheet date.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

14) Landfill Closure and Postclosure Care Cost — continued

The City's landfill closure and postclosure care liability is reported as \$1,880,000 at June 30, 2009. Actual closure and postclosure care costs may be higher due to inflation, changes in technology, or changes in regulations. The liability reported reflects a decrease in the estimate of total closure and postclosure costs of \$1,032,231.

The City enacted a 1/16th cent environmental gross receipts tax that became effective January 1, 1995, to raise funds for environmental costs such as for landfill closure and postclosure care. The landfill closure was funded by \$1,000,000 from the EGRT fund during the year. Additional revenues came from landfill charges and investment income.

15) Development Impact Fees

The City collects, invests and expends development impact fees in accordance with Ordinance No. 1456 (June 19, 1995) and Resolution No. 95-368 (June 30, 1995).

Ordinance 1456 §11 requires that impact fees collected be used to pay for capital improvements or facility expansions identified in a capital improvements plan.

In accordance with §6 of Ordinance 1456, the City is required to use qualified professionals to prepare a capital improvements plan that describes the specific capital improvements needed to increase the number of new service units in an area over a reasonable period of time, not to exceed ten years. Additionally, the capital improvements plan will calculate total estimated costs of improvements for which the development impact fees may be assessed. Ordinance 1456 §24 states that the capital improvements plan must be updated at least every five years. Expenditures of fees collected must improve the following facilities:

- 1) Water supply, treatment and distribution facilities and waste water collection and treatment facilities;
- 2) Parks, recreational areas, open space, trails and related areas and facilities.

In addition to the construction of capital improvements or facility expansions, Ordinance 1456 §4 states that the development impact fee may also be used to pay for the preparation and updating of the capital improvements plan, the estimated costs of the plan, or up to three percent of administrative costs for City employees who are qualified professionals. Additionally, debt service costs may be paid from impact fees assessed if the proceeds of the debt issued were used in accordance with the capital improvements identified in the capital improvements plan.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

15) Development Impact Fees — continued

The initial land use assumptions and capital improvements plan prepared by Tischler & Associates, Inc. on January 6, 1995, is a ten- to twenty-year plan with professional engineering estimates of costs well exceeding the assessed development impact fees. A significant portion of the assessed development impact fees for the water and waste water system have been used to pay debt service on bonds. The expenditures from the bond proceeds were spent on specific items listed in the initial capital improvements plan and were expended within five years of the completion of the capital improvements plan.

Development impact fee activity for the year ended June 30, 2009, is shown below. Unspent fees collected in previous years are available for expenditure in the current fiscal year.

Parks Impact Fees

Impact fees collected	\$ 269,530
Investment income	50,626
Expenditures	<u>(1,173,704)</u>
Net Parks Impact Fees	<u>\$ (853,548)</u>

Water Impact Fees

Impact fees collected	\$ 1,755,736
Investment income	97,124
Expenditures	<u>(2,368,960)</u>
Net Water Impact Fees	<u>\$ (516,100)</u>

Wastewater Impact Fees

Impact fees collected	\$ 2,898,234
Investment income	224,050
Expenditures	<u>(3,048,861)</u>
Net Wastewater Impact Fees	<u>\$ 73,423</u>

Total Impact Fees

Impact fees collected	\$ 4,923,500
Investment income	371,800
Expenditures	<u>(6,591,525)</u>
Net Total Impact Fees	<u>\$ (1,296,225)</u>

17) **Affiliated Organizations and Joint Powers Agreements**

The City is a participant in the following five affiliated organizations, four of which are joint ventures. Other than the City bonds secured by South Central Solid Waste Authority, the City is unaware of any circumstances that would cause a significant benefit or burden to the participating governments in the near future.

Mesilla Valley Regional Dispatch Authority

The City is a participant in a combined City–County communications/dispatch center for police, fire, and emergency medical services for the City–County area. The organization is governed by a board of twelve individuals. The City and County each appoint four members; the Town of Mesilla, the City of Sunland Park and the Village of Hatch each appoint one member; and the final member is appointed at large by the other members.

The City contributes 53% of the net annual operating cost while the County contributes 47%. The joint powers agreement provides that if the agreement is terminated, property and any funds accrued by the organization shall be distributed to the City and County in proportion to the contributions made by the two entities.

The City is the fiscal agent for the organization and accounts for its resources in an agency fund. Separate audited financial statements were prepared for the year ended June 30, 2009.

Metro Narcotics Agency

The City is a participant in a joint City–County–State–University controlled substances investigation project for the City/County area. The organization is governed by a board of nine individuals. The City and County each appoint three members; the remaining three members are the State Police Chief, the University Police Chief, and the District Attorney.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

17) **Affiliated Organizations and Joint Powers Agreements — continued**

Metro Narcotics Agency — continued

All persons (agents and support staff) assigned to Metro are paid by their respective agencies. The City and the County make contributions to cover the net operating expenses of the organization in proportion to the number of agents assigned to the organization by the two entities. The joint powers agreement provides that if the agreement is terminated by all parties, assets and monies acquired without federal involvement will be distributed in proportion equal to their investment, and assets received from the federal government pursuant to the federal asset-sharing procedures will be distributed to the parties in proportion to their contribution to operational expenses.

The City is the fiscal agent for the organization and accounts for it in an agency fund. Separate audited financial statements were prepared for the year ended June 30, 2009.

Metropolitan Planning Organization

The City is a participant in a joint City-County-Town of Mesilla Metropolitan Planning Organization jurisdictional area. The organization is governed by a board of nine individuals. The City of Las Cruces, Dona Ana County and Town of Mesilla each appoint three members. The committee was constituted for the purpose of establishing, overseeing and directing transportation related policy within the Las Cruces Urban area and to accomplish overall transportation planning for the City, County and Town.

The parties agree that some of the expense of the transportation planning process will be provided for by grant funds available under Section 112 of the Federal Highway Act of 1978 and Section 8 of the Urban Mass Transportation Act of 1964. Expenses not so provided shall be assumed by participating agencies according to the listing of funding sources contained in the annual Unified Work Program approved by the governing board.

Lower Rio Grande Water Users Organization

The City is a participant in this organization to provide for acquisition of information regarding the hydrologic features of the Lower Rio Grande River System. The organization has eight participants: the City, the County, the Town of Mesilla, the Anthony Water and Sanitation District, the Village of Hatch, New Mexico State University, the Elephant Butte Irrigation District and the Dona Ana Mutual Domestic Water Consumers Association.

The objective of this organization is to complete and implement a regional water plan, to make the best use of the available water supply, to secure additional supplies of water for the water users in the region, and to facilitate New Mexico entities' participation in the New Mexico-Texas Water Commission.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

17) **Affiliated Organizations and Joint Powers Agreements — continued**

Lower Rio Grande Water Users Organization — continued

Funds are received from the New Mexico Interstate Stream Commission and from other sources. The City of Las Cruces shall serve as the fiscal agent for the Organization. The City will maintain all fiscal records in accordance with generally accepted accounting principles. Upon termination of the agreement, any unexpended funds will be returned pro rata by the fiscal agent to the contributing members and third party funding sources.

South Central Solid Waste Authority

The City is a participant in South Central Solid Waste Authority (SCSWA), a City-County joint venture that establishes a mechanism for designing, constructing, financing, operating and maintaining regional solid waste landfills and related facilities. SCSWA is reported as a component unit of the City because its revenues are the primary source of debt service for City bonds issued to construct a regional landfill and transfer station. SCSWA is governed by a board comprised of six working members and two ex-officio members. Three of the members are appointed from the City Council by the Mayor and three members are appointed from the County Commission by the Chairman. The two ex-officio members are the City Manager and the County Manager or their designees.

The City serves as the fiscal agent for the Authority for the term of the agreement. The fiscal agent is compensated for services rendered to the Authority in the amount of \$85,000 per year base rate of which \$15,000 pertains to audit fees. The base rate increases each year by the Consumer Price Index plus audit fees or other direct costs. The City issued revenue bonds on behalf of the Authority which are to be secured by pledges of the net revenues derived from operation of the facility and of the proceeds of the 1/16% Municipal Environmental Services Gross Receipts Tax of the City and the 1/8% County Environmental Services Gross Receipts Tax of the County.

The joint venture agreement may be terminated upon the mutual consent of both parties and shall not be terminated so long as any revenue bonds issued under the agreement by the City are outstanding.

In 2009, the City of Las Cruces and Dona Ana County paid approximately \$2.5 million and \$820,376 in charges for services, respectively.

In 2009, the Authority paid approximately \$85,400 of fiscal agent fees to the City of Las Cruces.

Rio Grande Natural Gas Association

The Rio Grande Natural Gas Association (the “Association”) operates as a community gas association and services customers located in Dona Ana County, New Mexico, that

City of Las Cruces
Notes to Basic Financial Statements

17) **Affiliated Organizations and Joint Powers Agreements — continued**

Rio Grande Natural Gas Association — continued

are primarily located outside the City of Las Cruces, New Mexico. The Association was formed in 1969 in accordance with the provisions of Sections 3-28-1 through 3-28-22 of the New Mexico State Statutes, and organized as a nonprofit corporation owned by the City and the Village of Hatch (the “Village”). According to its charter, the life of the Association is 100 years, and upon dissolution the assets of the Association will belong to the City and the Village. The Association is governed by a Board of Directors appointed by the governing bodies of the City and the Village. The Association is a governmental organization, as the Board of Directors consists of members appointed by governmental entities.

The City acts as fiscal agent for the Association, and the City’s employees handle the day-to-day operations of the Association. The Association reimburses the City for all expenditures incurred for the operation of the Association, plus an administrative fee to compensate it for acting as the fiscal agent of the Association. The Association paid the City \$3,654,847 in 2009. Additionally, the Association had gas sales of \$469,258 to the Village of Hatch during the year ended June 30, 2009.

The City is the fiscal agent for the organization and accounts for its resources in an agency fund. Separate audited financial statements were prepared for the year ended June 30, 2009.

Animal Service Center of Mesilla Valley

The Annual Service Center of Mesilla Valley (ASCMV) operates under a joint powers agreement, effective August 4, 2008, between the City of Las Cruces and Dona Ana County. It is the mission of ASCMV to provide a safe shelter for all lost, mistreated, and abandoned animals of Mesilla Valley and surrounding communities.

The City is the fiscal agent for the organization and accounts for it in an agency fund. For the five-month period ended June 30, 2009, ASCMV paid approximately \$35,833 of fiscal agent fees to the City of Las Cruces. Separate audited financial statements were prepared for the five-month period ended June 30, 2009.

18) **Telshor Facility Lease**

Memorial Medical Center / Province Hospital (Telshor Facility)

In 1966 the City and the County adopted a joint resolution to create a joint county-municipal hospital to provide medical services to all of the citizens of Doña Ana County. The hospital was constructed and operated by the City and County through a Board of Trustees until 1998, when it was leased to Memorial Medical Center, Inc. (MMCI), a New Mexico not-for-profit corporation.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

18) Telshor Facility Lease — continued

Memorial Medical Center / Province Hospital (Telshor Facility) — continued

On June 1, 2004, the City, the County, and MMCI jointly terminated the lease. On that date, the City and County executed a 40-year lease agreement for the hospital facilities and equipment with PHC-Las Cruces, Inc. (PHC), a New Mexico corporation and a wholly-owned subsidiary of Province Healthcare Corporation, a Delaware corporation. In accordance with the lease agreement PHC has deposited amounts into escrow accounts to cover contingencies of the hospital and pay hospital liabilities specified in the agreement, including outstanding bonds. The net lease proceeds, after these deposits and liabilities, are summarized as follows:

	Total	City Portion
Total lease amount	\$ 150,000,000	\$ 75,000,000
Less		
Hospital liabilities assumed by PHC	9,247,375	4,623,688
Amounts deposited into escrow to cover medical malpractice and other contingencies	14,445,892	7,222,946
Payment of outstanding hospital bonds	50,038,987	25,019,493
Payment of hospital pension liabilities	24,100,000	12,050,000
Closing costs	1,000	500
Cash paid by PHC to the City and County	\$ 52,166,746	\$ 26,083,373

As part of the PHC lease, the City and County received amounts needed to cover specific future costs. The maximum amounts of these costs are as follows:

	Total	City Portion
Employee severance agreements	\$ 987,266	\$ 493,633
Construction costs	1,278,414	639,207
Future payments to MMC for expanded care services	19,200,000	9,600,000
Hospital property taxes	5,000,000	2,500,000
	\$ 26,465,680	\$ 13,232,840

The proceeds of the PHC lease are reported in a special revenue fund (Telshor Facility fund) because the City Council adopted a resolution restricting the use of the lease proceeds to fund health-related programs and health-related capital projects. Amounts originally received by the City for expanded care services and property taxes are reported in the statement of net assets as deferred revenue. The deferred revenue is amortized each year to the extent of expenditures recorded in the Telshor fund. The revenue amortized in 2009 was \$277,967.

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

18) Telshor Facility Lease — continued

Memorial Medical Center / Province Hospital (Telshor Facility) — continued

The asset purchase agreement entitles PHC to compensation solely from the escrow account if PHC incurs any losses, including the discharge of malpractice liabilities, in connection with events that occurred on or prior to the closing.

MMCI began distributing its cash and investments equally between the City and the County in July 2004. MMCI retained cash to pay certain liabilities; any cash remaining at the end of the liquidation process will be distributed equally between the City and the County.

19) **Internal Service Fund Allocations**

The City allocates its internal service funds between governmental and business-type activities based on the utilization of these internal service funds. The allocation of the net assets of internal service funds to governmental activities is:

Net assets, beginning balance		\$ 3,560,662
Revenues less eliminations	\$ 7,902,244	
Expenses less eliminations	(8,173,716)	
Other financing sources	<u>657,429</u>	
Change in net assets		<u>385,957</u>
Net assets, ending balance		<u><u>\$ 3,946,619</u></u>

The allocation of the net assets of internal service funds to business-type activities is:

Net assets, beginning balance		\$ 2,370,185
Revenues less eliminations	\$ 5,920,882	
Expenses less eliminations	(6,161,889)	
Other financing sources	<u>294,203</u>	
Change in net assets		<u>53,196</u>
Net assets, ending balance		<u><u>\$ 2,423,381</u></u>

City of Las Cruces
Notes to Basic Financial Statements
June 30, 2009

19) Internal Service Fund Governmental and Business-Type Activities Allocations — continued

Total net assets of the City's internal service funds are:

Governmental activities allocation	\$ 3,946,619
Business-type activities allocation	<u>2,423,381</u>
Net assets, ending balance	<u><u>\$ 6,370,000</u></u>

20) Subsequent Event

Effective July 1, 2009, South Central Solid Waste Authority (Authority) began managing Dona Ana County's (County) eight solid waste convenience stations. The Authority hired the County employees, with a start date of July 1, 2009. The subsidy from the County for FY10 will be \$865,000. Budgeted expenses are \$934,771. The County transferred certain equipment to the Authority, pending the approval of the State of New Mexico, Department of Finance and Administration.

Effective July 27, 2009, the Authority began providing recycling services to the City of Las Cruces (City). The City will sell to the Authority recycling equipment for \$404,735. A grant funded baler is leased at no cost to the Authority. The City's solid waste residential service rate currently contains a \$3.09 per month charge for recycling. The City will use the recycling component from the monthly residential solid waste fee to pay the Authority for recycling services. The subsidy from the City for FY10 will be \$801,262, based on \$3.09 per month per residential (non-senior) solid waste customers. Budget expenses are \$516,059.

The solid waste customers of the Authority who reside within the County and other solid waste customers, whose rates may hereafter include a recycling charge, will also provide funding to the Authority solely for the recycling program.

Budgetary Comparison Schedules

In accordance with GASB Statement No. 34 and the New Mexico State Auditor Rule the comparisons of budget and actual for the General Fund are presented in the basic financial statements. All other fund budgetary comparisons are presented in the following pages as supplementary information.

Schedules of Revenues, Expenditures and Changes in Fund Balance—Budget and Actual—Major Capital Projects Funds

Major Capital Projects Funds

- ◆ 2005 GRT City Hall Fund
- ◆ Las Cruces Convention Center Fund

2005 Gross Receipts Tax City Hall Fund: To provide for the design and construction of a new City Hall facility. Funding is the 2005 Sales Tax Bond.

Las Cruces Convention Center Fund: To provide for the design, construction and equipping the Las Cruces convention center. The source of funding is a New Mexico Finance Authority loan.

- ◆ NMFA Parking Deck
- ◆ 2007 NMFA Street Improvements
- ◆ Federal Stimulus Capital Projects

Debt Service Fund

Debt Service Fund: Accounts for the resources accumulated and payments made for principal and interest on long-term debt of the governmental funds.

Special Revenue Funds

Special revenue funds are used to account for specific revenues that are legally restricted to expenditures for particular purposes.

Community Development Block Grant: To provide for the operation and installation of paving projects, sidewalks, park development, home rehabilitation, and social projects. Funding is from HUD, housing loan and interest repayment, and performance bond payments. PL 93-383 Title I, Housing and Community Development Act of 1974 requires that this grant be used for this purpose.

Court Awarded Funds: To provide for drug enforcement activities. Funding is from federal High Intensity Drug Traffic-seized funds and may only be used for drug enforcement activities, and must comply with federal financial and administrative requirements of OJP M7100.ID.

MPO Urban Transportation: To provide for the transportation needs of the community. Funding sources are from the Federal Highway Administration, the Urban Mass Transportation Administration, and the General fund. The fund was created in 1982 when the Metropolitan Planning Organization was formed through a Joint Powers Agreement. Such grants provide for the payment of current transportation operating expenses and may be used only for that purpose. City Resolution N. 94-236 requires the fund to be used only in this manner.

Fire: To provide for the purchase of fire equipment. Funding is provided by the State Fire Fund. State law requires these funds to be used for fire supplies and equipment to help maintain the fire department. (Section 979, Article 52, New Mexico State Insurance Code.)

Police Protection: To provide for the purchase of police equipment and police expenses associated with advanced law enforcement planning and training. The funding source is a state grant. State law (Section 5, Chapter 289, Laws of 1983) requires these funds to be used to operate the police department.

Emergency Medical Services: To provide for emergency medical services provided through Fire Department activities. Funding is through a state grant from the New Mexico Department of Health, which requires separate fund accounting according to EMS Regulation DOH 94-11.

Traffic Safety: To provide for traffic safety education. Funding is provided by a penalty assessment of \$3.00 per traffic ticket. City Ordinance No. 0-1232, May 1991 requires the fund be used only in this manner.

Court Automation: To provide for Municipal Court Automation. Funding is provided by a penalty assessment of \$3.00 per traffic ticket. City Ordinance No. 0-1232, May 1991 requires the fund be used only in this manner.

Special Revenue Funds

— continued —

Animal Services Center: To account for operational expenditures of the animal shelter, including the funding from Dona Ana County.

Prisoner Care: To provide for operations and maintenance of a municipal jail or for paying the cost of housing municipal prisoners in the county jail. Funding is provided by a penalty assessment of \$5.00 per traffic ticket. City Resolution No. 81-69, August 1981 requires the fund to be used only in this manner.

Juvenile Recreation: To provide for the operation and development of community parks and operation of recreation programs. Funding source is one-third of the cigarette tax (Section 7-12-1 through 7-12-17, NMSA, 1978.) These taxes may only be used to finance the parks and recreation programs.

Lodgers' Tax and LCCVB: To account for the operations of the Las Cruces Convention and Visitors' Bureau to promote tourism within the area. Financing is provided from a Lodgers' Tax. State law (Section 3-38-13 through 3-38-24, NMSA, 1979) requires these taxes to be used to operate the Convention and Visitors Bureau.

DWI Prevention: To account for the receipt of driving while intoxicated state fines (Section 31-12-7, NMSA 1978). Receipts are remitted to the state.

Judicial Education: To account for the receipt of imposed fees on all "guilty" traffic offenses in accordance with NMSA 1978, 35-14-11 (B)(2) and to be used for the education, training, including production of bench books and other written materials, of municipal judges and other municipal court employees.

Environmental Gross Receipts Tax: To account for the receipt of environmental gross receipts taxes enacted by the City and the county as provided for in Ordinance 1484, October 12, 1995.

Health Care Services from MMC Lease: To account for the receipt of proceeds pursuant to the terms of the lease with Memorial Medical Center, Inc., to be used for health care services in the City. The lease was approved by Ordinance 1655 in 1998.

Legislative Equipment Grants: To provide funding for the acquisition of equipment for legislative purposes.

Gasoline Tax Street Maintenance Fund: To account for the receipt of gasoline tax remittances from the state. State law (7-1-6.9 NMSA 1978) requires the distributions to be received into a separate road fund.

Public Safety Gross Receipts Tax: To account for the receipt of municipal gross receipts tax to be used for public safety salaries, benefits, operations, and equipment as provided for in Ordinance 1886.

Keep Las Cruces Beautiful: To provide for beautification, litter eradication, graffiti abatement, and education. Funding is from the New Mexico Clean & Beautiful Program of the New Mexico Department of Tourism.

Special Revenue Funds

— continued —

Older Americans Act Programs: To provide congregate meals to seniors at four program sites and to homebound customers who receive two delivered meals a day. Funding is from the New Mexico Aging and Long-Term Services Department.

Cash in Lieu of Commodities: To provide congregate and home delivered meals. Services will be provided through the four City meal sites. Funding is through the U.S. Department of Agriculture's Cash in Lieu of Commodities program.

RSVP: To provide a variety of opportunities for persons aged fifty-five and over to participate more fully in the life of their communities through significant volunteer service in accordance with the approved proposal. Funding is from the Corporation for National and Community Service and the New Mexico Aging and Long-Term Services Department.

Children, Youth, and Families: To provide home care services to person 18 years of age or older who have been referred as a result of a report of adult abuse, neglect, or exploitation. Funding is from the State of New Mexico Children, Youth and Families Department, Protective Services Division.

Senior Employment Program: To provide training for low-income persons age 55 years and older for placement in non-governmental agencies. The program is funded by a state grant, administered by the Non-metro Area Agency on Aging.

State Library Resources Grant: To provide funds for library materials and the equipment to provide access to information resources. Funding is from the State of New Mexico General Obligation Bond C.

Street Maintenance Operations: To account for operational expenditures for street maintenance funded by transfers from the Gas Tax Street Maintenance Fund.

NMFA Flood Control Operations: To account for operational expenditures for flood control operations funded by transfers from the Gas Tax Street Maintenance Fund.

Special Projects—Northrise/Morningstar: To account for the reimbursement from developers to the City, through certain assessments, for the construction of Northrise and Morningstar streets.

Downtown Revitalization: To account for the re-development of the downtown area of Las Cruces. Funding comes from sale of property in the downtown area and other activities for revitalization.

Regional Planning Project: To account for the receipt of state funds provided to develop a long-range regional plan (Vision 2040), in cooperation with Dona Ana County and New Mexico State University.

Special Revenue Funds

— continued —

State Operations Grant: To account for the receipt of legislative appropriations provided for operational expenditures in support of local service agencies.

Valley View Heske Garden: To account for the construction and maintenance of a park. Funding comes from a portion of the Emma B. Heske Trust that was left to the City of Las Cruces for construction of a park according to Ms. Heske's wishes.

Griggs and Walnut Plume: To account for the operations of the Griggs and Walnut water production area, and the remediation activities associated with the site.

Las Cruces Convention Center: To account for receipt of the convention center fees paid to support the debt service payments for the convention center.

Telshor Facility: To account for the lease of the Telshor Facility.

TIDD Dedicated Revenues: To account for an amount of 75% of the State Gross Receipts Tax increment generated within the district that may be dedicated for the purpose of securing tax increment bonds issued by the district.

Safe Traffic Operations Program: To account for the programs that use cameras to enforce red light and speeding violations.

State Special Project: To account for the purchase, plan and design of a transitional living facility for young adults in Dona Ana County. Funding sources are from the State.

Capital Projects Funds

Capital projects funds are used to account for the acquisition and construction of major capital facilities other than those financed by proprietary funds.

Public Parks Development: To provide for the establishment of parks and miniparks within subdivisions. The source of funding is from state grants, interest earnings, and charges to subdividers. If the parks using subdivision funds have not been started within a three-year period, the charges revert to the subdividers.

Street Improvement: To provide for the paving or improvements to streets. The source of funding is from a state grant and interest earned on investments.

Airport Improvement: To provide for the financing and construction of projects at the airport. The funding is from federal grants, state grants, and local matching funds.

Sales Tax–Street Maintenance: To provide for street repaving projects. The source of funding is one-quarter percent municipal gross receipts tax.

NMFA Flood Control: To construct a detention pond for the purpose of flood control and to serve as recreation as part of a multi-sport complex to include baseball, softball and soccer fields. The source of funding is from the New Mexico Finance Authority.

Capital Improvement Reserve: To provide for the purchase of land and additions or improvements to city facilities. The source of funding is net profit on sale of securities.

Legislative Capital Improvements: To provide for the purchase of capital improvements approved by legislation.

State Capital Improvements: To provide for the purchase of capital improvements from state funding.

EDA West Mesa Industrial Park Fund: To provide for the financing and construction of improvements, including installation of access roads and utilities for the airport and industrial complex. The source of funding is federal grants, local matching funds, rental income, and proceeds from the sale of land.

1999 Sales Tax Street Projects Series A: To provide for the construction of various street projects.

2003 Sales Tax Facilities and Parks: To provide for facilities/park improvements. Funding is the 2005 Gross Receipts Tax Refunding Revenue Bonds.

State Equipment Acquisition: To provide for well improvements.

2003 Sales Tax Street Lights: To provide for the acquisition of street lighting systems. Funding is the 2005 Gross Receipts Tax Refunding Revenue Bonds.

2005 Gross Receipts Tax Public Improvements: To account for various public improvements. Funding is the 2005 Sales Tax Bond.

Capital Projects Funds

— continued —

NMFA Parking Deck: To provide for the financing and construction of a parking deck and other capital structures. The source of funding is from the New Mexico Finance Authority.

2007 NMFA Street Improvements: To provide for the paving or improvements to streets. The source of funding is from New Mexico Finance Authority loans.

Federal Stimulus Capital Projects: To account for various public improvements. The source of funding is from the American Recovery and Reinvestment Act.

City of Las Cruces
Statistical Section Table of Contents
June 30, 2009

This part of the City of Las Cruces' comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information says about the government's overall financial health.

Effective January 1, 2006, the City adopted the Governmental Accounting Standards Board Statement No. 44, *Economic Condition Reporting: The Statistical Section, An Amendment of NCGA Statement 1*. GASB 44 provides the requirements for the schedules contained in this section of the City's CAFR.

Content

Financial Trends

These schedules contain trend information to help the reader understand how the City's financial performance and well-being have changed over time.

Revenue Capacity

These schedules contain information to help the reader assess the City's most significant local revenue source, the sales tax.

Debt Capacity

These schedules present information to help the reader assess the affordability of the City's current levels of outstanding debt and the City's ability to issue additional debt in the future.

Demographic and Economic Information

These schedules offer demographic and economic indicators to help the reader understand the environment within which the City's financial activities take place.

Operating Information

These schedules contain service and infrastructure data to help the reader understand how the information in the City's financial report relates to the services the City provides and the activities it performs.

Notes:

* The substantial increase in governmental fund balances from FY03 to FY04 was primarily due to the 40-year lease of the Telshor Facility. The net hospital assets recognized by the City in FY04 was \$30,124,793.

* The substantial increase from FY05 to FY06 was primarily due to the issue of \$33,000,000 in sales tax bonds for a new City Hall and other public improvements.

Notes:

- * The substantial increase in governmental fund balances from FY03 to FY04 was primarily due to the 40-year lease of the Telshor Facility. The net hospital assets recognized by the City in FY04 was \$30,124,793.
- * The substantial increase from FY05 to FY06 was primarily due to the issue of \$33,000,000 in sales tax bonds for a new City Hall and other public improvements.

* Due to confidentiality issues, the names of the ten largest revenue payers are not available. The categories presented are intended to provide alternative information regarding the sources of the City's revenue.

* Information is only available for fiscal years 2008 and 2009. GASB reporting for Sales Tax Revenue Payers by Industry per GASB Statement 44 was implemented in Fiscal Year 2006.

Independent Auditors' Report on Schedule of Expenditures of State and Federal Awards

Mr. Hector H. Balderas, New Mexico State Auditor
and the Honorable Mayor and City Council Members
of the City of Las Cruces

We have audited the basic financial statements, combining and individual fund financial statements and the budgetary comparisons presented as supplemental information of the City of Las Cruces, as of and for the year ended June 30, 2009, and have issued our report thereon dated November 16, 2009. Our audit was performed for the purpose of forming opinions on the financial statements and supplemental information described above. The accompanying schedule of expenditures of state and federal awards is presented for purposes of additional analysis as required by U. S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations*, and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

City of Las Cruces
Notes to Schedule of Expenditures of State and Federal Awards
June 30, 2009

1) General

The accompanying schedule of expenditures of state and federal awards presents the activity of all state and federal award programs of the City of Las Cruces, New Mexico, (the “City”). The City’s reporting entity is defined in Note 1 to the City’s financial statements. The Office of Management and Budget’s (OMB) Circular A-133, *Audits of States, Local Governments and Non-Profit Organizations* sets forth requirements whereby federal grants may be audited under a “single audit” approach at the same time the City’s financial statements are audited. All awards received from state and federal agencies, as well as awards passed through other organizations and government agencies, are included on the schedule, except for those awards received directly by the Housing Authority of the City of Las Cruces, New Mexico (the “Housing Authority”). These awards are presented on the Housing Authority’s schedule of expenditures of federal awards.

2) Basis of Presentation

The accompanying schedule of expenditures of state and federal awards includes the state and federal grant activity of the City and is presented on the accrual basis of accounting. The information in this schedule is presented in accordance with the requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of, the basic financial statements.

3) Reconciliation of Schedule of Expenditures of State and Federal Awards

The following is a reconciliation of the expenditures reported on the schedule of expenditures of state and federal awards to the expenditures reported in the financial statements for the City:

Expenditures on schedule of expenditures of state and federal awards	\$ 16,904,830
Expenditures financed by other funding sources	<u>137,864,658</u>
Expenditures reported in the statement of revenues, expenditures and changes in fund balance—governmental funds	<u>\$ 154,769,488</u>

City of Las Cruces

Independent Auditors' Report on Internal Control Over
Financial Reporting and on Compliance and Other Matter
Based on an Audit of Financial Statements Performed in
Accordance with *Government Auditing Standards*

Mr. Hector H. Balderas, New Mexico State Auditor
and the Honorable Mayor and City Council Members
of the City of Las Cruces

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the discretely presented component units, each major fund, and the aggregate remaining fund information of the City of Las Cruces, New Mexico (the "City") as of and for the year ended June 30, 2009, which collectively comprise the City's basic financial statements. We also have audited the financial statements of each of the City's nonmajor governmental, nonmajor enterprise, internal service and fiduciary funds presented in the accompanying combining financial statements and the budgetary comparison schedules as of and for the year ended June 30, 2009, and have issued our report thereon dated November 16, 2009. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the City's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the City's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the City's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the City's financial statements that is more than inconsequential will not be prevented or detected. We consider the deficiencies described in the accompanying schedule of findings and questioned costs as items FS 09-1 and FS 09-2 to be significant deficiencies in internal control over financial reporting.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the City's internal control. Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are also considered to be material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City's basic financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

In addition, the results of our tests disclosed matters that are required to be reported under New Mexico State Auditor Rule 2 NMAC 2.2, *Requirements for Contracting and Conducting Audits of Agencies*, which are described in the accompanying schedule of state auditor's rule findings as SA 09-1 through SA 09-5.

The City's responses to the findings identified in our audit are included in the accompanying schedule of findings and questioned costs and schedule of state auditor rule findings. We did not audit the City's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the Mayor, the City Council, the City's management, and the New Mexico State Auditor, and the New Mexico Department of Finance and Administration, and is not intended to be and should not be used by anyone other than these specified parties.

REDW LLC

November 16, 2009

Independent Auditors' Report on Compliance With Requirements Applicable to Each Major Program and Internal Control Over Compliance

Mr. Hector H. Balderas, New Mexico State Auditor
and the Honorable Mayor and City Council Members
of the City of Las Cruces

Compliance

We have audited the compliance of the City of Las Cruces (the "City") with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2009. The City's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the City's management. Our responsibility is to express an opinion on the City's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the City's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the City's compliance with those requirements.

In our opinion, the City complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2009. However, the results of our auditing procedures disclosed instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are disclosed in the accompanying schedule of findings and questioned costs as items FA 09-1 and FA 09-2.

Internal Control Over Compliance

The City's management is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered the City's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the City's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the City's internal control that might be significant deficiencies or material weaknesses as defined below. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies.

A *control deficiency* in the City's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the City's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the City's internal control. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as items FA 09-1 and FA 09-2 to be significant deficiencies.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the City's internal control. We did not consider the deficiencies described in the accompanying schedule of findings and questioned costs to be material weaknesses.

The City's responses to the findings identified in our audit are included in the accompanying schedule of findings and questioned costs. We did not audit the City's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the Mayor, City Council and management, the State of New Mexico Office of the State Auditor, the New Mexico Department of Finance and Administration, federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

REDW LLC

November 16, 2009

City of Las Cruces
Schedule of Findings and Questioned Costs
For the Year Ended June 30, 2009

Section I — Summary of Auditors' Results

Financial Statements

Type of auditors' report issued:	Unqualified
Internal control over financial reporting: Material weakness identified?	No
Significant deficiency identified not considered to be material weaknesses?	Yes
Noncompliance material to financial statements noted?	No

Federal Awards

Internal control over major programs: Material weakness identified?	No
Significant deficiency identified not considered to be a material weakness?	Yes
Type of auditors' report issued on compliance for major programs:	Unqualified
Any audit findings disclosed that are required to be reported in accordance with section 510(a) of Circular A-133?	Yes

City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section I — Summary of Auditors' Results — continued

Identification of major programs:

<u>CFDA Number</u>	<u>Name of Federal Program or Cluster</u>
16.710	Public Safety Partnership and Community Policing Grants
16.XXX	High Intensity Drug Trafficking Area
20.106	Airport Improvement Program
20.500/20.507	Federal Transit Cluster

Dollar threshold used to distinguish between type A and type B programs:	\$300,000
Auditee qualified as low-risk auditee?	No

City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section II — Financial Statement Findings

FS 09-1 — Cash and Investment Reconciliations (Repeat)

Condition: The January through March cash and investment reconciliations were not completed in a timely manner. Cash and investment reconciliations were not being independently reviewed for approximately nine months of fiscal year 2009.

Criteria: Adequate internal controls should be in place to ensure cash and investment reconciliations are completed and reviewed in a timely manner to ensure accurate financial reporting.

Effect: Errors or irregularities in cash and investments may go undetected if reconciliations are not completed timely and reviewed. This may result in cash and investment balances not properly reported.

Cause: During the year, cash and investment reconciliations were not completed in a timely manner. In addition, reconciliations did not go through a review process to ensure accuracy.

Auditors' Recommendations: Cash and investment reconciliations should be completed on at least a monthly basis. Reconciliations should be independently reviewed to ensure timely and accurate completion.

Management's Response: The City agrees with the finding. Regular monthly bank reconciliations, with supervisory review, were implemented prior to the 2009 fiscal year-end.

City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section II — Financial Statement Findings — continued

FS 09-2 — Payroll Processing

Conditions: Human resources is responsible for setting up employee information and establishing payroll data. However, payroll personnel have the ability to alter employee information such as pay rates and leave balances. Compensating controls were established; however, the controls were not implemented.

Criteria: Adequate internal controls should be in place to prevent, detect or deter inappropriate transactions through segregation of incompatible duties or compensating controls.

Effect: Without stringent internal controls including segregation of incompatible duties, the risks of errors and fraudulent activity occurring, and not being detected, is increased.

Cause: Compensating controls were not in place when incompatible duties were not segregated. Payroll reports are required to be reviewed as a compensated control for payroll responsibilities not being segregated. However, payroll reports were not being reviewed during fiscal year ended June 30, 2009.

Auditors' Recommendations: The City should segregate incompatible duties where practical and implement compensating controls when segregation of duties is not practical. Payroll information should be independently reviewed to ensure payroll processing is accurate at all times.

Management's Response: Compensating controls were established during fiscal year 2008, but not fully implemented during fiscal year 2009. The City will establish regular review of payroll exception reports to ensure payroll processing is accurate at all times.

City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section III — Federal Award Findings and Questioned Costs

FA 09-1 — Allowable Costs

Federal program information:

Funding agency:	U.S. Department of Justice
Title:	Public Safety Partnership and Community Policing Grants
CFDA number:	16.710
Award number:	2005-INWX-0014
Award period	9/1/05 – 8/31/09

Condition: During the year, airtime charges were paid for activated air cards that were not installed on mobile data terminals. This resulted in unallowable costs charged to the grant, which had to be reimbursed to the funding agency.

Criteria: The general criteria affecting the allowability of costs under federal awards are:

- Costs must be reasonable and necessary for the performance and administration of federal awards.
- Costs must be given consistent treatment through application of those generally accepted accounting principles appropriate to the circumstances.
- Costs must conform to any limitations or exclusions as to types or amounts of cost items.
- Costs must be documented in accordance with OMB Circular A-102, *Common Rule*, for State, local and Indian Tribal governmental units.

Questioned Costs: None.

Context: Airtime charges paid for air cards that were not installed during fiscal year 2009.

Effect: Unallowable costs of \$70,658 charged to the grants were reimbursed to the funding agency.

Cause: Established internal controls were not followed to assure expenditures charged to grant funds were for actual services provided.

Auditors' Recommendations: Established internal controls should be followed to ensure all expenditures charged to grants are adequately reviewed, and are for actual services provided.

Management's Response: The City agrees with the finding and will implement the recommendation regarding internal controls. A Grants Administration Office has been established to help ensure grant compliance across the City.

City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section III — Federal Award Findings and Questioned Costs — continued

FA 09-2 — Procurement

Federal program information:

Title:	Public Safety Partnership and Community Policing Grants
CFDA number:	16.710
Award number:	2005-INWX-0014
Award period	9/1/05 – 8/31/09

Condition: Internal control procedures were not followed to ensure airtime rates for air cards charged to the grant were approved by the appropriate personnel. During fiscal year 2009, there was not a formal approved contract for air card monthly airtime rates.

Criteria: Recipients are to use their own procurement procedures provided that they conform to applicable Federal law and regulations and standards identified in the A-102 Common Rule.

Questioned Costs: None.

Context: Monthly airtime rates charged to the grant.

Effect: Monthly air time rates through February 2009 were paid without an approved contract.

Cause: Internal control procedures were not followed to ensure billed airtime rates were supported by an approved contract.

Auditors' Recommendations: Established policies and procedures should be followed to ensure compliance with the procurement process. This will ensure all contracts for services provided are approved by the appropriate personnel.

Management's Response: The Procurement Office will document and implement policies to improve the procurement process. Internal procedures will be modified to ensure the proper management of contracts.

City of Las Cruces
Schedule of State Auditor Rule Findings
For the Year Ended June 30, 2009

The following findings are reported in accordance with the New Mexico State Audit Rule 2 NMAC 2.2., *Requirements for Contracting and Conducting Audits of Agencies*.

SA 09-1 — Actual Expenditures Exceeded Budget Expenditures (Repeat Finding)

Condition: The following funds over-expended budgeted amounts as of June 30, 2009:

- Judicial Education (\$872)
- Environmental Gross Receipt Tax (\$68,793)
- Gas Tax Street Maintenance (\$22,968)
- Public Safety Gross Receipts Tax (\$20,769)
- Keep Las Cruces Beautiful (\$74)
- RSVP (\$4,192)
- Senior Employment Program (\$1,727)
- TIDD Dedicated Revenues (\$116)
- STOP (\$139,081)

Criteria: Actual expenditures should not exceed budgeted expenditures at the legal level of compliance.

Context: Nine funds over-expended approved budgeted amounts.

Effect: Actual expenditures exceed budgeted amounts in nine of the City's funds.

Cause: Procedures were not in place to ensure budgetary compliance.

Auditors' Recommendations: Establish adequate procedures to monitor budget compliance and prohibit spending exceeding budgeted amounts. Unfavorable variances should be investigated to ensure that program directors are spending according to the adopted budget.

Management's Response: The City will continue to improve procedures to identify budget overruns more timely and investigate unfavorable variances.

City of Las Cruces
Schedule of State Auditor Rule Findings — continued
For the Year Ended June 30, 2009

SA 09-2 — Record Retention

Condition: Due to the City's record retention policy, the City of Las Cruces did not maintain bid documentation for a service contract exceeding the competitive bid threshold.

Criteria: The City's procurement code requires documentation of the results of the bidding process for procurements in excess of \$35,000.

Effect: The City may not have contracts maintained that were entered into in prior years due to the current record retention policy.

Cause: Established policies and procedures to not ensure bid service contracts are not maintained for longer than a five-year time period.

Auditors' Recommendations: We recommend that the City revises its current record retention policy to ensure bid documentation for contractual agreements is maintained for longer than a five-year time period.

Management's Response: The Procurement Office will document and implement policies to improve the monitoring of the procurement process. Internal procedures will be modified to ensure the proper management of bid documents.

City of Las Cruces
Schedule of State Auditor Rule Findings — continued
For the Year Ended June 30, 2009

SA 09-3 — Information Technology (Repeat Finding)

Condition: Several areas of the Information Technology infrastructure were identified as needing enhanced controls. These areas are:

- lack of a formal, written agreement between the City and Dona Ana County (the County) regarding the County's use of the City's fiber infrastructure
- lack of appropriately skilled IT resources
- lack of regular employee computer security awareness training

Criteria: Information Technology (IT) including systems and infrastructure are essential and integral to the efficiency of the City's operations. IT internal controls are needed to maintain the confidentiality, integrity, and availability of data. IT internal controls are as important as the internal controls that surround the input of financial transactions into the City's general ledger.

Context: The IT Department has corrected the majority of the findings documented in the audit report of 2008. These include removing user's local administrative rights on user's computers, implementing preventive maintenance contracts for the HVAC, and UPS devices in the data center. However, there are some important controls lacking.

Lack of formal written agreement between the City and Dona Ana County regarding network connectivity

- The Dona Ana County network utilizes some of the fiber network infrastructure owned and maintained by the City. Using the City's fiber connectivity allows the County network to connect to healthcare services, Detention Center, Emergency Dispatch Center, and Office of Emergency Preparedness. County IT personnel had to get access to a City wiring closet to perform maintenance because the County had lost some of its connectivity. There is no formal written agreement regarding the County's use of City network infrastructure. Without a formal agreement outlining responsibilities, service levels, and other legal requirements, the City may be subject to potential security, availability, accountability, and liability issues. A meeting has been held to discuss this issue but there is still no formal agreement.

Lack of appropriately skilled IT resources

- In the past 12 months, the IT Department has lost several key IT personnel, including the System Administrator and Database Administrator. There appears to be difficulties in hiring skilled IT personnel to fill vacant positions in the IT Department. These difficulties include, but may not be limited to:
 - ◆ long recruit-to-hire time
 - ◆ appropriate salary scales
 - ◆ geographic location.

City of Las Cruces
Schedule of State Auditor Rule Findings — continued
For the Year Ended June 30, 2009

SA 09-3 — Information Technology (Repeat Finding) — continued

Given the size and complexity of the City network, skilled/experienced IT personnel are needed to maintain and develop it. Lack of skilled IT personnel may lead to overloading of existing personnel. This results in important tasks and projects being delayed or cancelled.

Lack of regular employee computer security awareness training

- IT provides some computer security awareness training to new hires as part of the orientation process. However, no ongoing computer security awareness training is given to employees. Most security experts consider employee lack of security awareness to be the weakest link in the security chain. Security awareness training is a continually evolving process and must be regularly updated in order to be most effective. Lack of employee security awareness training is a security risk to the City network and data.

Effect: The ability of the IT Department to keep up-to-date with current technologies will be restricted due to limited resources. Lack of regular employee computer security awareness training is a security risk to the City network and its data.

Cause: Having Dona Ana County utilizing some of the City's fiber connectivity, without a clearly written agreement, could result in potential security and/or liability issues. Lack of appropriately skilled and experienced IT personnel in the City's IT Department means that existing personnel are over loaded and tasks and projects will be delayed or will go undone.

Auditors' Recommendations: The City should ensure that, if the County is to continue using the City's fiber connectivity, a formal written agreement is created and implemented as soon as possible. This agreement should define clearly the responsibilities of the City and the County.

The City should consider ways to shorten the recruit to hire time and how to attract skilled, experienced IT personnel. The City should ensure that all employees receive regular (annual) computer security awareness training.

Management's Response: The City:

- Has prepared a formal written agreement with the County regarding fiber connectivity which will be executed in December 2009.
- Will review hiring procedures and salaries so that vacancies are filled in a timely manner whenever possible
- Will develop a plan for employee training on computer security awareness

City of Las Cruces
Schedule of State Auditor Rule Findings — continued
For the Year Ended June 30, 2009

SA 09-4 — Mileage Reimbursements

Condition: Mileage reimbursement was requested twice by an employee and both reimbursement requests were paid.

Criteria: Mileage reimbursements should be accurately disbursed in accordance with the City of Las Cruces Travel Policy, City Manager Policy CMP1.3.

Effect: A mileage reimbursement of \$33.82 was paid twice.

Cause: Mileage reimbursement requests are not adequately reviewed to ensure that reimbursements are paid in accordance to the City's travel policy.

Auditors' Recommendation: We recommend that the City implement adequate controls to provide assurance that mileage reimbursements are properly disbursed.

Management's Response: The City will review controls to provide assurance that mileage reimbursements are accurate and proper.

City of Las Cruces
Schedule of State Auditor Rule Findings — continued
For the Year Ended June 30, 2009

SA 09-5 — Reporting

Federal program information:

Funding agency:	U.S. Department of Transportations
Title:	Federal Transit Cluster
CFDA number:	20.500/20.507
Award number:	Various
Award period	9/30/05 – Completion

Condition: Required financial reports were submitted to the granting agency; however, reports tested were filed up to four days after the due date.

Criteria: The program requires financial reports to be filed within 30 days at the end of each program year.

Questioned Costs: None.

Context: Four out of four financial reports tested.

Effect: The program may not be in compliance with its reporting requirements if financial reports are not prepared and filed in a timely manner.

Cause: Internal control procedures are not being followed to ensure financial reports are submitted prior to the due date.

Auditors' Recommendations: All financial reports should be submitted as outlined in the grant agreement. The program director should maintain a calendar noting when the financial reports are due and ensure they are submitted by the due date.

Management's Response: The City will establish procedures to ensure compliance in grant reporting.

Housing Authority of the City of Las Cruces
Notes to Schedule of Expenditures of Federal Awards
For the Year Ended June 30, 2009

1) General

The accompanying schedule of expenditures of federal awards presents expenditures of all federal awards of the Housing Authority of the City of Las Cruces, New Mexico, (the "Housing Authority"). The Housing Authority's reporting entity is defined in Note 1 to the Housing Authority's financial statements.

2) Basis of Presentation

The accompanying schedule of expenditures of federal awards includes federal grant activity of the Housing Authority and is presented on the accrual basis of accounting. The information in this schedule is presented in accordance with the requirements of OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Therefore, some amounts presented in this schedule may differ from amounts presented in, or used in the preparation of, the basic financial statements.

Independent Auditors' Report on Internal Control
Over Financial Reporting and on Compliance and
Other Matters Based on an Audit of Financial Statements
Performed in Accordance With *Government Auditing Standards*

Mr. Hector Balderas,
New Mexico State Auditor,
The Board of Commissioners of the Housing
Authority of the City of Las Cruces
and the
Honorable Mayor and City Council Members of
the City of Las Cruces

We have audited the financial statements and budgetary comparison of the Housing Authority of the City of Las Cruces (the "Housing Authority"), a component unit of the City of Las Cruces, New Mexico, as of and for the year ended June 30, 2009, and have issued our report thereon dated November 17, 2009. Our report was modified to include a reference to other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Other auditors audited the financial statements of Montana Senior Village, LLC, MSV II Limited Partnership, Stone Mountain Place, LP, Falcon Ridge, LP, and Cimmaron II Apartments Limited Partnership, component units of the Housing Authority, as described in our report on the Housing Authority's financial statements and budgetary comparison. This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that are reported on separately by those auditors.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the Housing Authority's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Housing Authority's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Housing Authority's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the Housing Authority's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Housing Authority's financial statements that is more than inconsequential will not be prevented or detected by the Housing Authority's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Housing Authority's internal control. Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Housing Authority's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. We noted a matter that is required to be reported under *Government Auditing Standards* paragraphs 5.14 and 5.16 and Section 12-6-5 NMSA 1978, which is described in the accompanying schedule of findings and questioned costs as item SA 09-1.

The Housing Authority's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the Housing Authority's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the City of Las Cruces' City Council, the Housing Authority's Board of Commissioners and management, the State of New Mexico Office of the State Auditor, the New Mexico Department of Finance and Administration, federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

REDW LLC

November 17, 2009

**Independent Auditors' Report on Compliance with Requirements
Applicable to Each Major Program and on Internal Control
Over Compliance in Accordance with OMB Circular A-133**

Mr. Hector Balderas,
New Mexico State Auditor,
The Board of Commissioners of the Housing
Authority of the City of Las Cruces and the
Honorable Mayor and City Council Members of
the City of Las Cruces

Compliance

We have audited the compliance of the Housing Authority of the City of Las Cruces (the "Housing Authority") with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2009. The Housing Authority's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of the Housing Authority's management. Our responsibility is to express an opinion on the Housing Authority's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the Housing Authority's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on the Housing Authority's compliance with those requirements.

In our opinion, the Housing Authority complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2009. However, the results of our auditing procedures disclosed instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as items FA 09-1 and FA 09-2.

Internal Control Over Compliance

The management of the Housing Authority is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the Housing Authority's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the Housing Authority's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in the Housing Authority's internal control that might be significant deficiencies or material weaknesses as defined below. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be significant deficiencies.

A *control deficiency* in the Housing Authority's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the Housing Authority's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the Housing Authority's internal control. We consider the deficiencies in internal control over compliance described in the accompanying schedule of findings and questioned costs as items FA 09-1 and FA 09-2 to be significant deficiencies.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the Housing Authority's internal control. We did not consider any of the deficiencies described in the accompanying schedule of findings and questioned costs to be material weaknesses.

The Housing Authority's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the Housing Authority's responses and, accordingly, we express no opinion on them.

This report is intended solely for the information and use of the City of Las Cruces' City Council, the Housing Authority's Board of Commissioners and management, the State of New Mexico Office of the State Auditor, the New Mexico Department of Finance and Administration, federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

14.871

Section 8 Housing Choice Vouchers

Dollar threshold used to distinguish
between type A and type B programs:

\$300,000

Auditee qualified as low-risk auditee?

No

Housing Authority of the City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section II — State Auditor Findings and Questioned Costs

The following finding is reported in accordance with the New Mexico State Audit Rule 2 NMAC 2.2., *Requirements for Contracting and Conducting Audits of Agencies*.

SA 09-1 — Rental Contracts and W-9's

Criteria or Specific Requirement: For landlords participating in the Section 8 Voucher program, the Housing Authority should obtain a signed W-9 that matches the landlord name and address on the rental contract and a signed rental contract.

Condition: One out of fifteen files tested did not have a W-9 or a signed rental contract.

Cause: Procedures were not in place to ensure that the Housing Authority maintained W-9's and signed contracts for all landlords participating in the Section 8 Voucher Program.

Effect: Failure to maintain signed contracts and W-9 forms for all landlords causes the Housing Authority to be out of compliance with their policy.

Auditors' Recommendations: A signed W-9 agreeing to the landlord name and address on the signed rental agreement should be maintained by the Housing Authority.

Management's Response: Management will ensure to maintain all W-9s and signed contracts and that the information in a signed W-9 corresponds to the landlord/owner name and address on the signed rental contract.

Housing Authority of the City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section III — Federal Award Findings and Questioned Costs

FA 09-1 — Special Tests and Provisions — HAP Payments

Federal program information:

Funding agency:	U.S. Department of Housing and Urban Development
Title:	Section 8 Housing Choice Vouchers Program
CFDA Number:	14.871
Award number:	N/A
Award period:	7/1/08 – 6/30/09

Criteria: The Housing Authority must pay a monthly Housing Assistance Payment (HAP) on behalf of the family that corresponds with the amount on line 12u of the HUD-50058. This HAP amount must be reflected on the HAP contract and HAP register. (24 CFR section 982.158 and 982 subpart K).

Condition: For one out of fifteen files, the HAP in the check register did not agree to the HAP amount on line 12u of the HUD-50058 form.

Questioned Costs: None.

Cause: The HAP payment did not agree with line 12u of the HUD-50058 form.

Effect: Failure to document the correct HAP amount may cause the Housing Authority to be out of compliance with HUD requirements.

Auditors' Recommendations: The Housing Authority should ensure that the monthly HAP agrees to the amount on line 12u of the HUD-50058. In addition, this amount must be reflected on the HAP contract and HAP register.

Management's Response: Management will ensure that the monthly HAP agrees to the amount on line 2 of the HUD 50058 and reflected on the HAP contract and HAP register.

Housing Authority of the City of Las Cruces
Schedule of Findings and Questioned Costs — continued
For the Year Ended June 30, 2009

Section III — Federal Award Findings and Questioned Costs — continued

FA 09-2 — Special Tests and Provisions — Reasonable Rent

Federal program information:

Funding agency:	U.S. Department of Housing and Urban Development
Title:	Section 8 Housing Choice Vouchers Program
CFDA Number:	14.871
Award number:	N/A
Award period:	7/1/08 – 6/30/09

Criteria: The Public Housing Authority's (PHA) administrative plan must state the method used by the PHA to determine that the rent to owner is reasonable in comparison to rent for other comparable unassisted units. The PHA determination must consider unit attributes such as the location, quality, size, unit type, and age of the unit, and any amenities, housing services, maintenance and utilities provided by the owner.

The PHA must determine that the rent to owner is reasonable at the time of initial leasing. Also, the PHA must determine reasonable rent during the term of the contract: (a) before any increase in the rent to owner; and (b) at the HAP contract anniversary if there is a five percent decrease in the published Fair Market Rent (FMR) in effect 60 days before the HAP contract anniversary. The PHA must maintain records to document the basis for the determination that rent to owner is a reasonable rent (initially and during the term of the HAP contract) (24 CFR sections 982.4, 982.54(d)(15), 982.158(f)(7), and 982.507).

Condition: One out of fifteen files did not contain evidence of rent reasonableness determination.

Questioned Costs: None.

Cause: There was no evidence that a rent reasonableness report was performed.

Effect: Failure to perform and document a rent reasonableness determination may cause the Housing Authority to be out of compliance with HUD requirements.

Auditors' Recommendations: Evidence of reasonable rent at the time of initial leasing and during the term of contract should be included in every tenant file.

Management's Response: Management will ensure that evidence of reasonable rent determination at the time of initial leasing and during the term of contract is included in every tenant file.

INDEPENDENT AUDITORS' REPORT

Mr. Hector H. Balderas, State Auditor and
The Board of County Commissioners
Dona Ana County
Las Cruces, New Mexico

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund and the aggregate remaining fund information of the Dona Ana County (the "County"), as of and for the year ended June 30, 2009, which collectively comprise the County's basic financial statements as listed in the table of contents. We also have audited the financial statements of each of the County's non-major governmental, non-major enterprise, internal service and fiduciary funds presented as supplementary information in the accompanying combining and individual fund financial statements as of and for the year ended June 30, 2009, as listed in the table of contents. These financial statements are the responsibility of the County's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards, generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of Dona Ana County, as of June 30, 2009, the respective changes in financial position and cash flows, where applicable, there of and the respective budgetary comparison of the general, and major special revenue funds for the year then ended in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of each non-major governmental, non-major enterprise, internal service, and fiduciary funds of Dona Ana County as of June 30, 2009, and the respective changes in financial position and cash flows, where applicable, there of and the respective budgetary comparisons for the major debt service fund and all non-major funds for the year then ended in conformity with accounting principles generally accepted in the United States of America.

Mr. Hector H. Balderas, State Auditor and
The Board of County Commissioners
Dona Ana County
Las Cruces, New Mexico
Page Two

In accordance with *Government Auditing Standards*, we have also issued our reports dated November 11, 2009 on our consideration of the Dona Ana County's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

The management's discussion and analysis on pages 4 through 15 is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consist principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was performed for the purpose of forming opinions on the basic financial statements, and the combining and individual fund financial statements and budgetary comparisons. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the financial statements. The additional schedules listed as "other supplementary information" in the table of contents are presented for purposes of additional analysis and are not a required part of the financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

The Dona Ana County's management discussion and analysis presents an overview of the County's financial activities for the fiscal year ended June 30, 2009. Please read it in conjunction with the Dona Ana County's financial statements beginning on page 16.

FINANCIAL HIGHLIGHTS

- The County completed fiscal year 2009 with \$357,428,763 in total assets; this is a less than one percent increase in assets when compared to the \$356,864,987 in fiscal year 2008. Total Liabilities for net assets decreased by roughly 15.7% or \$73,573,594 to \$62,012,348; while Total Net Assets increased by approximately 4.3% or \$283,291,393 to complete the fiscal year at \$295,416,415.
- Governmental Activity increased by roughly 8.4% or \$19,036,480 to end the fiscal year at \$245,243,974; while Business-Type Activities decreased by 12.11% or \$6,911,548 for a fiscal year net asset balance of \$50,172,441; while revenues increased by 1.2% \$122,539,177 and exceeded expenditures \$111,299,277 by 10.0%.
- The County's financial analysis of County Governmental Funds indicates an increase in total assets of \$1,192,191 or 1.1% to \$107,417,175; total liabilities decreased by \$3,875,463 or 21.6%, while total fund balance increased by \$5,067,654 or 5.7%.
- On February 10, 2005, the Dona Ana County, the City of Sunland Park and Verde Group, LLC, entered into a Memorandum of Understanding to create a Joint Water Wastewater Authority to provide water, wastewater services, and, zoning and sub-division services for the Santa Teresa-Border Area of Southern Dona Ana County. Included in this agreement is the transfer of fixed assets from Dona Ana County to the newly created entity. Current worth of these assets to be transferred approximates \$14,000,000. This MOU is still in effect in the current fiscal year.
- Dona Ana County received state appropriations totaling \$5,000,000 for the Colonias Initiative from the State of New Mexico Governor's Office to improve infrastructure within the 40 substandard designated colonia communities within the County's boundaries. In fiscal year 2009, \$340,789 has been expended.
- The County successfully negotiated a contract with the County Detention Officers. They received a salary increase of 2.4%.
- Total bonded debt at June 30, 2009 for the County was \$48,180,000.
- The new 1/4 of 1 percent tax approved by voters to support infrastructure development at Spaceport America (north of Las Cruces) went into effect on January 1.
- The new 1/16 of 1 percent tax approved by the Board of County Commissioners to support county correctional facility operations went into effect on July 1, 2009.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

OVERVIEW OF THE FINANCIAL STATEMENTS

The discussion and analysis are intended to serve as an introduction to the County's basic financial statements. The County's basic financial statements are comprised of three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements.

Government-Wide Financial Statements

The *government-wide financial statements* consist of two statements and are designed to provide readers with a broad overview of the County's finances in a manner similar to a private-sector business.

The *Statement of Net Assets* presents information on all the County's assets and liabilities, with the difference between the two reported as net assets.

The *Statement of Activities* presents information showing how the County's net assets changed during fiscal year 2009. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned and unused vacation leave).

Both of these financial statements distinguish functions of the County that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the County include General Government, Public Safety, Public Works, Health and Welfare, and Cultural and Recreation. The business-type activities of the County include Water, Wastewater, and Rental Housing Fund Financial Statements.

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The County, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the County can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

Governmental Funds

Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spend-able resources, as well as balances of spend-able resources available at the end of the fiscal year. Such information may be useful in evaluating the County's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide reconciliation to facilitate this comparison between governmental funds and governmental activities.

The County adopts an annual appropriated budget for its general, special revenue, debt service and capital projects funds. A budgetary comparison statement has been provided for these funds to demonstrate budgetary compliance.

The basic governmental fund financial statements begin on page 18 of this report.

Proprietary Fund

The County maintains two types of proprietary funds. *Enterprise funds* are used to report the same function presented as business-type activities in the government-wide financial statements. The County uses enterprise funds to account for the fiscal activities relating to various Water and Wastewater Utilities, and HUD's Low Rent Housing Villa Sereno, as well as operations. An internal service fund is utilized to charge costs of fleet maintenance to individual funds.

The basic proprietary fund financial statements begin on page 24 of this report.

Fiduciary Funds

Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are not reflected in the government-wide financial statement because the resources of those funds are not available to support the County's own programs.

The basic fiduciary fund financial statements begin on page 32 of this report.

JUNE 30, 2009

Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 33-66 of this report.

Other Information

In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information. Required supplementary information can be found starting on page 67 of this report.

The combining statements referred to earlier in connection with Nonmajor governmental funds and Nonmajor enterprise funds are presented in the supplementary information section of this report. Combining schedules can be found on pages 78-139 of this report.

MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

GOVERNMENT-WIDE FINANCIAL ANALYSIS (Broad Overview of Finances)

The County implemented the new financial reporting model required by Governmental Accounting Standards Board Statement No. 34 in fiscal year ended June 30, 2003. Over time, as year-to-year financial information is accumulated on a consistent basis, changes in net assets may be observed and used to discuss the changing financial position of the County as a whole.

Net Assets:						
Invested in Capital Assets	151,927,384	137,403,172	53,522,526	52,123,882	205,449,910	189,527,054
Restricted Assets	5,415,034	3,632,899	0	0	5,415,034	3,632,899
Unrestricted Assets	87,901,556	85,171,423	(3,350,085)	4,960,017	84,551,471	90,131,440
Total Net Assets	245,243,974	226,207,494	50,172,441	57,083,899	295,416,415	283,291,393
Total Liabilities And Net Assets	\$ 301,003,187	\$ 291,595,501	\$ 56,425,576	\$ 65,269,486	\$ 357,428,763	\$ 356,864,987

The largest portion of the County's net assets reflects its investment in capital assets (i.e., land, land improvements, buildings, equipment, utility infrastructure); less any related outstanding debt used to acquire those assets. The County uses these capital assets to provide services to citizens; consequently, these assets are *not* available for future spending. Although, the County's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the County's net assets represents resources that are subject to external restrictions on how they may be used. The remaining balance of *unrestricted* net assets may be used to meet the County's ongoing obligations to citizens and creditors.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

Governmental Activities

Governmental activities increased the County's net assets by \$19,036,480. The increase is due predominantly to the contribution of roads to the County by developers as well as an increase in operating grants for health and welfare and grants for public works projects.

On June 1, 2004, the County and the City of Las Cruces terminated the lease of the County and City-owned hospital to Memorial Medical Center, Inc. (MMCI, a non-profit corporation) and executed a new 40-year lease to Province Healthcare, Inc. (PHI), now taken over by Life Point. The County and City each began receiving half of MMCI's assets from the resulting liquidation of the corporation. The increase in Net assets mentioned above is primarily a result of the prepayment of the 40-year lease by PHI and the liquidation of MMCI. More detailed information about the hospital lease is presented on page 63, Note 14 to the financial statements.

The overall financial position in governmental activities increased by 8.5%. The change in net assets from 2008 to 2009 was \$19,036,480; contributions of roads noted above as well as substantial public works grants and health and welfare grants/constructions account for this change.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

Business-Type Activities

The overall financial position of the business-type activities changed predominantly due to the development of a new housing project.

Construction continues on water and wastewater utilities for the County. The County is anticipating the transfer of assets of the Border (Santa Teresa) Water and Wastewater facilities to the Joint Water Wastewater Authority. Overall the County utility connections increased by 99 connections for a total of 2,822.

FINANCIAL ANALYSIS OF THE COUNTY'S FUNDS

Governmental Funds

The focus of the County's governmental funds is to provide information on near-term inflows, outflows, and balances of spend-able resources. Such information is useful in assessing the County's financing requirements. In particular, Unreserved Fund Balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

The unreserved and undesignated portion of the total governmental fund balance is \$64,804,279 and is available for spending at the County's discretion. Of the amount remaining in fund balance, \$22,526,239 is designated for health care and \$6,015,626 is reserved for debt service, capital acquisition and inventories.

As of the end of fiscal year 2009, the County's governmental funds reported combined ending fund balances of \$93,346,144, an increase of \$5,067,654 in comparison with the prior year. The general fund balance at the end of fiscal year 2009 is reported at \$51,817,695, which is an increase of \$1,458,832. This shows that revenues were substantially the same while expenditures increased.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

Proprietary Funds

The County's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail. Proprietary funds are business-type funds, which include Water and Wastewater Systems, and HUD's Low Rent Housing Villa Sereno.

Total net assets of proprietary funds at the end of the year amounted to \$50,904,605.

Other factors concerning the finances of these funds have been addressed in the discussion of the County's business-type activities and capital assets.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2009

GENERAL FUND BUDGETARY ANALYSIS

- The General Fund revenue budget increased approximately \$2,132,982 from \$70,026,668 to a final budget of \$72,159,650. With the economic pain felt across the country, the PILT (payment-in-lieu-of-taxes) program assisted local communities by distributing larger payments that reflect the results of annual inflationary adjustments to the per acre and population variables used in the formula to compute payment amounts. In addition, intergovernmental grant revenue increased due to the County's acceptance of a sub-grant agreement from the New Mexico Department of Homeland Security and Emergency Management.
- The County's General Fund actual revenues at fiscal year end totaled \$67,236,801 versus a budget of \$72,159,650 for a shortfall of \$4,922,849. The County experienced a significant decrease in intergovernmental grant revenues as well as a substantial decrease in investment earnings due to a drop in interest rates.
- The General Fund expenditure budget increased approximately \$3,610,965 from \$69,451,615 to a final budget of \$72,415,324. This increase was due primarily to the County's acceptance of a sub-grant agreement from the New Mexico Department of Homeland Security and Emergency Management as well as the addition of 40 new full time equivalent positions to enhance detention center jail command structure and operations.
- The County's General Fund expenditure budget at fiscal year end totaled \$72,415,324 while actual expenditures totaled \$64,538,970, or \$7,876,354 under budget. Due to the economic downturn, the County was forced to implement a freeze on filling vacant positions, limit travel for continuing education and cut back on capital purchases.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

Construction was completed on the Rincon Volunteer Fire Department remodel and the improvements to Colquitt Park. The costs were transferred from the Governmental Type Construction-In-Progress account to the Building and Structures and to the Land Improvements capital asset accounts, respectively, in fiscal year 2009.

Construction was completed on the Santa Teresa Airport runway extension and sewer system, the Milagro and San Miguel Wastewater projects, and various road projects. The costs were transferred from the Governmental Type Construction-In-Progress account to the Infrastructure account in fiscal year 2009.

Major capital asset events during fiscal year 2009 included:

- Reclassification of the Santa Teresa Airport expansion from Construction-In-Progress to Infrastructure.
- Reclassification of Dona Ana County road projects from Construction-In-Progress to infrastructure.
- Continued construction on the County's Utility and Road projects.

DONA ANA COUNTY
MANAGEMENT'S DISCUSSION AND ANALYSIS
JUNE 30, 2008

Long-Term Debt

The County's outstanding notes and bonded debt decreased by \$1,133,880 or less than 2.0% during the fiscal year 2009. Notes payable increased 6.1%; this increase is due to the County drawing down an additional \$501,375 (including accrued interest) of the \$5.4 million of the Clean Water State Revolving Loan. Bonded debt decreased by \$1,475,000 or 2.9% during the fiscal year.

At the end of fiscal year 2009, the County had total long-term debt outstanding to various agencies of \$54,972,817 or a 12.1% (\$7,136,161) decrease from the prior fiscal year.

Additional information on the County's debt can be found in Note 7 beginning on page 53 of this report.

Economic Outlook

The County was slower to enter a recession than most parts of the country. Some states entered recession in late 2007 and others throughout 2008. According to Moody's Economy, the State of New Mexico was slow to feel the impact of the national downturn and Dona Ana County did not enter recession until Spring of 2009. Moody's Economy predicts job growth for the State of New Mexico in the first quarter of 2010, which would indicate a "last in, first out" scenario -- areas affected last by the recession should tend to be first to recover.

Property taxes, a major revenue for the County, have continued to experience growth, though at a slower rate than in recent years. Assessed value grew a little over 7% from 2008 to 2009. Gross Receipts Taxes have remained fairly constant over the past year, though appear to have dropped off slightly this past Spring, which is consistent with Moody's Economy's findings. Other revenues, other than Federal and State grants have remained fairly constant.

State funding is somewhat questionable in the near term. The Governor has taken action to freeze unencumbered grant funds and the legislature is attempting to address a budget deficit. An early recovery for the State would help address this reduction in funding.

Accordingly, we are cautious about our ability to maintain the same levels of service.

REQUEST FOR INFORMATION

The financial report is designed to present users with a general overview of the County's finances and to demonstrate the County's accountability. If you have questions concerning any of the information provided in this report or need additional information, contact the County's Financial Services Director, 845 N Motel Blvd., Las Cruces, New Mexico 88007.

DONA ANA COUNTY
RECONCILIATION OF THE STATEMENT OF REVENUES,
EXPENDITURES, AND CHANGES IN FUND BALANCES OF
GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
FOR THE FISCAL YEAR ENDED JUNE 30, 2009

Total Net Change in Fund Balances - Governmental Funds	\$5,067,654
Current year capital outlays, net of losses from deletions were \$18,478,800, capital assets received as a donation were \$3,917,496, and long-term debt principal payments and capital lease payments totaled \$8,452,637. Additionally, the change in compensated absences (also long-term debt) caused an increase of \$181,482 and capital leases terminated and therefore, resulted in income of \$180,988. These amounts are expenditures or other resources in the fund financial statements, but they should be shown as increases in capital assets and reductions in long-term debt and revenues in the government-wide financial statements. The net effect of removing the 2009 capital outlays, debt principal payments and other resources is to increase net assets.	31,211,403
Depreciation is not recognized as an expense in governmental funds since it does not require the use of current financial resources. The net effect of the current year's depreciation is to decrease net assets.	(17,043,889)
Internal service funds are used by management to charge the costs of Fleet Maintenance to individual funds. The governmental activities portion of the loss has been recorded in the related functions.	(40,360)
Other reclassification are necessary to convert from the modified accrual basis of accounting to accrual basis of accounting to show the revenue earned from the current year's tax levy.	(158,328)
<u>Change in net assets of governmental activities</u>	<u>\$19,036,480</u>

NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES

Description and Reporting Entity

The function of Dona Ana County is briefly addressed in the grant of powers provided to all New Mexico counties pursuant to state statute 4-37-1 NMSA 1978. The function is "...to provide for the safety, preserve the health, promote the prosperity, and improve the morals, order, comfort, and convenience of the county or its inhabitants..." The County operates under a Commission form of government rule, which oversees:

- the assessment, collection, and distribution of ad valorem taxes by an elected assessor and treasurer;
- law enforcement by an elected sheriff;
- recording and filing by an elected county clerk and elected probate judge;
- fire protection by volunteer fire departments;
- road maintenance by an appointed road superintendent;
- purchasing by an appointed purchasing agent;
- indigent hospital care by an appointed indigent coordinator;
- administrative services by an appointed county manager; and,
- planning, health, welfare, recreation, and cultural affairs by appointed citizen advisory boards.

The financial statements of the County have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard setting body for establishing governmental accounting and financial reporting principles. The County's most significant accounting policies are described below.

Reporting Entity

The financial statements of the County encompass the activities of the County Commission, County Clerk, Tax Assessor, County Treasurer, Sheriff, and Probate Judge. The commission activity includes the function of the County Manager's office, the County Road Superintendent, the County Purchasing Agent, the Indigent Claims Coordinator, and the volunteer fire districts throughout the county.

In evaluating how to define the County for financial reporting purposes, management has considered all potential component units. The decision to include a potential component unit in the reporting entity was made by applying the criteria set forth in GAAP. The basic-but not the only-criterion for including a potential component unit within the reporting entity is the governing body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, the ability to significantly influence operations and accountability for fiscal matters. The other criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the County is able to exercise oversight responsibilities. Based upon the application of these criteria, the Housing Authority of Dona Ana County is determined to be a department of the County whose governing body is substantively the same as the Board of County Commissioners. Accordingly, the Housing Authority is reported as part of the primary government.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

Basis of Presentation

Government–Wide Statements – The Statement of Net Assets and the Statement of Activities display information about the government (the County). These statements include the financial activities of the overall government, except for fiduciary activities. Eliminations have been made to minimize the double counting of internal activities. These statements distinguish between the governmental and business-type activities of the County. Governmental activities generally are financed through taxes, intergovernmental revenues, and other nonexchange transactions. Business-type activities are financed in whole or in part by fees charged to external parties.

The Statement of Activities presents a comparison between direct expenses and program revenues for the different business-type activities of the County and for each function of the County’s governmental activities. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular function. Program revenues include (a) fees, fines, and charges paid by the recipients of goods or services offered by the programs and (b) grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all taxes, are presented as general revenues.

Fund Financial Statements – The fund financial statements provide information about the County’s funds, including its fiduciary funds. Separate statements for each fund category (governmental, proprietary, and fiduciary) are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and enterprise funds are aggregated and reported as nonmajor funds.

Proprietary fund operating revenues, such as charges for services, result from exchange transactions associated with the principal activity of the fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Nonoperating revenues, such as subsidies and investment earnings, result from nonexchange transactions or ancillary activities.

The County reports the general fund as a major governmental fund. This is the County’s primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

In addition, the County reports the following other major funds:

- Special Revenue Fund – The Health Services Fund accounts for the activities of the County’s indigent health care, which provides services to the residents of the County for local health services.
- Debt Service Fund – The Debt Service Fund accounts for the County’s accumulation of resources for, and the payment of governmental fund debt principal and interest.
- Enterprise Fund – The Border Wastewater fund accounts for wastewater system activities for residents in a portion of the southern part of the County.
- Enterprise Fund – The Border Water fund accounts for the service activities of this water system for residents in a portion of the southern part of the County.
- Enterprise Fund – The South Central Wastewater fund accounts for the activities of the wastewater utility, which provides service to the residents in Vado/Del Cerro, Chamberino, Berino and south central areas of the County.
- Enterprise Fund – The NMED County Utilities fund accounts for the service activities of various County utility systems.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

The County also reports the following fund types:

- *Debt Service Funds* are used to account for the accumulation of resources for, and the payment of, general long-term debt principal and interest.
- *Agency Funds* are used to account for monies held by the County in a custodial capacity. They do not report operations or have a measurement focus.

Measurement Focus. Basis of Accounting

Government-Wide, Proprietary, and Fiduciary Fund Financial Statements – The government-wide, proprietary, and fiduciary fund financial statements are reported using the economic resources measurement focus. The government-wide and proprietary fund financial statements are reported using the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place.

Nonexchange transactions, in which the County gives (or receives) value without directly receiving (or giving) equal value in exchange, include property taxes, grants, entitlements, and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. Revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied.

Governmental Fund Financial Statements – Governmental funds are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. The County considers all revenues reported in the governmental funds to be available if the revenues are collected within sixty days after year-end. Property taxes, sales taxes, franchise taxes, licenses, and interest are considered to be susceptible to accrual. Revenue from derived taxes (sales taxes, gas taxes, and motor vehicle taxes) is recognized when the underlying transaction takes place (when the retail sale is generated). Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, claims and judgments, and compensated absences, which are recognized as expenditures to the extent they have matured. General capital asset acquisitions are reported as expenditures in governmental funds. Proceeds of general long-term debt and acquisitions under capital leases are reported as other financing sources.

Under the terms of grant agreements, the County funds certain programs by a combination of specific cost-reimbursement grants, categorical block grants, and general revenues. Thus, when program expenses are incurred, there are both restricted and unrestricted net assets available to finance the program. It is the County's policy to first apply cost-reimbursement grant resources to such programs, followed by categorical block grants, and then by general revenues.

All governmental and business-type activities of the County follow FASB Statements and Interpretations issued on or before November 30, 1989, Accounting Principles Board Opinions, and Accounting Research Bulletins, unless those pronouncements conflict with GASB pronouncements. The County has also elected to apply FASB Statements and Interpretations issued after November 30, 1989, unless those pronouncements conflict with GASB pronouncements.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

Assets Liabilities and Equity

Cash Equivalents

The County pools idle cash from all funds for the purpose of increasing income through investment activities. A “Pooled Cash” concept is used in maintaining the cash and investment accounts in the accounting records. Under this method, all cash is pooled for investment purposes and each fund has equity in the pooled amount. All amounts included in pooled cash and investments are considered to be cash equivalents for the purposes of the statement of cash flows, except for certificates of deposit, which have original maturities of more than 90 days.

Receivables and Payables

All trade and property tax receivables are shown net of an allowance for uncollectibles.

Inventories and Prepaid Items

Inventories are valued at cost using the first-in/first-out (FIFO) method. The costs of governmental fund-type inventories are recorded as expenditures when consumed rather than when purchased.

Capital Assets

Purchased or constructed capital assets are reported at cost or estimated historical cost. The County defines capital assets as assets with lives of greater than one year and a cost or donated value of \$5,000 or greater.

Donated capital assets are recorded at their estimated fair value at the date of donation. All infrastructure assets have been recorded (predominantly roads and utilities). In addition, software purchased from vendors is capitalized. The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend assets’ lives are not capitalized. Capital assets are depreciated using the straight-line method over the following estimated useful lives:

<u>Asset Class</u>	<u>Estimated Useful Lives (in Years)</u>
Land Improvements	10
Infrastructure	5 –50
Buildings and Improvements	10 – 40
Vehicles	4 – 12
Equipment and Furniture	3 – 15

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

Net Assets

Net assets are displayed in three components:

Invested in Capital Assets, net of related debt – This component consists of capital assets, net of accumulated depreciation and reduced by the outstanding balances of any related debt attributable to the acquisition, construction, or improvement of those assets.

Restricted Net Assets – Net assets are reported as restricted when constraints placed on net asset use are either (1) externally imposed by creditors, grantors, contributions or laws or regulations of other governments or (2) imposed by law through constitutional provisions or enabling legislation.

Unrestricted Net Assets – Net assets that do not meet the definition of “restricted” and “Invested in capital assets, net of related debt.”

Fund Balance

Reserved – The portion of fund balance that is not appropriable for expenditure or is legally segregated for specific future use.

Unreserved – The portion of fund balance that is not reserved but may be designated as noted below.

Designated – The position of fund balance established to indicate tentative plans for financial resources utilization in a future period.

Budgets and Budgetary Accounting

The County adopts budgets for each individual fund (governmental and proprietary).

In late winter or early spring, the County prepares a budget calendar, thus starting the budgetary process for the upcoming July 1 fiscal year. Budget request forms are distributed to County departments and local service agencies with a specified completion date. Legally mandated advance notices are formally published for grant availability and other purposes once budget hearings have been scheduled. The budget hearings are then held with all County department heads and local service agency representatives. Generally, in late May or early June, a budget meeting is held for tentative approval of the completed budget. After tentative approval at the County level, the budget is submitted to the New Mexico Department of Finance and Administration (DFA) for approval of a temporary operational budget beginning July 1.

Immediately after July 1, when ending cash balances for the preceding fiscal year have been accurately ascertained, a final hearing is convened for finalization of the budget, and it is resubmitted to DFA for formal approval. None of the above budgetary processes are legally required to occur at any specified time; however DFA requires that the time frame be such that they (DFA) render their final budget approval no later than September 1 of the budget year in question.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

During the course of the fiscal year, the County prepares monthly budget reports. Under New Mexico State law, each year's budget appropriation legally lapses at year-end.

Budgetary Compliance – Budgetary control is required to be maintained at the individual fund level with the exception of the Housing Authority.

Actual fund revenues may be either over or under the budgeted amounts; however, the variance is required to be reasonable, particularly in the case of over-budgeted revenues. Major over-budgeted revenues require a budget amendment as soon as the extent of the shortage is reasonably ascertainable.

Budget Amendments – Budget increases and decreases can only be accomplished by Commission resolution, followed by DFA approval. Similarly, budget transfers must follow the same procedure.

Budgetary Basis – State law prescribes that the County's budget be prepared on the basis of cash receipts and cash expenditures. Therefore, budgetary comparisons shown in exhibits are prepared on a cash basis to compare actual revenues and expenditures with a cash basis budget as amended.

Budget – Housing Authority – The housing program budgets are established annually and approved by HUD (Housing and Urban Development). These housing budgets are used only as a guide. Should the housing programs incur expenditures over and above the original budgeted amount (predominantly housing assistance payments - section 8 program) additional funding will be requested and received from HUD. Therefore, the housing program budgets are a guide only and the grantor analyzes Housing Assistance payments in relation to administrative costs to determine if additional funding is warranted.

Investments

The County's investments are regulated by state law as well as by guidelines and rules promulgated by the State Investment Council and the State Treasurer. All investments are generally highly liquid in nature and are integrated with cash on the financial statements with appropriate disclosure. Investments are stated at fair value, which is determined using selected bases. Certificates of deposit are reported at carrying amount, which reasonably estimates fair value. Investments in a U.S. Treasury Fund and repurchase agreements are valued at the last reported sales price at current exchange rates. Additional cash, investment information, and fair values are presented in Note 2.

The County also participates in the State Treasurer Local Government Investment Pool. State law and regulations regulate this pool. Investment in the pool is reported at carrying amount, which reasonably estimates fair value.

Deferred Revenue

The taxes receivable are an aggregate of uncollected amounts assessed for the current fiscal year, as well as delinquent balances carried forward from the nine preceding fiscal years. Except for taxes received in advance or under protest, tax revenue received is distributed within thirty days to other local governmental units and county funds. While some of the delinquent outstanding balances will eventually be eliminated through corrections, litigation, and other property tax administrative procedures, the majority of the balances will ultimately be realized through delinquent payment or tax sales. The aggregate amount of this ultimate realization is generally difficult to ascertain at any point in time. Thus, taxes not collected within sixty days of fiscal year end are carried in the liability section of the balance sheet as deferred revenue on the fund basis financial statements

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING PRINCIPLES (CONTINUED)

Income Taxes

As a local government entity, the County is not subject to federal or state income taxes.

Compensated Absences

Accrued annual leave, sick leave, and compensatory time are the components of accrued compensated absences. An employee may not carry over more than 288 hours of vacation leave into a new calendar year, nor receive payment for more than 288 hours upon separation. Under a new human resources policy adopted November 27, 1999, only employees retiring through PERA, with a minimum of 15 years of County service, shall be paid for accrued sick leave hours, limited to a maximum of 600 hours, subject to a maximum cash payment of \$15,000. In addition, such employees shall be compensated for any unused sick leave hours accrued as of November 27, 1999, at the employee's pay rate in effect on that date. Compensatory time is accrued in full for non-exempt employees under the Fair Labor Standards Act.

Capitalized Interest

The County capitalizes net interest costs as part of the cost of constructing various projects when material. Of the total interest costs incurred of \$3,278,053 during fiscal year 2009, none was capitalized into fixed assets.

Interfund Transactions

Interfund Transfers In (Out)

Interfund transfers are transactions, which constitute reimbursements to one fund for expenditures initially expended that are properly applicable to another fund. The interfund transfer records the expenditure in the reimbursing fund while reducing expenditures in the reimbursed fund. Interfund payables and receivables are reflected in the appropriate fund.

Due From/To Other Funds

Activity between funds that are representative of lending/borrowing arrangements outstanding at the end of the fiscal year are referred to as "due from/to other funds." Any residual balances outstanding between the governmental activities and business-type activities are reported in the government-wide financial statements as "internal balances." All balances are expected to be repaid within one year.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 2. CASH AND INVESTMENTS

The County's cash balances are reserved from subsequent years and consist of demand deposits, interest bearing savings accounts, certificates of deposit and repurchase agreements. The certificates of deposit and repurchase agreements have varying interest rates and maturity dates. The majority of County cash and investments are co-mingled. All interest income is accounted for in the related funds.

State law governs the County's investments. State regulations require that uninsured demand deposits and deposit-type investments such as certificates of deposit be collateralized by the depository thrift or banking institution. At present, state statutes require that a minimum of fifty percent of uninsured balances on deposit with any one institution must be collateralized, with higher requirements up to 100% for financially troubled institutions. Investments in repurchase agreements must be collateralized at 102% of the contract.

Cash at June 30, 2009 consisted of the following:

	CASH		Account Type
	Reconciled Balance	On Deposit June 30, 2009

** The County's investment in the State Investment Pool was not rated, although the securities within the pool are rated.

- a. The investments are valued at fair value based on quoted market prices as of the valuation date;
- b. The State Treasurer Local Government Investment Pool is not SEC registered. The State Treasurer is authorized to invest the short-term investment funds with the advice and consent of the State Board of Finance in accordance with Sections 6-10-10 I through 6-10-10 P and Sections 6-10-10 1A and E, NMSA 1978
- c. The pool does not have unit shares. Per Section 6-10-10.1F, NMSA 1978, at the end of each month all interest earned is distributed by the State Treasurer to the contributing entities in amounts directly proportionate to the respective amounts deposited in the fund and the length of time the amounts fund were invested; and
- d. Participation in the local government investment pool is voluntary.

♦ The Reserve Contingency Fund was established from the State Investment Pool LGIP's remaining position in the Reserve Primary Fund. The Reserve Contingency Fund, which is not rated, is a non-performing asset and, as such, a WAM cannot be calculated. The remaining balance of the fund has been written down to 85% based on the estimated recoverable amount.

Custodial Credit Risk Deposits – Custodial credit risk is the risk that in the event of a bank failure, the County funds may not be returned. The County is required to obtain from each bank that is a depository for public funds pledged collateral in an aggregate amount equal to 50% of the public money in each account. The pledged securities must be in the name of the governmental entity and held by the entity or its agent. Since the County complies with this law, it has no custodial credit risk for deposits.

The carrying amount of the deposits and investments were categorized to give an indication of the level of risk assumed by the County. As of June 30, 2009, of the \$70,888,281 bank balance none was exposed to custodial credit risk. The categories and amounts are shown below.

Insured, registered, or collateralized with securities held by the County or by its agent in the County's name	\$4,598,569
Uninsured, collateralized with securities held by the pledging financial institution's trust department or agent in the County's name	66,289,712
Uninsured and uncollateralized	0
<i>Total cash, certificates of deposits and investments (on deposit)</i>	<u>\$70,888,281</u>

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 2. CASH AND INVESTMENTS (CONTINUED)

Custodial Credit Risk Investments – Custodial Credit Risk is the risk that, in the event of failure of the counterparty, the County will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The County's investments are not exposed to custodial credit risk. All are fully collateralized and the collateral is held in the County's name.

Concentration of Credit Risk – Concentration of credit risk is the risk of loss attributed to the magnitude of the County's investment in a single issuer. The County's investments are diversified to avoid incurring concentration of credit risk. With the exception of authorized pools, no more than 50% of the total investment portfolio is in one single security type or financial institution.

Credit Risk – The County's investments shall be in accordance with State Law 6-10-10 and 6-10-10.1 NMSA 1978, including but not limited to the following: Treasury Bills, Notes, Bonds, Strips, and US Government securities which are backed by the full faith and credit of the U.S. Government. Negotiable securities of the State of New Mexico or any county, municipality, or school district with the advice and consent of the Board of Finance per 6-10-44 NMSA 1978, 6-10-10FNMSA 1978, 6-10-10NMSA 1978.

Interest Rate Risk – Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of the County investments. The County's investment policy follows New Mexico State Statute Section 6-1 0-36E (NMSA, 1978 Comp) requiring the interest rate on time deposits shall not be less than the rate fixed by the State Board of Finance, but in no case shall the rate of interest be less than one hundred percent of the asked price on United States Treasury bills of the same maturity on the day of deposit.

Foreign Currency Risk – Deposits and Investments - The County is not exposed to the risk that changes in exchange rates will adversely affect the fair value of an investment as none of the investments pools nor certificates of deposit are dominated in a foreign currency.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 5. PROPERTY TAXES

Property taxes attach as an unsubordinated enforceable lien on property as of January 1 of the assessment year. Current year taxes are levied within five days of the rate setting order received from New Mexico Department of Finance and Administration (7-38-32 thru 7-38-36). Tax bills are mailed by November 1, unless the Dona Ana County Assessor obtains a formal extension of time from the New Mexico Property Tax Division. Taxpayers have the option to pay in two equal installments due by the close of business November 10th and April 10th. Penalty and interest will be accrued after the delinquency due dates of December 10th and May 10th. In the event of a formal extension, the respective dates are correspondingly extended.

The County bills and collects its own taxes, as well as the taxes for three school districts, four municipalities, the Community College, the New Mexico Livestock Board, the Watershed District, and the State of New Mexico. In tax year 2009, the County billed 8.249 per \$1,000 of net assessed valuation of residential property and 12.001 per \$1,000 of net assessed valuation of nonresidential property. The statutory maximum rate for servicing long-term debt is unlimited, although the total amount of outstanding debt at any one time is restricted by other factors. The County's share of the property taxes equal approximately 33.9% of the total and is used for general governmental services and retirement of long-term debt.

The County is required to report all real property delinquencies in excess of three years to the New Mexico Property Tax Division. The State, in turn, administers all subsequent collection actions and proceedings.

DONA ANA COUNTY

Bonds are liquidated from the debt service funds and other long-term liabilities are liquidated from the general fund and special revenue funds. Moreover, no short-term debt was incurred during fiscal year 2009.

Business-type Activities:

Verde Group Liability

In 1999, the County entered into an agreement with the Santa Teresa Limited Partnership and Paseo Del Norte Limited Partnership. (The Verde Group has since bought out the Santa Teresa and Paseo Del Norte partnerships and assumed their role). The agreement was executed to ensure payment for the water bond that was used to construct utility infrastructure in the area of Santa Teresa. Payment of the bonds per this agreement was to be made from the Utility system gross revenues, the Land Owner's guarantee and the proceeds of the County's equalization tax. Per the agreement, the Land Owner's will provide the shortfall between net revenues from the utilities and debt service of the water bonds. This agreement (guarantee) is secured by land documented in the Security Agreement and Mortgage executed between the parties above.

A contingency comes about regarding the repayment to the Land Owners for the shortfall monies that are advanced to the County. The agreement also stipulates that upon expiration of the guarantee, the County shall reimburse from the net revenues of the utility system the funds advanced to the County for shortfall of the bond payments along with 3% interest. Repayment will begin when the Utility System net revenues equals or exceeds 1.25% of the debt service in a lump sum or over a period of seven years, at the County's discretion.

The Verde Group Liability was paid during the fiscal year ended June 30, 2009 with funds from the Water System Revenue Bond Series 2008 at a negotiated amount of \$1,200,000 including accrued interest.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 7. LONG-TERM DEBT (CONTINUED)

Water System Revenue Bond, Series 2008

In December 2008, the County issued refunding bonds to defease the Water System/Gross Receipts Tax Revenue Bonds, Series 1999 and payoff the Verde Group Liability with the issuance of \$7,765,000 in Bonds with variable rates of 2% to 3.5% to mature December 15, 2033. The 2008 bonds were purchased by the County with Dona Ana Hospital Lease Funds.

Upon issuance of the bonds, \$5,295,000 was placed in an escrow fund to defease the Series 1999 bonds. In addition, the County paid off a negotiated payoff balance to the Verde Group of \$1,200,000 including interest. This negotiated payoff resulted in income to the County of \$1,116,671.

Although, the refunding resulted in recognition of an accounting gain of \$1,116,671, the County in effect incurred an economic loss which is the difference between the present values of the old and new debt service payments of \$544,930.

As a result of the County's negotiated payoff of the Verde Group Liability an early principal payment \$1,100,000 was made on the bonds resulting in a June 30, 2009 balance of \$6,665,000.

NOTE 7. LONG-TERM DEBT (CONTINUED)

Notes Payable

On June 30, 2003, the County entered into a loan agreement in the amount of \$5,400,000 with the New Mexico Environment Department. The loan proceeds are to be used to improve or construct a Sanitary Sewer System by constructing, extending, enlarging, repairing, and otherwise improving the County's wastewater collection system, conveyance and treatment facilities. During fiscal year 2009, the County drawdowns totaled \$501,375 (including accrued interest of \$264,794). The loan calls for 20 annual payments of \$289,884 and interest is calculated at a rate of 2.0%. As of June 30, 2009, the balance is \$4,740,014. Payments will begin on February 5, 2010.

Future requirements:

	Principal	Interest	Total
2010	\$195,083	\$94,800	\$289,883
2011	198,985	90,899	289,884

Total	\$4,740,014	\$1,057,660	\$5,797,674

Governmental Activities:

General Obligation Bonds

The County has refunded two series of general obligation bonds through the issuance of the series 2003 Refunding Bond in the amount of \$4,805,000. These bonds were issued to fund acquisition and improvements to judicial and administrative facilities.

On June 20, 2003, the County issued \$4,805,000 in General Obligation Bonds with an average interest rate of 2% to advance refund \$4,560,000 of outstanding 1993 and 1994 series bonds with an average interest rate of 5.3%. The net proceeds of \$4,682,569 after payment of bond issuance costs plus an additional \$339,487 of 1993 and 1994 sinking fund monies were used to fund an irrevocable trust with an escrow agent to provide for all future debt service payments on the 1993 and 1994 series bonds. As a result, the 1993 and 1994 series bonds are considered to be defeased and the liability for these bonds have been removed from the debts of the County.

Although the advance refunding resulted in the recognition of an accounting loss of \$122,569 for the year ended June 30, 2003, the County in effect reduced its aggregate debt service payments by \$609,294 over the next 10 years and obtained an economic gain (difference in the present values of the old and new debt service payments) of \$544,061.

<i>Total</i>	\$2,575,000	\$187,237	\$2,762,237

Revenue Bonds

The County has four series of revenue bonds to service in governmental activities.

Gross Receipts Tax Refunding and Improvement Revenue Bonds, Subordinate Series 1998 (\$27,890,000) were issued by the County to provide funds for an advance refunding of outstanding debt, as described elsewhere in this note, and for making improvements to the existing County Jail and juvenile detention facility. Principal and interest are serviced from a non-exclusive first lien on Correctional System Revenues and a subordinate lien on the County's Gross Receipts Tax Revenues.

In 1999, the County issued \$6,000,000 of Water System/Gross Receipts Tax Revenue bonds to provide funds for purchasing, constructing, or otherwise acquiring, water and wastewater systems in the County for the Santa Teresa - Border Regional Water System. The bonds are payable from equalization. Revenues are received by the County from the New Mexico Department of Taxation and Revenue, and from the net revenues of the County owned public utility. The bonds are secured by a non-exclusive first lien on both the Equalization Revenues and the Project Revenues.

On October 1, 2003, the County issued Gross Receipts Tax Refunding and Improvement Revenue Bonds, Series 2003 in the amount of \$7,145,000 with interest rates ranging from 2.50% to 3.25%. The bonds mature serially on May 1 in each of the years 2004 through 2028 with term bonds, subject to mandatory redemption, maturing May 1, 2025 and May 1, 2028. The gross bond proceeds of \$7,189,428 were used for purchasing, constructing or otherwise acquiring buildings, including but not limited to, County administrative facilities and to refund a loan to the County from the New Mexico Finance Authority of \$822,552, which was deposited in an escrow account. The proceeds, after payment of issuance costs and the NMFA loan, of \$6,077,346 were deposited in an Acquisition Fund. The bonds are payable from revenues received by the New Mexico Department of Taxation and Revenue's Equalization Revenues.

On June 1, 2004, the County issued New Mexico Payment-in-Lieu of Taxes (PILT) Revenue Bonds, Series 2004A in the amount of \$13,800,000 with interest rates ranging from 4.500% to 5.300%. The bond proceeds of \$13,857,148 were used for the purposes of providing funds for designing, acquiring, constructing, furnishing and equipping County buildings, including but not limited to, County administrative facilities, purchasing or improving any ground, including parking lots, or any combination thereof. Of the proceeds discussed above, \$986,874 was deposited in the Debt Service Reserve Fund to be used only to prevent deficiencies in the payment of the principal and interest on the bonds. The remaining proceeds, after payment of issuance costs and various deposits in other funds, of \$12,109,440 was deposited in an Acquisition Fund. The bond principal and interest will be paid from PILT revenue received from the Bureau of Land Management on an annual basis.

Special Assessment Debt

In 2001, the County issued \$7,775,000 of Santa Teresa Improvement District bonds. Proceeds of the 2001 A Bonds were used to finance the acquisition of certain road improvements previously constructed in the Airport Road District. The 2001 A Bonds are secured by the pledge of certain special assessments secured by liens on property within the Airport Road District and moneys and securities on deposit in specified funds described in the 2001A Indenture. The 2001 B Bonds are secured by certain pledged property, including special assessments secured by liens on property with the Border Industrial Park District and moneys and securities on deposit in specified funds described in the 2001B Indenture. The final maturity date is January 1, 2021. The interest rate for the 2001 A Bonds is 8.375% and 8.875% for the 2001B Bonds.

Future Requirements:

	Principal	Interest	Total

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 7. LONG-TERM DEBT (CONTINUED)

Notes Payable

Prior to fiscal year 2000, the County had drawn \$676,528 against proceeds available from a \$750,000 loan granted by the State of New Mexico Environment Department for the purpose of developing a consolidated liquid waste treatment and disposal system. On September 10, 1999, the loan agreement was amended. Accrued construction interest of \$147,663 was rolled into the total disbursements to become part of the principal. The terms of the loan were amended March 12, 2001 providing for annual payments of \$51,091 including interest calculated at a rate of 2% per annum, with the final payment due June 17, 2019. As of June 30, 2009 the balance is \$458,929, with repayments to be provided from general fund sources. Net revenues from the operation of the septic disposal facilities and environmental services gross receipts tax revenues are pledged as security.

During fiscal year 1999, the County drew \$1,579,030 against proceeds available from a \$2,215,217 loan from the New Mexico Finance Authority for the purpose of providing flood protection. Of the net loan proceeds, \$165,374 was deposited into a reserve account. Upon completion of the project, \$485,000 that had not been drawn, including construction period interest earned, was applied as prepayment on the last four years' maturities. The terms of the loan, as revised, call for annual payments ranging from \$152,363 to \$135,006, including interest ranging from 4.05% to 5.05% per annum and an administrative fee of 0.25%, with the final payment due May 1, 2015. As of June 30, 2009, the balance is \$686,331 with repayments to be provided from the Flood Commission Special Revenue Fund. Revenues generated by the County Flood Fund ad valorem tax are pledged as security.

In November 1999, the County borrowed \$85,640 from the New Mexico Finance Authority for the acquisition and construction of an equipment building for the Chaparral Fire District. The terms of the loan call for annual payments of \$10,322 for 10 years, including interest ranging from 3.930% to 5.200% per annum and an administrative fee of 0.25%, with the final payment due May 1, 2010. As of June 30, 2009, the balance of \$9,998 is accounted for in the General Fund, with repayments to be provided solely from the pledged revenues. The distribution to Chaparral Fire District made annually by the State Treasurer is pledged as security.

The future payments required for notes payable accounted for in the Governmental Activities funds are as follows:

	Principal	Interest	Total
2010	\$165,232	\$46,735	\$211,967
2011	161,235	40,179	201,414
2012	167,598	33,549	201,147
2013	174,316	25,562	199,878
2014	181,388	18,521	199,909
2015 – 2019	305,489	20,925	326,414
Total	\$1,155,258	\$185,471	\$1,340,729

As of June 30, 2002, the County had drawn \$300,000 against proceeds available from \$300,000 granted by the New Mexico Department of Finance and Administration for a loan to 21st Century Grain Processing Cooperative. The funds were provided through the Community Development Block Grant program to install a railroad spur to the Rincon Mill. The terms of the loan call for semi-annual payments of \$18,347 for 10 years, including interest calculated at 4% per annum, with the final payment due June 30, 2010. The June 30, 2009 balance of \$35,622 is accounted for in the Agency Fund, with repayments to be provided from loan payments received from 21st Century Grain Processing Cooperative. The loan by the County to 21st Century is secured by a second mortgage on real estate owned by 21st Century in Rincon.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 7. LONG-TERM DEBT (CONTINUED)

Notes Payable (Continued)

The future payments required for notes payable accounted for in the Agency Fund are as follows:

	Principal	Interest	Total
2010	\$35,622	\$1,072	\$36,694
<i>Total</i>	\$35,622	\$1,072	\$36,694

Capital Leases Payable

During fiscal year 2004, the County entered into three capital leases for the purchase of voting machines. The lessor for these voting machines is the State of New Mexico in the amount of \$506,535. In addition, the County also entered into other capital leases for various office equipment and road equipment. The interest rate for these leases varies between 3.184% and 5.9%. As of June 30, 2009, the County's outstanding capital leases payable is \$897,545. The future payments required for the capital leases are as follows:

	Principal	Interest	Total
2010	\$122,056	\$29,955	\$152,011
2011	623,527	23,090	646,617
2012	50,654	0	50,654
2013	50,654	0	50,654
2014	50,654	0	50,654
<i>Total</i>	\$897,545	\$53,045	\$950,590

During fiscal year 2009 two of the road equipment capital leases paid off with the final unpaid balloon payments totaling \$396,575. They were converted to monthly operating leases. During fiscal year 2010 two more leases will convert to operating leases with unpaid balloon payments of \$322,593. These leases have also been reflected as operating leases in the current year.

NOTE 8. RESERVED AND DESIGNATED FUND EQUITY

At June 30, 2009, the County had reserved fund balances of \$5,415,034 for debt service and \$587,238 for construction on capital projects. As further discussed in the significant accounting policy section, the County has reserved fund balances for inventory in the amount of \$13,354.

In relation to the hospital lease described in Note 14, the County has designated \$22,526,539 for health care in the General Fund.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 9. COMMITMENTS, CONTINGENCIES, AND SUBSEQUENT EVENTS

The County receives significant financial assistance from federal and state grants and entitlements. Amounts received or receivable from grantor agencies are subject to audit and adjustment by grantor agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The County believes that any liabilities resulting from disallowed amounts will not have a material effect on the County's financial statements.

The County is party to various legal proceedings, which are the unavoidable results of governmental operations. Specifically, the County is involved in three environmental issues that may result in clean up/remediation costs.

The County continues to cooperate fully with the Environmental Protection Agency (EPA) during their investigation related to a Superfund Site. The County and the City of Las Cruces have accepted shared responsibility for the remediation effort. In addition, the County believes that EPA will name another responsible party who will have significant responsibility to share in the costs. The County expended \$95,304 for fiscal year 2009. It is estimated that removing the contamination from the ground water will require approximately 15-20 years. The City and County have obtained a loan with the New Mexico Finance Authority for \$7 million to pay for costs of infrastructure. The County does not make any payments for the principal until the entire loan is drawn down, which is at the end of the construction phase. Revenues from the sale of treated water will partly offset operation costs during the remediation phase. The EPA may also seek to recover costs incurred during the Remedial Investigation and prior to naming the County, City and the potential third party as responsible parties. That cost is estimated to be \$5.3 million.

The County remains non-compliant with its state issued permits for the liquid waste facility at Mesquite, New Mexico. The New Mexico Environment Department is aware of this issue; however, as the County is aggressively trying to remedy the situation, it is not anticipated that any fines will be assessed. The County is currently completing the design phase of a construction project to remedy the situation. The County is seeking possible funding solutions for the construction phase.

There is also an issue with arsenic levels in southern Dona Ana County that could result in litigation between the state and the county. There may be EPA penalties, although an order has not been issued. The County believes their liability in this matter is minimal, but at this time is not determinable.

Two suits filed in United States District Court have named Dona Ana County as a defendant, alleging violation of civil rights and received certification of class action status. The suits challenged the constitutionality of the visual search policy and procedure at the Dona Ana County Detention Center. These cases have been settled for \$5,000,000. The County insurer, NMAC and its reinsurer, CRL have paid \$2,350,000 of the settlement. However, there is a coverage dispute between the County and its excess carrier, which has filed for a declaratory judgment. Pending the resolution of the declaratory judgment, the County and the excess carrier have each paid \$1,325,000 for a total of \$2,650,000.

The County has active construction projects as of June 30, 2009. The projects are predominantly for road and utility system construction. At year-end, the County had remaining commitments of \$633,387 for architectural services and \$2,173,090 for construction.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 10. DEFINED BENEFIT PENSION PLAN

Plan Description. Substantially all of Dona Ana County's full-time employees participate in a public employee retirement system authorized under the Public Employees Retirement Act (Chapter 10, Article 11 NMSA 1978). The Public Employees Retirement Association (PERA) is the administrator of the plan, which is a cost sharing, multiple-employer defined benefit retirement plan. The plan provides for retirement benefits, disability benefits, survivor benefits and cost-of-living adjustments to plan members and beneficiaries. PERA issues a separate publicly available financial report that includes financial statements and required supplementary information for the plan. That report may be obtained by writing to PERA, P.O. Box 2123, Santa Fe, New Mexico 87504-2123. The report is also available on PERA's website at www.pera.state.nm.us.

For covered employees other than law enforcement personnel and firefighters, participants are required to contribute 13.15 percent of their gross salary to the plan. The County contributes 75 percent of the 13.15 percent of employee required contribution as well as a required matching contribution of 9.15 percent of general participants' gross salary. The contribution rate is 16.3 percent of gross salaries for law enforcement participants (excluding detention employees). The County's portion of law enforcement participants is 18.50 percent of gross salaries. Detention employees are considered general participants. The contribution rate for firefighter members is 16.20 percent, and the County is required to contribute 21.25 percent of their gross salaries. The contribution requirements of plan members and Dona Ana County are established in State statute under Chapter 10, Article 11, NMSA 1978. The requirements may be amended by acts of the legislature. Contributions to PERA for the following fiscal years were:

	<u>County</u>	<u>Employee</u>	<u>Total</u>
June 30, 2009	\$4,908,794	\$1,643,689	\$6,552,483
June 30, 2008	\$4,409,645	\$1,463,942	\$5,873,587
June 30, 2007	\$4,125,848	\$1,369,803	\$5,495,652

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 11. DEFERRED COMPENSATION PLAN

Dona Ana County offers its employees a deferred compensation plan created in accordance with Internal Revenue Code Section 457. The plan, available to all permanent County employees, permits them to defer a portion of their salary until future years. The deferred compensation is not available to employees until termination, retirement, death, or unforeseeable emergency.

All amounts of compensation deferred under the plan, all property and rights purchased with those amounts, and all income attributable to those amounts, property, or rights are (until paid or made available to the employee or other beneficiary) solely the property and rights of the National Association of Counties (without being restricted to the provisions of benefits under the plan), subject only to the claims of the National Association of Counties general creditors.

Participant's rights under the plan are equal to those of general creditors of the National Association of Counties in an amount equal to the fair market value of the deferred account for each participant. All amounts of deferred compensation have been remitted to the National Association of Counties, which administers the plan.

NOTE 12. OPERATING LEASES

The County is currently obligated under operating leases for various buildings and equipment. All operating leases are annually renewable and therefore have no continuing obligation.

Rental payments charged to current operations for the year ended June 30, 2009 totaled \$220,096.

NOTE 13. BUDGETARY – GAAP REPORTING RECONCILIATION

The accompanying statements of Revenues and Expenditures, Budget (Non-GAAP) and Actual (Cash Basis), for the General Fund and Special Revenue Fund, present comparisons of the adopted Budget (more fully disclosed in Note 1) with actual data on a budgetary basis. Since accounting principles applied for purposes of developing data on a budgetary basis differ significantly from those used to present financial statements in conformity with accounting principles generally accepted in the United States of America, a reconciliation of resultant basis, timing, perspective, and entity differences in excess (deficiency) of revenues over expenditures for the year ended June 30, 2009, is presented below:

	General	Special Revenue <u>Health Services (SLIAG)</u>
Excess (deficiency) of revenues and other financial sources over expenditures and other financial uses (budgetary basis)	\$64,867	(\$3,242,057)
Adjustments for revenue accruals, transfers, earnings on investments	1,669,938	(44,450)
Adjustments for expenditures for payables, inventory, accruals, transfers, and uses	<u>(275,973)</u>	<u>91,335</u>
Excess (deficiency) of revenues and other financial sources over expenditures and other financial uses (GAAP basis)	<u>\$1,458,832</u>	<u>(\$3,195,172)</u>

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 14. HOSPITAL LEASE

Memorial Medical Center-Province Hospital (Telshor Facility)

In 1966 the County and the City adopted a joint resolution to create a joint county-municipal hospital to provide medical services to all of the citizens of Dona Ana County. The hospital was constructed and operated by the City and County through a Board of Trustees until 1998, when it was leased to Memorial Medical Center, Inc. (MMCI), a New Mexico not-for-profit corporation.

On June 1, 2004, the City, the County and MMCI, jointly terminated the lease. On that date, the City and County executed a 40-year lease agreement for the hospital facilities and equipment with PHC-Las Cruces, Inc. (PHC), a New Mexico corporation and a wholly-owned subsidiary of Province Healthcare Corporation, a Delaware corporation. In accordance with the lease agreement, PHC has deposited certain amounts into escrow accounts to cover certain contingencies of the hospital and paid certain hospital liabilities, including outstanding bonds. The lease transaction was recorded during fiscal year 2004.

The proceeds of the PHC lease were reported in a subfund of the General Fund and the resulting equity has been reserved for health related programs and health related capital projects as disclosed in Note 8 Reserved and Designated Fund Equity.

Pursuant to the Termination Agreement, MMCI began distributing its cash and investments equally between the County and the City in July 2004. MMCI retained cash to pay certain liabilities; any cash remaining at the end of the liquidation process will be distributed equally between the County and the City.

In addition, PHC made a one-time grant of \$5 million to Dona Ana County to be distributed in the sole discretion of the County and City to improve the integration of services provided by the clinics in the County operated by the federally qualified health center organizations, the hospital, and the existing family residency program and to expand the service hours of the same clinics. The grant is accounted for as deferred revenue in the General Fund. The unexpended portion of the grant at June 30, 2009 is \$3,056,800.

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 15. RESTATEMENTS OF BEGINNING BALANCES

DONA ANA COUNTY
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 2009

NOTE 16. OTHER REQUIRED DISCLOSURES

The following funds incurred a deficit fund balance at June 30, 2009:

State Appropriation Fund	\$76,969
Chaparral Wastewater System – SAP	\$15,833

Management intends to transfer sufficient funds from the General Fund to cover any deficits.

The Housing Authority exceeded expenditure budgets, although the budgets were adopted in accordance with HUD requirements. See Finding 2007-06.

NOTE 17. RISK MANAGEMENT

Multi-line Risk Pool

The County participates in the New Mexico Self Insurers' Fund. The County's premium is redetermined every year, and is based on the County's loss experience over the previous three years. The deductibles at the County level are as follows:

\$1,000 per incident for accident/loss to County property
\$6,000 per incident for Civil Rights related claims
\$10,000 per incident for Law Enforcement related claims

Limits of coverage through the risk pool are as follows:

\$2,000,000 Employee Dishonesty
\$2,000,000 Worker's Compensation per accident or occupational disease
\$2,000,000 Crime coverage
\$1,750,000 Tort and Law Enforcement related claims
\$150,000,000 per occurrence for property losses
\$4,000,000 additional coverage for Excess Foreign Jurisdiction claims
\$3,000,000 Environmental Liability Insurance
\$255,000 Volunteer Firefighters Accident
\$20,000 Land Use Coverage per occurrence and \$40,000 aggregate
\$30,000,000 Earthquake and Flood
\$6,000,000 Foreign Jurisdiction Liability

Contributions paid to the pool for the 2008/2009 fiscal year were \$3,779,758.

Commercial Insurance

Commercial liability insurance covers the County's airport operations up to \$10,000,000 per occurrence. There is no deductible. Premiums paid for 2008/2009 were \$6,193. In addition, the County maintains commercial liability policies for Accidental Death and Dismemberment of the County's Independent Fire Districts (premium paid of \$74,142) and Pollution and Remediation Legal Liability (premium paid of \$44,533).

DONA ANA COUNTY
NONMAJOR SPECIAL REVENUE FUNDS
JUNE 30, 2009

Nonmajor Special Revenue Funds

The special revenue funds are used to account for the proceeds of specific revenue sources (other than major capital projects) that are legally restricted to expenditures for specified purposes.

Special revenue funds consist of the following:

CFP Housing – To account for HUD’s Public Housing Capital Fund Program, which replaces CIAP and CGP. Provides funds for capital improvements for Housing Authority-owned housing.

CDBG – Rio Grande Water – To account for federal grant funding for the Rio Grande Water Project.

Colonias Initiative – To improve the quality of life for residents of the colonias of Dona Ana County. Colonias are defined as communities within 150 miles of the U.S./Mexico border that lack one or more of the following: potable water, centralized sewer system, safe, sanitary, and decent housing, and improved roads.

Community Services – To provide funding for a variety of County construction and renovation projects. Financing is provided by special appropriation from the New Mexico State Legislature. This fund has been established to comply with the accountability requirements of the grant agreements.

Confiscated Assets – In accordance with NMSA Section 54-11-33 – To account for the Dona Ana County Sheriff’s confiscated asset program related directly to its drug interdiction program. The program was established through a joint powers agreement between Dona Ana County Sheriff’s department and the U.S. Drug Enforcement Agency. Required by Federal Equitable sharing agreement between the Sheriffs Department and U.S. Departments of Justice and Treasury.

COPS – To provide funding for the County to add full time officers to the Sheriffs Department. The funding runs for three years, at which time the County must make a good faith effort to retain the positions at the conclusion of the grant. Financing is provided by the U.S. Department of Justice, Office of Community Oriented Policing Services. This fund has been established in accordance with 28 CFR66.20.

Correction Fees – To account for fees collected by the magistrate court and the motor vehicle division and distributed by the state Administrative Office of the Courts to the County, pursuant to NMSA 1978 Section 33-3-25. The fund is restricted to paying costs of the county jailor juvenile detention facility.

County Flood Commission Fund- To account for the operations of the flood projects, in accordance with NMSA Compilation Section 7 Article 38-38-1.The funding is provided by charging an administrative fee on property taxes collected and distributed.

DOH – BHSD State Incentive – This program provides funding to fight substance abuse in Dona Ana County. Funding source of financing is the U.S. Department of Health and Human Services, passed through the State of New Mexico. The fund was established in accordance with 45 CFR 74.21.

DONA ANA COUNTY
NONMAJOR SPECIAL REVENUE FUNDS
JUNE 30, 2009

Nonmajor Special Revenue Funds (Continued)

DWI Grants – The DWI program partners with many entities that include law enforcement, MADD, National Guard, Safe Kids, private businesses and more, to combat the high DWI rate in Dona Ana County. Funding is provided by the U.S. Department of Justice. This fund has been established in accordance with 28 CFR 66.20.

Emergency Fund – This program provides for emergency funds that may be required for any emergency within the County. The County Budget Resolution #2006-56 established the fund pursuant to the Board of County Commissioners.

Emergency Medical Services – In accordance with NMSA Section 7-24-IOA -To account for the operation and maintenance of Rural Metro Ambulance Service, Hatch Clinic, and various volunteer fire districts. Funding is from the State Emergency Medical Fund Act. State Law requires that financing be provided in this manner.

Farm and Range – In accordance with NMSA Section 6-11-5/6 -To provide for the Fish and Wildlife Service in control of predator animals. Funding is from the Taylor Grazing Act.

Fire Districts – In accordance with NMSA 7-20E-1 5 – To account for the operation and maintenance of the sixteen volunteer fire districts throughout the County of Dona Ana. Funding is provided from the State Fire Fund.

Housing Assistance - Section 8 Vouchers – To account for rent subsidy payments from HUD, and for HUD's new Public Housing Capital Fund Program, CFDA# 14.872, which provides funds for capital improvements for Housing Authority-owned housing. This fund was set up to comply with the requirements of 24 CFR 85.20.

Housing - Grant - NMFA – The Mortgage Finance Authority will facilitate the rehabilitation, reconstruction, or new construction of 17 homes in any New Mexico designated colonias neighborhood.

Indigent Hospital Care Fund – In accordance with NMSA Section 7-20E-9 to account for hospital expenditures for County indigents. Funds are provided through local gross receipts tax.

Law Enforcement Block Grant – This fund provides for purchase of equipment used in law enforcement.

Law Enforcement Grant – This program provides the County with funds to underwrite projects designed to reduce crime and improve public safety.

Law Enforcement Protection – In accordance with NMSA Section 29-13 – To account for expenditures of the sheriffs department. Financing is provided by the State.

Reappraisal Administrative Fees – In accordance with NMSA 7-38-38.1 - To account for countywide reappraisal funding and expenditures.

DONA ANA COUNTY
NONMAJOR SPECIAL REVENUE FUNDS
JUNE 30, 2009

Nonmajor Special Revenue Funds (Continued)

Sheriff's Grants State – Various grants to enable the Sheriff's Department in their goals to reduce crime and improve public safety.

Sheriff's GREAT Grant – To provide funding to allow the County to support New Mexico Intelligence Center initiatives at the SWB New Mexico High Intensity Drug Trafficking Area. The Executive Office of the President, Office of National Drug Control Policy, provides financing. This fund has been established in accordance with grant agreements.

Spaceport Gross Receipts Tax - To provide funding to the regional Spaceport district for the financing, planning, designing, engineering and construction of a Spaceport or for projects or services of the district pursuant to the regional Spaceport district act by DAC Ordinance 227A-07.

State Appropriations – Appropriations from the State Legislature for various projects.

Substance Abuse Grants – In accordance with 28 CFR 66.20, to account for a Drug-Free Communities Support Program grant from the U.S. Department of Justice Office of Juvenile Justice and Delinquency Prevention, and for substance abuse programs funded by local and private sources.

TIDD – Tax Increment Development District – To Provide financing of public infrastructure serving the district, including without limitation: streets, utility infrastructure, parking facilities, and other public facilities.

Victims of Crime – The program, which is under the Office of Justice Programs, provides funds to raise awareness during National Crime Victim's Rights Week.

NONMAJOR CAPITAL PROJECTS FUNDS
JUNE 30, 2009

Nonmajor Capital Projects Funds

The capital projects funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities.

Capital projects funds consist of the following:

Airport FAA Projects – To account for the costs of the development of airports in the County.

Border Industrial Park Assessment Project – To account for costs related to the construction and acquisition of Industrial Park improvements.

Chaparral Wastewater Systems - SAP – To account for costs of the construction of the wastewater system with state funding.

Chaparral Wastewater - R.U.S. – To account for costs of the construction of the wastewater system with federal funding.

Judicial Building Remodeling-Project – To account for the costs of remodeling the Judicial Building.

Griggs – Walnut Superfund – To account for the costs related to the clean up contaminated property.

Utility Projects – To account for the cost of constructing wastewater systems in several communities.

Wastewater Projects/Grants – To account for costs of the water system improvements.

DONA ANA COUNTY
NOTES ON ACCOUNTING POLICIES AND PROCEDURES FOR FEDERAL AWARDS
JUNE 30, 2009

1. Special Revenue Funds are used to account for resources restricted to or designated for specific purposes by a grantor. Generally, federal and state financial assistance is accounted for in a Special Revenue Fund and unused balances are returned to the grantor at the close of specified projects periods. Although, certain capital grants for construction have been accounted for in Capital Projects Funds.
2. The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. The Governmental Fund types are accounted for using a current financial resources measurement focus. All federal grant funds were accounted for in these funds. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net current assets.
3. The modified accrual basis of accounting is used for the Governmental Fund Types and Agency Funds. This basis of accounting recognizes revenues in the accounting period in which they become susceptible to accrual, i.e., both measurable and available, and expenditures in the accounting period in which the fund liability is incurred, if measurable, except for unmatured interest on General Long-Term Debt, which is recognized when the obligations are expected to be liquidated with expendable available financial resources. Federal grant funds are considered to be earned to the extent of expenditures made under the provisions of the grant, and, accordingly, when such funds are received they are recorded as deferred revenues until earned.
4. The period of availability for federal grant funds for the purpose of liquidation of outstanding obligations made on or before the ending date of the federal project period extended 30 days beyond the federal project period ending date, in accordance with provisions in Section H. Period of Availability of Federal Funds, Part 3, OMB Circular A-133 Compliance Supplement.

**REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND
OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED
IN ACCORDANCE WITH *GOVERNMENT AUDITING STANDARDS***

Mr. Hector H. Balderas, State Auditor and
The Board of County Commissioners
Dona Ana County
Las Cruces, New Mexico

We have audited the financial statements of the governmental activities, the business-type activities, each major fund, the aggregate remaining fund information, and the major budget comparisons of Dona Ana County (the "County"), as of and for the year ended June 30, 2009, which collectively comprise the County's basic financial statements and have issued our report thereon dated November 11, 2009. We also audited the financial statements of the County's nonmajor governmental funds, nonmajor enterprise funds, the internal service fund, the fiduciary funds and all the budgetary comparisons presented as supplementary information. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the County's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the County's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over financial reporting.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. However, as discussed below, we identified certain deficiencies in internal control over financial reporting that we consider to be significant deficiencies.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affect the County's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the County's financial statements that is more than inconsequential will not be prevented or detected by the County's internal control. We consider the deficiencies described in the accompanying schedule of findings and questioned costs to be significant deficiencies in internal control over financial reporting, findings 2007-03, 2008-08, and 2009-01 through 2009-05.

Mr. Hector H. Balderas, State Auditor and
The Board of County Commissioners
Dona Ana County
Las Cruces, New Mexico
Page Two

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the County's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies and, accordingly, would not necessarily disclose all significant deficiencies that are also considered to be material weaknesses. However, we believe that none of the significant deficiencies described above is a material weakness.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the County's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance or other matters that are required to be reported under *Government Auditing Standards* and which is described in the accompanying schedule of findings and questioned costs as item 2007-06.

The County's response to the findings identified in our audit is described in the accompanying schedule of findings and questioned costs. We did not audit the County's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of management, the Board of County Commissioners, the State Auditor, the New Mexico Legislature, the New Mexico Department of Finance and Administration, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

November 11, 2009

**REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH
MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE
IN ACCORDANCE WITH OMB CIRCULAR A-133**

Mr. Hector H. Balderas, State Auditor and
The Board of County Commissioners
Dona Ana County
Las Cruces, New Mexico

Compliance

We have audited the compliance of Dona Ana County with the types of compliance requirements described in the *U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2009. Dona Ana County's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of Dona Ana County's management. Our responsibility is to express an opinion on Dona Ana County's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Dona Ana County's compliance with those requirements and performing such other procedures, as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on Dona Ana County's compliance with those requirements.

In our opinion, Dona Ana County complied in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2009.

Mr. Hector H. Balderas, State Auditor and
The Board of County Commissioners
Dona Ana County
Las Cruces, New Mexico
Page Two

Internal Control Over Compliance

The management of Dona Ana County is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered Dona Ana County's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the County's internal control over compliance.

A *control deficiency* in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affect the entity's ability to administer a federal program such that there is more than a remote likelihood that non-compliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the entity's internal control.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

This report is intended solely for the information and use of management, the Board of County Commissioners, the State Auditor, the New Mexico Legislature, the New Mexico Department of Finance and Administration, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

DONA ANA COUNTY
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION I – SUMMARY OF AUDITOR’S RESULTS

FINANCIAL STATEMENTS

Type of Auditor’s Report issued:

Unqualified

Internal Control Over Financial Reporting:

- Material weakness(es) identified? _____ Yes X No
- Significant deficiencies identified that are not considered to be material weaknesses? _____ X Yes _____ No

Noncompliance material to financial statements noted? _____ Yes X No

FEDERAL AWARDS

Internal Control Over Major Programs:

- Material weakness(es) identified? _____ Yes X No
- Significant deficiencies identified that are not considered to be material weaknesses? _____ Yes X No

Type of Auditor’s Report issued on compliance for major programs:

Unqualified

Any audit findings disclosed that are required to be reported in accordance with section 510(a) of Circular A-133? _____ Yes X No

Identification of Major Programs:

<u>CFDA Number(s)</u>	<u>Name of Federal Program or Cluster</u>
97.067	FEMA – State Homeland Security Grant
97.004	FEMA – State Domestic Preparedness Equipment Support Program
14.871	Section 8 Housing Cluster
16.606	State Criminal Alien Assistance Prosecution
10.770	RUS Chaparral Wastewater Project

Dollar threshold used to distinguish between Type A and Type B Programs: \$300,000

Auditee qualified as low-risk auditee? _____ Yes X No

DONA ANA COUNTY
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT YEAR SIGNIFICANT DEFICIENCIES:

2009-01 Tips Reimbursed as Part of Meal Expense Excessive

Statement of Condition – During our test work of the disbursement system (2 of 40 items sampled) and our test work of the travel disbursements (2 of 20 items sampled), we noted tips reimbursed as part of meal costs ranging from 33% to 46% of the actual meal cost.

Criteria – Public funds should be expended with due care in the most cost effective manner.

Cause – Miscalculation of customary tips and lack of County policy providing acceptable limits.

Effect – Waste of public funds.

Recommendation – The County should set a limit for tips that are to be reimbursed for the actual cost reimbursement method. The County may want to consider mandatory use of per diem for meals.

Management's Response – Though the dollar amounts involved are minimal and overall meal expenses were within guidelines, Management agrees that clarification of gratuity guidelines would be prudent. Current State statutes and County policies are silent on this issue. Management will recommend appropriate language additions to the County's *Travel, Per Diem and Mileage Policies and Procedures* for the Board of County Commissioners approval, by the end of calendar year 2009.

DONA ANA COUNTY
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT YEAR SIGNIFICANT DEFICIENCIES (CONTINUED):

2009-02 Travel Costs Over Reimbursed and Incorrectly Classified

Statement of Condition – Our test work of travel reimbursements identified one instance (1 of 20 sampled) where costs were incorrectly classified in the accounting records between lodging and meals and one instance (1 of 20 sampled) where the County over reimbursed by \$49.

Criteria – Travel costs are to be reimbursed under the actual cost method not to exceed the state per diem limits. Accounting records should correctly reflect/classify costs incurred.

Cause – Miscalculation and lack of review.

Effect – Potential violation of anti-donation clause and potential management reliance on inaccurate accounting data.

Recommendation – The County should implement cross checks and review procedures to identify and eliminate errors prior to processing the travel cost reimbursements.

Management's Response – The \$49.00 discrepancy is due to the fact that the County reimbursed the employee for an online rental car quote, rather than the final actual cost. Management will review this reimbursement and make appropriate adjustments.

In the past, small dollar adjustments between travel advance amounts and the final expense report, \$16.59 in this case, were often booked through a single travel line item. Procedures are now in place to book even small adjustments to the proper line item.

DONA ANA COUNTY
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT YEAR SIGNIFICANT DEFICIENCIES (CONTINUED):

2009-03 Payroll – Inconsistent Treatment of Hourly Pay and Policy Not Consistently Applied

Statement of Condition – Employee pay not calculated consistently employee to employee and policy is not consistently applied. The following items were noted during our test:

- Departments do not review timesheets/time cards consistently for basic payroll issues – determining of hours, time assumed when time clock not utilized – settled in employee favor (4 of 40), no required memo attached.
- Employees are allowed to cash out sick leave and vacation when working full regular weekly hours (3 out of 40). (Cash outs of \$129)
- Banner does not agree to employee time card (7 out of 40).
- Time card not properly totaled (3 out of 40).

Criteria – Good internal controls require a detailed review of all transactions at each level, individual departments as well as finance. Sick leave and vacation usage is meant to supplement the regular established work hours not enhance a fully worked pay period.

Cause – Lack of appropriate review of timesheets, lack of clear and consistent application of sick and vacation leave, banner system and time card system not in congruence.

Effect – Potential overpayment of employees, overburdened payroll department for lack of appropriate review at department level, inconsistent application of leave.

Recommendation – The County should clarify department responsibilities for review of payroll, clarify and enforce proper use of leave and consider time card systems that directly feed into banner in a consistent manner.

Management's Response – The County's *Finance Procedures* state that a written explanation *should* be attached, when employees forget to clock in or out. The recently (May 2008) adopted *Human Resources Policies and Procedures* only require the employee to notify his/her supervisor. In practice, missing in/out times are written in and initialed by the employee's supervisor. Management believes this provides sufficient assurance and will amend the *Finance Procedures* accordingly.

Management will review the issue of payment of sick or vacation leave during a week where an employee also works outside of his/her normally scheduled hours. A policy will be developed and implemented, after taking into account legal, equity and collective bargaining considerations.

Staff in the various County departments has primary responsibility to ensure timecards are correctly totaled and that input data matches the timecards. County payroll receives timecards after payroll has been completed and performs an audit of the payroll and makes corrections as problems are found. Management has developed a proposal for Board of County Commissioner's approval to implement a computerized timekeeping system. This timekeeping information will be uploaded directly to the payroll system and thereby drastically reduce addition and data entry errors. Staff proposes beginning the first phase of the implementation in early 2010. The planned second phase would follow in 2011.

DONA ANA COUNTY
SCHEDULE OF FINDINGS AND QUESTIONED COSTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT YEAR SIGNIFICANT DEFICIENCIES (CONTINUED):

2009-04 Inmate Welfare Funds Used for General Operating Costs for Detention

Statement of Condition – Per our test work of disbursements from Inmate Welfare funds, it appears that funds are not being utilized as intended – as follows:

- Purchase of exercise equipment \$3,853.
- Purchase of uniforms \$22,145.
- Purchase of mattresses \$1,597.
- Purchase of towels \$810.
- Payment of post office box fees \$2,660.

Criteria – The funds received from a third party are earmarked for “inmate welfare.”

Cause – No clear definition of “inmate welfare.”

Effect – The inmate welfare funds are being used to supplant the general detention operating costs.

Recommendation – A clear definition of inmate welfare should be established and approved by the third party funder. All future expenditures of inmate welfare funds should meet this definition.

Management’s Response – Inmate Welfare funds are generated as a percentage of sales at the Detention Center Commissary. There are no state guidelines for the expenditure of these funds and Management agrees that County guidelines should be established. Detention Center management will work with the Financial Services Department to establish guidelines for the expenditure of Inmate Welfare funds.

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT YEAR SIGNIFICANT DEFICIENCIES (CONTINUED):

2009-05 Health & Human Services Department Lacks Policies and Procedures

Statement of Condition – The Health & Human Services Department lacks clear and up to date policies and procedures to appropriately manage the department (identified through the County’s internal audit process) as follows:

- DWI policies and procedures have not consistently been disseminated to staff.
- Indigent Health Care Program lacks appropriate operating guides.
- The department lacks procedures to track evidence of insurance for all contracted service providers.
- Lack of clear procedures and documentation for management overrides of applicant documentation for indigent health care claims.
- Quarterly reports to grantor not reconciled to general ledger.

Criteria – Good internal controls require that clear and updated policies and procedures are established and implemented.

Cause – Departments rapid growth resulting in inadequate oversight and review.

Effect – Errors have gone undetected, and potential risk for various program noncompliance.

Recommendation – The department should reorganize in light of growth and update and enhance all policies and procedures. Training should include review of new policies and procedures. Strengthened review and oversight procedures should be implemented and clearly documented.

Management’s Response – The department has developed appropriate policies and procedures, in response to internal audit recommendations, and provided training to staff. All required reconciliations are being performed and are reviewed by the Financial Services Department.

FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT STATUS ON PRIOR YEAR FINDINGS (CONTINUED):

2008-08 Terminated Employees Final Pay Not Consistent With Policy and Employment Law

Repeated with modifications.

Statement of condition – During test work related to payroll, of the 15 forced terminations tested, four of the employees were not paid out in the five calendar days required by County policy and state law.

Criteria – Good internal controls and county policy require terminated employees, and particularly involuntary terminations, be paid out as soon as possible. Employment law requires terminated employees be paid out in five days.

Cause – Lack of timely communication from the departments to the payroll department, as well as a cumbersome payroll system which discourages the processing of single check payroll runs.

Effect – Potential litigation from disgruntled ex-employees and out of compliance with County policy and employment law.

Recommendations – The County should establish procedures to ensure that terminated employees are paid within the five calendar days.

Management Response – The Financial Services Department will reiterate the importance of timely payoffs to payroll staff and department heads in the various County departments and follow up on any untimely submissions of paperwork to avoid future problems.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT STATUS ON PRIOR YEAR FINDINGS (CONTINUED):

2007-03 Cell Phone Charges/Plans Excessive

Repeated with modification.

Statement of Condition – While testing cell phone bills for purposes of fringe benefits, we noted the following:

- No follow-up on resolution of cell phone issues after review.
- Alltel phone bills not being reviewed.
- The appearance of significant personal use, although not in excess of minutes, may be a waste or abuse of public money, (i.e., cell phone plan too large).
- Inconsistencies in size of plan approved for a particular position.
- Volunteer firemen have what appears to be an excessively high calling plan for the County needs.

We selected ten vendor payments for cell phone service and reviewed 20 phone numbers. The above items were noted for seven of the phone numbers reviewed.

Criteria – The Anti-Donation Clause (New Mexico Constitution Article IX, Section 14) prohibits the expenditure of public funds for the direct benefit of an individual absent of a receipt for services or goods. Good internal controls require monitoring of processes or procedures to prevent and detect misuse of public funds as well as waste and abuse.

Cause – Inconsistent monitoring and no County policy as to determination of cell phone plans for various purposes.

Effect – Public funds may have been used for the benefit of an individual, no fringe benefit attached to wages for personal use.

Recommendation – The County should implement a policy for cell phones to document the determination or need for County business by department and position. The policy should also require random review and monitoring of cell phone bills for excessive personal use as well as appropriateness of plan minutes.

Management's Response – Management is reviewing cell phone policies and procedures in use by other public agencies and alternative arrangements, such as stipends, which might eliminate this administrative burden. Based on this information, Management will implement appropriate policies and procedures to address any constitutional concerns. It should be noted that efforts are underway to port all remaining Alltel accounts to Verizon where Management has centralized control of all lines. Most of the Alltel lines identified in the audit as problematic were used by volunteer firefighters and chiefs in the field, who are agents but not employees of Doña Ana County. The firefighters' lines have been converted over to the County's Verizon account. This will allow better oversight of usage by Management and a more cost effective plan for the County. All lines on the Verizon account are 450 minutes per user, on a pooled basis. Because all Verizon lines are pooled, the County has eliminated overage charges for individual lines. Slightly higher rates on the same pooled minute plan apply to PDAs to enable email and internet access.

FOR THE FISCAL YEAR ENDED JUNE 30, 2009

SECTION II – FINANCIAL STATEMENT FINDINGS

CURRENT STATUS ON PRIOR YEAR FINDINGS (CONTINUED):

2007-04 Personal Use of County Vehicle – Commuting

Not repeated.

2007-06 Housing Authority Budgets

Repeated with modification.

Statement of Condition – The Housing Authority budgets are not amended, monitored or adopted in accordance with New Mexico State statutes.

Criteria – The Housing Authority is considered to be a department of the County and therefore, the budget provisions as stated in 6-3-1 to 6-3-25 NMSA 1978 apply to the Housing Authority budgets.

Cause – The Housing Authority, although a part of the County, budgets in accordance with HUD requirements, which uses budgets only as a guideline.

Effect – Noncompliance with New Mexico Budgeting Statutes –

- Expenditures exceeded budget – Villa Sereno – Low Income Housing \$18,596.

Recommendation – The County should require the Housing Authority to adopt budgets, monitor and amend those budgets in accordance with New Mexico State Statutes.

Management’s Response – Budgets for the Housing Authority are prepared in accordance with HUD prescribed requirements.

Project No. ES09.0306
Subject PCE effluent concentration
By GH Checked By KI

Date 01/19/10
Sheet 1 of 1
Calculation No. _____

1.0 OBJECTIVES

1. Determine effluent potential emission rates (PER) for tetrachloroethylene (PCE).

2.0 GIVEN

PCE concentrations in groundwater measured in City of Las Cruces (CLC) Well 18. Maximum hydraulically feasible treatment rate of 500 gallons per minute (gpm). Assume 100% of the PCE in the water is transferred to the air and subsequently released into the atmosphere.

3.0 METHOD

To determine the maximum effluent PER the maximum PCE concentration of 50 µg/L from the CLC water quality sampling is used^A. Two effluent rates need to be determined according to the NMED AQB, "Overview & Guidance to New Mexico NSR Air Permitting Requirements"¹ guidance document: a maximum emission rate in pounds per hour and a total emission in tons per year of any regulated contaminant. These two rates are calculated using discharge rates (Q) and applicable conversion factors using the following equations:

$$\text{PER}_{\text{max}} = (Q \text{ gpm}) * (3.79 \text{ L/gal}) * (\text{Conc } \mu\text{g/L}) * (1 \text{ lb}/4.53 \times 10^8 \mu\text{g}) * (60 \text{ min/hr}) = \text{lb/hr}$$

$$\text{PER}_{\text{max}} = (0.013 \text{ lb/hr}) * (1 \text{ ton}/2000 \text{ lb}) * (24 \text{ hrs/ day}) * (365 \text{ days/ yr}) = \text{ton/yr}$$

4.0 SOLUTION

Calculate maximum PER for PCE:

$$\text{PER}_{\text{max}} = (500 \text{ gpm}) * (3.79 \text{ L/gal}) * (50 \mu\text{g/L}) * (1 \text{ lb}/4.53 \times 10^8 \mu\text{g}) * (60 \text{ min/hr})$$

PER_{max} = 0.013 lb/hr

$$\text{PER}_{\text{max}} = (0.013 \text{ lb/hr}) * (1 \text{ ton}/2000 \text{ lb}) * (24 \text{ hrs/ day}) * (365 \text{ days/ yr}) = \text{ton/yr}$$

PER_{max} = 0.05 ton/yr

NMED AQB requires a permit or a notice of intent for any source that emits greater than 10 pounds per hour and 10 tons per year of any regulated contaminant. The maximum emission rates calculated are well below the regulation; therefore neither a permit nor a notice of intent is required.

Appendix E
Cost Analysis

MEMORANDUM

TO: Doug Reaber, Gundar Peterson

FROM: Kelly Isaacson

DATE: January 5, 2010

SUBJECT: Present Worth Calculations for the Preliminary Engineering Report for the Griggs & Walnut Groundwater Plume Superfund Site

In the draft *Preliminary Engineering Report, Remediation of PCE Contamination, Griggs and Walnut Ground Water Plume Superfund Site*, dated December 7, 2009 (PER), differences exist between present worth values presented in Table 5 within the report, and those listed in the four summary tables comprising Appendix C. The intention of this memo is to address these discrepancies.

In Appendix B of *Feasibility Study Report, Griggs and Walnut Ground Water Plume Superfund Site, Las Cruces, New Mexico*, (CH2MHILL, November 2006), detailed cost estimates are provided for each of the considered treatment alternatives. These cost estimates were reported in 2006 dollars, and were the basis for the cost estimates prepared by DBS&A. Rather than revising the unit cost of each line item to reflect the value in 2009 dollars for the PER, the estimates were revised using the unit costs provided and subsequently applying an inflation factor to each category subtotal to reflect the value of the dollar in 2009. The inflation rates for 2007, 2008, and 2009 were determined from the Bureau of Labor Statistics, and were used to convert the values in 2006 dollars given in Appendix C to 2009 dollars that are reported in columns 3 and 5 of Table 5 of the PER for construction costs and annual operation and maintenance (O&M) costs (see Table 5 below). This inflation is what leads to the discrepancy between the values in Appendix C and Table 5. For clarity, we will remove the bottom lines of the four tables in Appendix C that list a present worth value.

Cost estimates for construction and O&M costs in 2009 dollars and present worth calculations in 2009 dollars were needed for the PER. The present worth given in column 5 of Table 5 was calculated as specified below Table 5. All values in Table 5 are given in 2009 dollars.

Treatment Type	Comparative Construction Costs		Average Annual Comparative O&M Costs	
	2006 Dollars (millions)	2009 Dollars (millions) ⁽¹⁾	2006 Dollars (millions)	2009 Dollars (millions) ⁽¹⁾
Low Profile Tray Aeration with Acid	\$5.51	\$5.91	\$0.56	\$0.60
Low Profile Tray Aeration without Acid	\$4.44	\$4.75	\$0.37	\$0.40
Liquid-Phase GAC	\$4.93	\$5.28	\$0.34	\$0.37
AOP	\$5.95	\$6.38	\$0.43	\$0.46

NOTES:

1 - Professional Services includes Project Management, Design/Technical Support, and Construction Management.
 2 - The cost estimates provided are to an accuracy of +50 percent to -30 percent and are prepared for the sole purpose of alternative comparison. The alternative cost estimates are in 2006 dollars and are based on conceptual design from information available at the time of this study. The actual cost of the project would depend on the final scope and design of the selected remedial action, the schedule of implementation, competitive market conditions, and other variables.

Alternative 4 - Enhanced Ground Water Extraction (Targeted Pumping) with Treatment

COST ESTIMATE DETAILS

PROJECT: Griggs and Walnut Superfund Site Preliminary Engineering Report
 SITE: Griggs and Walnut Superfund Site - Las Cruces, New Mexico
 ALTERNATIVE: 4 Enhanced Ground Water Extraction (Targeted Pumping) with Treatment
 DESCRIPTION: Groundwater Extraction and Treatment with Air Stripper
 PREPARED BY: DBS&A
 PROJECT NUMBER: ES09.0306

Assumptions

- The accuracy of the cost estimate is +50%/-30%
- See "Conceptual Design" spreadsheet for basis of cost estimate assumptions.
- The number of new nested monitoring wells required to be installed = 0 wells included under groundwater monitoring
- Number of new groundwater extraction wells to be installed = 0 wells included under groundwater monitoring
- Number of piezometers to be installed = 0 piezometers included under groundwater monitoring
- Number of reinjection wells to be installed = 0 wells
- Assume that the duration of construction is 128 working days (includes 90 working days for treatment system construction and installation)
- The number of wells to be sampled for VOCs is 0 wells per round included under groundwater monitoring
- The number of wells on-site to be abandoned for post-closure is 0 wells includes new extraction wells only
- The G&A rate is 14%
- The overhead rate is 5%
- The Bonding & Insurance rate is 2%
- The fee rate is 8%

Total Post Closure Cost	\$ 305,973

NOTES:

1 - Professional Services includes Project Management, Design/Technical Support, and Construction Management.

2 - The cost estimates provided are to an accuracy of +50 percent to -30 percent and are prepared for the sole purpose of alternative comparison. The alternative cost estimates are in 2006 dollars and are based on conceptual design from information available at the time of this study. The actual cost of the project would depend on the final scope and design of the selected remedial action, the schedule of implementation, competitive market conditions, and other variables.

Alternative 4 - Enhanced Ground Water Extraction (Targeted Pumping) with Treatment

COST ESTIMATE DETAILS

PROJECT: Griggs and Walnut Superfund Site Preliminary Engineering Report
 SITE: Griggs and Walnut Superfund Site - Las Cruces, New Mexico
 ALTERNATIVE: 4 Enhanced Ground Water Extraction (Targeted Pumping) with Treatment
 DESCRIPTION: Groundwater Extraction and Treatment with Air Stripper without Acid Pretreatment
 PREPARED BY: DBS&A
 PROJECT NUMBER: ES09.0306

Assumptions

1. The accuracy of the cost estimate is +50%/-30%
2. See "Conceptual Design" spreadsheet for basis of cost estimate assumptions.
3. The number of new nested monitoring wells required to be installed = 0 wells included under groundwater monitoring
4. Number of new groundwater extraction wells to be installed = 0 wells included under groundwater monitoring
5. Number of piezometers to be installed = 0 piezometers included under groundwater monitoring
6. Number of reinjection wells to be installed= 0 wells
7. Assume that the duration of construction is 128 working days (includes 90 working days for treatment system construction and installation)
8. The number of wells to be sampled for VOCs is 0 wells per round included under groundwater monitoring
9. The number of wells on-site to be abandoned for post-closure is 0 wells includes new extraction wells only
10. The G&A rate is 14%
11. The overhead rate is 5%
12. The Bonding & Insurance rate is 2%
13. The fee rate is 8%

Detailed Capital and Operations and Maintenance Costs

CAPITAL COST					
<u>Item/Activity</u>	<u>Qty</u>	<u>Unit</u>	<u>Unit Cost</u>	<u>Cost</u>	<u>Comments and References</u>
Construction					
Underground Piping from CLC-18 to CLC-27 connection to Upper Griggs Reservoir	1,000	ft	\$ 100.17	\$ 100,170	estimated LF from CLC: cost includes 10-inch pipe, trenching, backfill, compacting, asphalt repaving (RS Means)
Underground Piping from new extraction well to CLC-27 connection to Upper Griggs Reservoir	750	ft	\$ 100.17	\$ 75,128	10-inch pipe, trenching, backfill, compacting, asphalt repaving (RS Means)
Piping Connection to Treatment System	500	lf	\$ 100.17	\$ 50,085	10-inch pipe, trenching, backfill, compacting, asphalt repaving (RS Means)
Pumping Well Modifications	2	ea	\$ 25,000.00	\$ 50,000	JSP Memo 7/8/06
Groundwater Extraction Well Installation	0	well	\$ 200,000.00	\$ -	JSP Memo 7/8/06
Groundwater Extraction Pumps	2	ea	\$ 10,000.00	\$ 20,000	assume replace city pumps, vendor quote; 100gpm, 15 hp, 3-phase, 230V, 6"
Influent Equalization Tank	10,000	gal	\$ 1.00	\$ 10,000	provides 20-minutes of storage
Tank Effluent Pump	0	ea	\$ 4,000.00	\$ -	included with air stripper
Influent and Effluent Bag Filters	2	LS	\$ 7,500.00	\$ 15,000	500 gpm size filter
Low-Profile Tray Air Stripper Package	2	LS	\$ 55,000.00	\$ 110,000	Assume 540 gpm NEEP Model 41251 Tray Air stripper (controls, piping, skid, blower, influent and effluent pumps)
Protective Enclosure	1	ea	\$ 800,000.00	\$ 800,000	Assume 50'x80' building at \$200/sf, pre-fab metal
Repair discharge line on CLC-27	1	LS	\$ 300.00	\$ 300

NOTES:

1 - Professional Services includes Project Management, Design/Technical Support, and Construction Management.

2 - The cost estimates provided are to an accuracy of +50 percent to -30 percent and are prepared for the sole purpose of alternative comparison. The alternative cost estimates are in 2006 dollars and are based on conceptual design from information available at the time of this study. The actual cost of the project would depend on the final scope and design of the selected remedial action, the schedule of implementation, competitive market conditions, and other variables.

Alternative 4 - Enhanced Ground Water Extraction (Targeted Pumping) with Treatment

COST ESTIMATE DETAILS

PROJECT: Griggs and Walnut Superfund Site Preliminary Engineering Report
 SITE: Griggs and Walnut Superfund Site - Las Cruces, New Mexico
 ALTERNATIVE: 4 Enhanced Ground Water Extraction (Targeted Pumping) with Treatment
 DESCRIPTION: Groundwater Extraction and Treatment with GAC
 PREPARED BY: DBS&A
 PROJECT NUMBER: ES09.0306

Assumptions

1. The accuracy of the cost estimate is +50%/-30%
2. See "Conceptual Design" spreadsheet for basis of cost estimate assumptions.
3. The number of new nested monitoring wells required to be installed

0

 wells included under groundwater monitoring
4. Number of new groundwater extraction wells to be installed =

0

 wells included under groundwater monitoring
5. Number of piezometers to be installed =

0

 piezometers included under groundwater monitoring
6. Number of reinjection wells to be installed =

0

 wells
7. Assume that the duration of construction is

128

 working days (includes 90 working days for treatment system construction and installation)
8. The number of wells to be sampled for VOCs is

0

 wells per round included under groundwater monitoring
9. The number of wells on-site to be abandoned for post-closure is

0

 wells includes only new extraction well(s)
10. The G&A rate is

14%

11. The overhead rate is

5%

12. The Bonding & Insurance rate is

2%

13. The fee rate is

8%

Detailed Capital and Operations and Maintenance Costs

Alternative 4 - Enhanced Ground Water Extraction (Targeted Pumping) with Treatment

COST ESTIMATE SUMMARY ²

PROJECT: Griggs and Walnut Superfund Site Preliminary Engineering Report
 SITE: Griggs and Walnut Superfund Site - Las Cruces, New Mexico
 ALTERNATIVE: 4 Enhanced Ground Water Extraction (Targeted Pumping) with Treatment
 DESCRIPTION: Groundwater Extraction and Treatment with HIPOx
 PREPARED BY: DBS&A
 PROJECT NUMBER: ES09.0306

Capital Cost	
Construction	\$ 2,503,780
Project Management	\$ 200,302
Design	\$ 375,567
Construction Management	\$ 375,567
Subcontractor General Requirements	\$ 125,189
G&A	\$ 501,257
Overhead	\$ 179,020
Tax	\$ 255,104
Contingency	\$ 895,101
Bonding& Insurance	\$ 108,218
Fee	\$ 432,871
Total Capital Cost	\$ 5,951,977
Year 1 Operations and Maintenance	
System Startup	\$ 53,400
Routine System O&M	\$ 192,877
Reporting (Annual Report and Construction Completion Report)	\$ 73,500
Professional Services ¹	\$ 73,549
Subcontractor General Requirements	\$ 15,989
G&A	\$ 57,304
Overhead	\$ 20,466
Tax	\$ 29,164
Contingency	\$ 102,329
Bonding& Insurance	\$ -
Fee	\$ 49,486
Total Year 1 Operations and Maintenance	\$ 668,063
Annual Operations and Maintenance Cost: Years 2-5	
Routine System O&M	\$ 139,837
Reporting (Annual Reports)	\$ 18,375
Professional Services ¹	\$ 36,389
Subcontractor General Requirements	\$ 7,911
G&A	\$ 28,352
Overhead	\$ 10,126
New Mexico Gross Receipts Tax	\$ 14,429
Contingency	\$ 50,628
Bonding& Insurance	\$ -
Fee	\$ 24,484

Fee	\$ 24,484
Total Annual Operations and Maintenance Cost: Years 6-20	\$ 330,529
Post Closure Cost	
Closure Reporting	\$ 18,375
Equipment Demobilization and Well Abandonment	\$ 184,000
Professional Services ¹	\$ 66,784
Subcontractor General Requirements	\$ 10,119
G&A	\$ 39,099
Overhead	\$ 13,964
New Mexico Gross Receipts Tax	\$ 19,899
Contingency	\$ 69,819
Bonding& Insurance	\$ 8,441
Fee	\$ 33,765
Total Post Closure Cost	\$ 464,264
TOTAL PRESENT WORTH	\$ 11,587,373

NOTES:

1 - Professional Services includes Project Management, Design/Technical Support, and Construction Management.
 2 - The cost estimates provided are to an accuracy of +50 percent to -30 percent and are prepared for the sole purpose of alternative comparison. The alternative cost estimates are in 2006 dollars and are based on conceptual design from information available at the time of this study. The actual cost of the project would depend on the final scope and design of the selected remedial action, the schedule of implementation, competitive market conditions, and other variables.

Alternative 4 - Enhanced Ground Water Extraction (Targeted Pumping) with Treatment

COST ESTIMATE DETAILS

PROJECT: Griggs and Walnut Superfund Site Preliminary Engineering Report
 SITE: Griggs and Walnut Superfund Site - Las Cruces, New Mexico
 ALTERNATIVE: 4 Enhanced Ground Water Extraction (Targeted Pumping) with Treatment
 DESCRIPTION: Groundwater Extraction and Treatment with HIPOx
 PREPARED BY: DBS&A
 PROJECT NUMBER: ES09.0306

Assumptions

- The accuracy of the cost estimate is +50%/-30%
- See "Conceptual Design" spreadsheet for basis of cost estimate assumptions.
- The number of new nested monitoring wells required to be installed = 0 wells included under groundwater monitoring
- Number of new groundwater extraction wells to be installed = 0 wells included under groundwater monitoring
- Number of piezometers to be installed = 0 piezometers included under groundwater monitoring
- Number of reinjection wells to be installed= 0 wells
- Assume that the duration of construction is 128 working days (includes 90 working days for treatment system construction and installation)
- The number of wells to be sampled for VOCs is 0 wells per round included under groundwater monitoring
- The number of wells on-site to be abandoned for post-closure is 0 wells includes only new extraction well(s)
- The G&A rate is 14%
- The overhead rate is 5%
- The Bonding & Insurance rate is 2%
- The fee rate is 8%

Detailed Capital and Operations and Maintenance Costs

CAPITAL COST					
Item/Activity	Qty	Unit	Unit Cost	Cost	Comments and References
Construction					
Underground Piping from CLC-18 to CLC-27 connection to Upper Griggs Reservoir	1,000	ft	\$ 100.17	\$ 100,170	estimated LF from CLC: cost includes 10-inch pipe, trenching, backfill, compacting, asphalt repaving (RS Means)
Underground Piping from new extraction well to CLC-27 connection to Upper Griggs Reservoir	750	ft	\$ 100.17	\$ 75,128	10-inch pipe, trenching, backfill, compacting, asphalt repaving (RS Means)
Piping Connection to Treatment System	500	lf	\$ 100.17	\$ 50,085	10-inch pipe, trenching, backfill, compacting, asphalt repaving (RS Means)
Pumping Well Modifications	2	ea	\$ 25,000.00	\$ 50,000	JSP Memo 7/8/06
Groundwater Extraction Well Installation	0	well	\$ 200,000.00	\$ -	JSP Memo 7/8/06
Groundwater Extraction Pumps	2	ea	\$ 10,000.00	\$ 20,000	assume replace city pumps, vendor quote; 100gpm, 15 hp, 3-phase, 230V, 6"
Influent Equalization Tank	0	gal	\$ 1.00	\$ -	provides 20 of storage
Tank Effluent Pump	2	ea	\$ 4,000.00	\$ 8,000	Assumes two 10 hp units (Pump with motor controls for 540 GPM @ 50TDH)
Influent and Effluent Bag Filters	2	LS	\$ 7,500.00	\$ 15,000	gpm size filter
HIPOx Treatment System	1	LS	\$ 531,250.00	\$ 531,250	Equipment is skid mounted, pre-assembled, pre-tested, and fully automated. Equipment includes reactor, instruments, controls, H2O2 storage, O3 generator/chiller, and on-site O2 generation system
HIPOx Bench Test	1	LS	\$ 3,000.00	\$ 3,000	1-time bench test to accurately determine dosing requirements and equipment sizing
Protective Enclosure	1	ea	\$ 800,000.00	\$ 800,000	Assume 50'x80' building at \$200/sf, pre-fab metal
Repair discharge line on CLC-27	1	LS	\$ 300.00	\$ 300	
Well Permits	0	ea	\$ 30.00	\$ -	new extraction well
Equipment Rental	26	wk	\$ 200.00	\$ 5,200	MultiRAE
Subtotal Capital Cost				\$ 1,658,133	
Site Work Allowance	7%	of	\$ 1,658,132.50	\$ 116,069	
Mechanical Allowance	15%	of	\$ 1,658,132.50	\$ 248,720	
Instrumentation and Controls Allowance	12%	of	\$ 1,658,132.50	\$ 198,976	including SCADA system
Electrical Allowance	12%	of	\$ 1,658,132.50	\$ 198,976	
Miscellaneous Equipment Allowance	5%	of	\$ 1,658,132.50	\$ 82,907	
Subtotal Capital Cost				\$ 2,503,780	
Project Management	8%	of	\$ 2,503,780.08	\$ 200,302
